Contents

Part I Introduction

1 Introduction 3
E. Matzner

1.1 General Introduction 3
1.2 Goals and Approaches of BITÖK Research 4
1.3 Scope of the Synthesis and Problems Addressed 5
References 10

2 The Lehstenbach and Steinkreuz Catchments in NE Bavaria, Germany 15
P. Gerstberger, T. Foken, and K. Kalbitz

2.1 The Lehstenbach Catchment in the Fichtelgebirge Mountains 15
2.2 The Steinkreuz Catchment in the Steigerwald Hillsides . . . 30
References 40

Part II The Changing Environment

3 Trace Gases and Particles in the Atmospheric Boundary Layer at the Waldstein Site: Present State and Historic Trends . . 45
O. Klemm

3.1 Introduction 45
3.2 Sites 46
3.3 Trends in Sulfur Dioxide 46
3.4 Trends in Nitrogen Gases 48

3.5 Trends in Ozone 50
3.6 Trends in Fog Chemistry 53
3.7 Aerosol Particles 54
3.8 Conclusions 56
References 57

4 Climate Change in the Lehstenbach Region 59
T. Foken

4.1 Introduction 59
4.2 Change of Climatological Elements 59
4.3 Consequences of Climate Change 65
4.4 Conclusions 65
References 66

Part III Vegetation Response

5 Atmospheric and Structural Controls on Carbon and Water Relations in Mixed-Forest Stands of Beech and Oak . 69
B. Köstner, M. Schmidt, E. Falge, S. Fleck, and J.D. Tenhunen

5.1 Introduction 69
5.2 The Study Sites Steinkreuz and Großebene 71
5.3 Analysis of Canopy Transpiration and Conductance by Means of Sap Flow Measurements 76
5.4 Analysis of Carbon and Water Relations by Structural Variation in Model Systems 87
5.5 Conclusions 90
References 93

6 Impacts of Canopy Internal Gradients on Carbon and Water Exchange of Beech and Oak Trees 99
S. Fleck, M. Schmidt, B. Köstner, W. Faltin, and J.D. Tenhunen

6.1 Introduction 99
6.2 Crown Structures of Mature Beech and Oak Trees 104
6.3 Leaf Properties 109
6.4 A Modelling Study on the Gas-Exchange of Leaf Clouds . . 115

6.5 Discussion 121
6.6 Conclusions 124
References 124

7 Soil CO_2 Fluxes in Spruce Forests – Temporal and Spatial Variation, and Environmental Controls 127
J.-A. Subke, N. Buchmann, and J.D. Tenhunen

7.1 Introduction 127
7.2 Measuring Sites 128
7.3 Temporal Variation of Soil CO_2 Efflux 129
7.4 Within- and Between-Stand Variation of Soil CO_2 Efflux . . 135
7.5 The Annual C Budget of the Forest Soil 138
7.6 Conclusions 139
References 140

8 Carbon Budget of a Spruce Forest Ecosystem 143
C. Rebmann, P. Anthoni, E. Falge, M. Göckede, A. Mangold, J.-A. Subke, C. Thomas, B. Wichura, E.-D. Schulze, J. Tenhunen, and T. Foken

8.1 Introduction 143
8.2 Measuring Site and Quality Control 144
8.3 Calculation of Fluxes 146
8.4 Results and Discussion 150
8.5 Conclusions 156
References 157

9 Structure of Carbon Dioxide Exchange Processes Above a Spruce Forest 161
B. Wichura, J. Ruppert, A.C. Delany, N. Buchmann, and T. Foken

9.1 Introduction and ^{13}C Signatures 161
9.2 Balances of ^{13}C and CO_2 163
9.3 Hyperbolic Relaxed Eddy Accumulation (HREA) as a Relevant Measuring Method 164
9.4 Results 168
9.5 Conclusions 173
References 174

10 Modeling the Vegetation Atmospheric Exchange with a Transilient Model 177
M. Berger, R. Dlugi, and T. Foken

10.1 Introduction 177
10.2 Short Description of FLAME 178
10.3 Model Initialization for the Case Study 179
10.4 Comparison of Measured and Modeled Fluxes 183
10.5 Conclusions 187
References 189

11 Fog Deposition and its Role in Biogeochemical Cycles of Nutrients and Pollutants 191
T. Wrzesinsky, C. Scheer, and O. Klemm

11.1 Introduction 191
11.2 Site 192
11.3 Fog Chemistry 193
11.4 Direct Measurement of Fog Deposition 194
11.5 Fog Deposition Model 195
11.6 Discussion 199
11.7 Conclusions 200
References 201

12 Turbulent Deposition of Ozone to a Mountainous Forest Ecosystem 203
O. Klemm, A. Mangold, and A. Held

12.1 Introduction 203
12.2 Site 204
12.3 Experimental Setup 204
12.4 Big Leaf Model 205
12.5 Modelled Fluxes 206
12.6 Deposition to the Forest Canopy 208
12.7 Deposition to the Forest Ground 209
12.8 Synthesis and Conclusions 211
References 213

13 The Emissions of Biogenic Volatile Organic Compounds (BVOC) and Their Relevance to Atmospheric Particle Dynamics 215
R. Steinbrecher, B. Rappenglück, A. Hansel, M. Graus, O. Klemm, A. Held, A. Wiedensohler, and A. Nowak

13.1 Introduction 215
13.2 Flux Measurement Methods 218
13.3 Fluxes of Primary and Secondary BVOC 220
13.4 Modelled Versus Measured Isoprenoid Emission 223
13.5 Particle Size Distribution and Fluxes 225
13.6 Conclusions 227
References 228

14 Trends in Deposition and Canopy Leaching of Mineral Elements as Indicated by Bulk Deposition and Throughfall Measurements 233
E. Matzner, T. Zuber, C. Alewell, G. Lischeid, and K. Moritz

14.1 Introduction 233
14.2 Trends of Concentrations 235
14.3 Trends of Fluxes and Total Deposition 238
14.4 Rates and Trends of Canopy Leaching 245
14.5 Conclusions 247
References 248

15 Phyllosphere Ecology in a Changing Environment: The Role of Insects in Forest Ecosystems 251
B. Stadler and B. Michalzik

15.1 Introduction 251
15.2 Ecology of Canopy Insects 253
15.3 Interactions Between Insects and Micro-organisms 257
15.4 Biotic Interactions and Throughfall Chemistry 258
15.5 Beyond the Canopy: Influences on Soil Processes and Ecosystems 260
15.6 Synthesis and Future Prospects 263
15.7 Conclusions 265
References 267

16 Element Fluxes with Litterfall in Mature Stands of Norway Spruce and European Beech in Bavaria, South Germany . . 271
B. Berg and P. Gerstberger

16.1 Introduction 271
16.2 Discussion 272
16.3 Concluding Remarks 277
References 277

17 The Role of Woody Roots in Water Uptake of Mature Spruce, Beech, and Oak Trees 279
J. Lindenmair, E. Matzner, and R. Zimmermann

17.1 Introduction 279
17.2 Root Chamber Method 280
17.3 Water Uptake Rates of Coarse Roots for Different Tree Species 282
17.4 Time Course of Water Uptake for Spruce Roots in Relation to Climatic and Soil Physical Parameters and Xylem Sapflow Rates 284
17.5 Extrapolation from Root to Tree Scale 286
17.6 Conclusions 286
References 287

18 Radial Growth of Norway Spruce [*Picea abies* (L.) Karst.] at the Coulissenhieb Site in Relation to Environmental Conditions and Comparison with Sites in the Fichtelgebirge and Erzgebirge 291
C. Dittmar and W. Elling

18.1 Introduction 291
18.2 Status and Radial Growth of Norway Spruce at the Coulissenhieb Site 294
18.3 Growth Influences and Their Temporal and Regional Variations 297
18.4 Conclusions 307
References 308

Part IV Soil Response

19 Environmental Controls on Concentrations and Fluxes of Dissolved Organic Matter in the Forest Floor and in Soil Solution 315
K. Kalbitz, T. Zuber, J.-H. Park, and E. Matzner

19.1 Introduction 315
19.2 Experimental Design and Sampling 317
19.3 Analysis, Calculations and Statistics 318
19.4 Long-term DOC and DON Concentrations and Fluxes at a Coniferous and a Deciduous Site 319
19.5 Environmental Controls on DOM Dynamics 326
19.6 Summary and Conclusions 333
References 334

20 Response of Soil Solution Chemistry and Solute Fluxes to Changing Deposition Rates 339
E. Matzner, T. Zuber, and G. Lischeid

20.1 Introduction 339
20.2 Development of Soil Solution Chemistry 340
20.3 Development of Element Fluxes with Soil Solution 345
20.4 Element Budgets of the Soil 348
20.5 General Discussion 354
20.6 Conclusions 357
References 358

21 Sequestration Rates for C and N in Soil Organic Matter at Four N-Polluted Temperate Forest Stands 361
B. Berg

21.1 Introduction 361
21.2 Sequestration of Carbon in SOM Under Growing Stands of Norway Spruce and European Beech – A Model Validation 364
21.3 Sequestration Rates of Carbon in SOM at the Sites Coulissenhieb and Steinkreuz 368
21.4 Sequestration of Nitrogen in SOM Under Growing Stands of Norway Spruce and European Beech at the Site Solling – A Model Validation 369

21.5 How Much Can the Model Explain the N Sequestration? – A Validation . . . 371
21.6 Sequestration Rates of Nitrogen in SOM in a Norway Spruce Forest at the Sites Coulissenhieb and Steinkreuz . . . 372
21.7 The Missing C and N Fractions – Can They Be Explained? . 372
21.8 How Stable Are the Long-Term Stored C and N Fractions in SOM? . . . 373
21.9 Concluding Remarks . . . 374
References . . . 375

22 Riparian Zones in a Forested Catchment: Hot Spots for Microbial Reductive Processes . . . 377
K. Küsel and C. Alewell

22.1 Introduction . . . 377
22.2 Site Description of Wetland Sites . . . 378
22.3 Sequential Microbial Reductive Processes in Soils: Theoretical Considerations and the Reality in the Lehstenbach Catchment . . . 380
22.4 Wetlands of the Lehstenbach Catchment as a Sink for Anthropogenic Nitrate . . . 383
22.5 Wetlands of the Lehstenbach Catchment as a Sink for Anthropogenic Sulfate . . . 384
22.6 Ecophysiology and Phylogenetic Diversity of Sulfate-Reducing Prokaryotes in Fens of the Lehstenbach Catchment . . . 387
22.7 Competing Anaerobic Microbial Processes in Fens of the Lehstenbach Catchment . . . 388
22.8 Conclusions . . . 390
References . . . 391

Part V Catchment Response

23 Dynamics of Runoff and Runoff Chemistry at the Lehstenbach and Steinkreuz Catchment . . . 399
G. Lischeid, H. Lange, K. Moritz, and H. Büttcher

23.1 Introduction . . . 399
23.2 Statistical Analysis . . . 401
23.3 Discharge . . . 405

23.4 Solute Concentration 412
23.5 Conclusions 432
References 433

24 Trends in the Input–Output Relations: The Catchment Budgets 437
G. Lischeid, C. Alewell, K. Moritz, and J. Bittersohl

24.1 Introduction 437
24.2 Determination of Catchment Budgets 438
24.3 Output Fluxes Via Runoff 441
24.4 Mean Budgets 444
24.5 Changing Catchment Behaviour 447
24.6 Conclusions: Long-Term Implications 451
References 452

Part VI Synthesis

25 Biogeochemistry of Two Forested Catchments in a Changing Environment: A Synthesis 457
E. Matzner, B. Köstner, and G. Lischeid

25.1 The Changing Environment 457
25.2 Recovery from Acidification of Soils and Waters 459
25.3 Fate of Deposited Nitrogen 464
25.4 Carbon Sequestration 469
25.5 Water Fluxes Between Vegetation and Environment 471
25.6 Atmospheric Controls on Processes and Fluxes 476
25.7 Criteria of Sustainable Use 479
25.8 Overall Conclusions 481
25.9 Outlook 483
References 484

Subject Index 491

Biogeochemistry of Forested Catchments in a Changing Environment
A German Case Study
Matzner, E. (Ed.)
2004, XXII, 500 p., Hardcover
ISBN: 978-3-540-20973-7
