

Contents

Section I Crop Origin and Importance

I.1 Species Origin and Economic Importance of *Brassica*

G. RAKOW

1 Introduction	3
2 Origin, Taxonomy and Distribution of <i>Brassica</i> Species	3
3 Economic Importance of <i>Brassica</i> Species	6
4 Conclusions	11
References	11

I.2 Rapid-Cycling *Brassica* in Research and Education

E. HIMELBLAU, D. LAUFFER, R. TEUTONICO, J.C. PIRES, and T.C. OSBORN

(With 3 Figures)

1 Introduction	13
2 Development of Common Rapid-Cycling <i>Brassica</i> Stocks	13
3 Rapid-Cycling <i>Brassica</i> as a Model Organism for Plant Research	15
4 Applications of Rapid-Cycling <i>Brassica</i> in Education	16
5 Active Research Areas with Educational Applications	20
6 Current Status and Future Prospects of Rapid-Cycling <i>Brassica</i> in Education	26
References	27

Section II Molecular Genetics

II.1 Genome Mapping and Analysis

C.F. QUIROS and A.H. PARTERSON

1 Introduction	31
2 Brief Synopsis of Mapping Activities in <i>Brassica</i>	31
3 Comparative Organization of the <i>Brassica</i> and <i>Arabidopsis</i> Genomes	35
4 Applications	37
5 Conclusions	38
References	39

II.2 Male Sterility

F. BUDAR, R. DELOURME, and G. PELLETIER (With 3 Figures)

1 Introduction	43
2 Spontaneous Male Sterilities in <i>Brassica</i>	44
3 Engineered Male Sterilities in <i>Brassica</i>	45
4 Molecular Features of Cytoplasmic Male Sterilities and Fertility Restoration.....	48
5 Agronomical Use of the Different Systems	52
6 Conclusions	57
References	57

II.3 Biotechnology for Pollination Control in Crucifer Oilseed Crops

M.E. NASRALLAH (With 2 Figures)

1 Introduction	65
2 Current Schemes for Pollination Control and Hybrid Seed Production in <i>B. napus</i>	67
3 Biotechnological Applications of SI for Hybrid Breeding in Oilseed Crops	73
4 Perspectives	78
References	78

Section III Tissue Culture and Transgenic Technology

III.1 Regulation of Plant Morphogenesis In Vitro

E.C. PUA and H. GONG (With 1 Figure)

1 Introduction	83
2 Genotypic Variability in Morphogenic Capacity	84
3 Role of Ethylene in Culture	84
4 Interactive Role of Polyamines and Ethylene	91
5 Plant Morphogenesis in Relation to H ₂ O ₂	93
6 Genetic Control of Morphogenic Competence	94
7 Conclusions	96
References	97

III.2 Regeneration of Plants via Somatic Embryogenesis

C.S. LOH, W. SHU, and W.L. KOH

1 Introduction	103
2 Induction of Somatic Embryogenesis	104
3 Secondary Embryogenesis in <i>B. napus</i> ssp. <i>oleifera</i>	109
4 Secondary Embryogenesis in Rapid-Cycling <i>B. napus</i> , <i>B. campestris</i> and <i>B. nigra</i>	112

5 Regeneration of Plants	112
6 Concluding Remarks	114
References	114

III.3 *Brassica* Protoplast Culture and Somatic Hybridization

M.C. CHRISTEY (With 1 Figure)

1 Introduction	119
2 Shoot Regeneration from Protoplasts	120
3 Protoplast Fusion	123
4 Resynthesis of Amphidiploids	133
5 Cytoplasmic Traits	136
6 Organelle Segregation	139
7 Fertility of Somatic Hybrids	141
8 Conclusions	142
References	143

III.4 *Brassica* Improvement Through Microspore Culture

A.M.R. FERRIE and W.A. KELLER

1 Introduction	149
2 Development of Haploidy Protocols	149
3 Improvement of <i>Brassica</i> via Haploidy Protocols	153
4 Conclusions	163
References	163

III.5 Production of Transgenic Vegetable Brassicas

M.C. CHRISTEY and R. BRAUN

1 Introduction	169
2 Susceptibility to <i>Agrobacterium</i>	170
3 Shoot Regeneration from Explants	170
4 Transformation Methods	177
5 Enhancing Transformation Rates	181
6 Agronomic Traits Introduced	184
7 Field Testing	188
8 Environmental Concerns with GM Plants	189
9 Conclusions	189
References	190

III.6 Transgenic Oilseed Brassicas

E.C. PUA and T.S. LIM

1 Introduction	195
2 Plant Transformation	196

3 Factors Affecting Plant Transformation and Transgene Expression	209
4 Applications of Transgenic Technology	212
5 Transgene Flow	216
6 Conclusions	217
References	218

Section IV Crop Improvement and Molecular Farming

IV.1 Insect-Resistant Transgenic Brassicas

E.D. EARLE, J. CAO, and A.M. SHELTON (With 1 Figure)

1 Introduction	227
2 Insect Pests of <i>Brassica</i> Crops	227
3 Transgenic Brassicas Expressing <i>Bacillus thuringiensis</i> (Bt) Genes	228
4 Transgenic Brassicas Expressing Proteinase Inhibitor (PI) Genes	241
5 Other Approaches to Transgenic Insect Resistance	245
6 Conclusions	246
References	248

IV.2 Disease Resistance

C. DIXELIUS, S. BOHMAN, and S. WRETLAD

1 Introduction	253
2 Disease Resistance to Major Fungal Pathogens on <i>B. napus</i> and <i>B. rapa</i>	254
3 Defense Studies on Diseases of Minor Importance	262
4 Conclusions	263
References	264

IV.3 Herbicide Resistance

S. WARWICK and B. MIKI (With 2 Figures)

1 Introduction	273
2 Herbicide-Resistant Crops	275
3 Regulations	276
4 Mechanisms of Herbicide Resistance	277
5 Environmental Impact of Herbicide-Resistant Crops	283
6 Strategies for Transgene Containment and Implications of Genomic Location of the Insertion Sites	289
7 Conclusions	290
References	290

IV.4 Genetic Engineering of Lipid Composition

D.J. MURPHY (With 4 Figures)

1 Introduction	297
2 Lipid Composition of <i>Brassica</i> Seeds	298
3 Uses of Seed Lipids	299
4 Targets for Fatty Acid Modification	300
5 Progress So Far	302
6 Challenges for Transgenic <i>Brassica</i> Crops	307
7 Future Challenges	312
References	313

IV.5 Biochemical Genetics of Glucosinolate Biosynthesis in *Brassica*

R. MITHEN and R. PARKER (With 8 Figures)

1 Introduction	317
2 Glucosinolate Structure, Biochemical Diversity and Degradation	319
3 Glucosinolate Biosynthetic Pathways – Insights from <i>Arabidopsis</i> Research	324
4 Gene Mapping and QTL Identification in <i>Brassica</i>	331
5 Future Prospects	335
References	335

Subject Index	339
---------------------	-----

Brassica

Pua, E.C.; Douglas, C.J. (Eds.)

2004, XVII, 344 p., Hardcover

ISBN: 978-3-540-20264-6
