

Contents

1	General Qualitative Properties	1
1.1	Historical Note	1
1.2	Examples and Some Definitions	3
1.3	Harmonic Oscillators and Integrable Systems as Dynamical Systems	13
1.4	Frequencies of Visit	17
2	Ergodicity and Ergodic Points	27
2.1	Quasi-Periodic Motions and Integrability	27
2.2	Ergodic Properties of Quasi-Periodic Motions. Ergodic Sequences and Measures	32
2.3	Ergodic Points	52
2.4	Ergodic Decomposition	62
3	Entropy and Complexity	73
3.1	Complexity of Motions and Entropy	73
3.2	The Shannon–McMillan Theorem	81
3.3	Elementary Properties of the Average Entropy	92
3.4	Further Properties of the Average Entropy. Generator Theorem	99
4	Markovian Pavements	109
4.1	Compatibility of Histories. Markovian Pavements	109
4.2	Markovian Pavements for Hyperbolic Systems	119
4.3	Coding of the Volume Measure of Smooth Hyperbolic Systems	141
5	Gibbs Distributions	155
5.1	Gibbs Distributions	155
5.2	Properties of Gibbs Distributions	165
5.3	Gibbs Distributions on \mathbb{Z}^+	170
5.4	An Application: Expansive Maps of $[0, 1]$	180
6	General Properties of Gibbs and SRB Distributions	189
6.1	Variational Properties of Gibbs Distributions	189
6.2	Applications to Anosov Systems. SRB Distribution	199

6.3	Periodic Orbits, Invariant Probability Distributions and Entropy	208
6.4	Equivalent Potentials. Gibbs Distributions with Transitive Vacuum	216
7	Analyticity, Singularity and Phase Transitions	227
7.1	Polymers	227
7.2	Cluster Expansions	240
7.3	Renormalization by Decimation in One-Dimensional Systems	257
7.4	Absence of Phase Transitions: More Criteria	270
7.5	Phase Transitions	276
8	Special Ergodic Theory Problems in Nonchaotic Dynamics	291
8.1	Theory of Quasi-Periodic Hamiltonian Motions	291
8.2	Graphs and Diagrams for the Lindstedt Series	299
8.3	Cancellations	307
8.4	Convergence and the KAM Theorem	316
9	Some Special Topics in KAM Theory	327
9.1	Resummations and Renormalized Series for Invariant Tori	327
9.2	Bounds on Renormalized Series. Convergence	332
9.3	Scaling Laws for the Standard Map	341
9.4	Limit Function for the Standard Map near Resonances	352
10	Special Problems in Chaotic Dynamics	359
10.1	Perturbing Arnold's Cat Map	359
10.2	Extended Systems. Lattices of Arnold's Cat Maps	366
10.3	Chaos in Time: An SRB Distribution	371
10.4	Chaos in Space-Time and SRB Distributions	381
10.5	Isomorphisms	392
A	Nonequilibrium Thermodynamics? Twenty-Seven Comments	397
	Bibliography	411
	Name Index	423
	Subject Index	425
	Citations Index	433

Aspects of Ergodic, Qualitative and Statistical Theory of
Motion

Gallavotti, G.; Bonetto, F.; Gentile, G.

2004, X, 440 p., Hardcover

ISBN: 978-3-540-40879-6
