

Contents

1	Biomaterials in Drug Delivery	1
1.1	Introduction	1
1.2	Structure and Properties of Hydrogels	3
1.2.1	Equilibrium Swelling	5
1.2.2	Network Pore Size Calculation	10
1.3	Diffusion in Hydrogels	12
1.3.1	Macroscopic Analysis	13
1.3.2	Network Structural Effects	15
1.3.3	Experimental Determination of Diffusion Coefficients	20
1.4	Classifications	23
1.4.1	Diffusion-Controlled Release Systems	23
1.4.2	Swelling-Controlled Release Systems	25
1.4.3	Chemically Controlled Release Systems	26
1.4.4	Environmentally Responsive Systems	28
	References	30
2	Drug Delivery Systems for Localized Treatment of Disease	33
2.1	Introduction	33
2.2	Drug Delivery Systems	33
2.2.1	Diffusion-Controlled Drug Delivery Devices	36
2.2.2	Water-Controlled Drug Delivery Devices	39
2.2.3	Chemically Controlled Drug Delivery Devices	40
2.2.4	Lipid-Based Drug Delivery Systems	41
2.3	Drug Delivery to the Lung	42
2.4	Bone Infection Treatment	44
2.5	Cancer Treatment	48
2.5.1	Intratumoral Versus Systemic Delivery	48
2.5.2	Liver Cancer	49
2.5.3	Neurological Cancer	51
2.5.4	Dermatological (Head and Neck/Skin) Cancer	52
2.5.5	Skeletal Cancer	53
2.5.6	Breast Cancer	54
2.6	Conclusions	55
	Acknowledgement	56

References	56
3 Application of Protein Electrophoresis Techniques	61
3.1 Introduction	61
3.2 Common Electrophoretic Systems for Separation and Characterization of Proteins	62
3.2.1 Polyacrylamide Gel Electrophoresis (PAGE)	63
3.2.2 Sodium Dodecyl Sulfate-Polyacrylamide Gel Electrophoresis; SDS-PAGE	64
3.2.3 Other Common Electrophoretic Separation Techniques	68
3.3 Protein Visualization: What You See Depends on How You Look	71
3.4 Variables of State with Respect to Protein Binding at a Material Surface	75
3.5 Some Recent Applications of Protein Electrophoresis in Biomaterials Science	79
3.6 Electrophoretic Characterization of the Interaction of Extracellular Matrix (ECM) Proteins with Glass Surfaces: A Case Study	81
3.6.1 Protein Binding	81
3.6.2 Analyses of Adsorbed Proteins; General Considerations	84
3.6.3 Analyses of Adsorbed Proteins from Several Types of Glasses Via SDS-PAGE and Native-PAGE	86
3.7 Conclusions	90
References	90
4 Xenoestrogens as Endocrine Disruptors	93
4.1 Introduction	93
4.2 Prevalence and Biological Effects	95
4.2.1 Classes of Xenoestrogens and Human Exposure	95
4.2.2 Xenoestrogens and Wildlife Reproduction	96
4.2.3 The Unfortunate Consequences of Human Exposure to DES	97
4.2.4 Xenoestrogens and Tumorigenesis	99
4.3 Mechanism of Action	100
4.3.1 Estrogen Receptors; Structure and Function	100
4.3.2 Agonistic and Antagonistic Actions	103
4.3.3 Metabolism and Genotoxicity	104
4.4 Bisphenol A: An Estrogenic Compound in Unexpected Places	105

4.4.1	BPA: Prevalence and Discovery of Estrogenicity	105
4.4.2	Binding Affinity and <i>in Vitro</i> Actions	107
4.4.3	Effects of BPA on Adult Animals	108
4.4.4	Developmental Effects of Xenoestrogens	112
4.5	Summary and Perspectives	114
	References	114
5	Medical Devices	119
5.1	Research Management for the Development of Medical Devices	119
5.1.1	Introduction	119
5.1.2	A Multidisciplinary Approach to Medical Product Development	120
5.1.3	Constructive Medical Technology Assessment	121
5.1.4	Concurrent Engineering	123
5.2	Biological Evaluation of Medical Devices	124
5.2.1	Categories of Medical Devices	124
5.2.2	Animal Experiments	126
5.3	Applications	127
5.3.1	Mechanical Circulatory Support Systems	128
5.3.2	An Extendable Modular Endoprosthetic System for Bone Tumor Management in the Leg	140
5.3.3	The Groningen Temporomandibular Joint Prosthesis	145
5.3.4	Laryngeal Prosthesis	155
5.3.5	Tracheostoma Valves	171
5.3.6	Fixation of Tracheostoma Valves	177
5.3.7	Voice-Producing Prosthesis	184
