## Part I Biological Background

---

<b>1</b>	<b>An Overview of the Cell .....</b>	<b>3</b>
1.1	Cells .....	3
1.2	Major Components of Eukaryotic Cells .....	6
1.3	Chromosome Structure .....	8
1.4	Chromosomes and Genes .....	14
	Notes on References .....	21
<b>2</b>	<b>Ciliates .....</b>	<b>23</b>
2.1	Defining Characteristics of Ciliates .....	23
2.2	Nuclear Dualism .....	25
2.3	Micronuclear Versus Macronuclear DNA .....	28
	Notes on References .....	35
<b>3</b>	<b>Molecular Operations for Gene Assembly .....</b>	<b>37</b>
3.1	Homologous Recombination .....	37
3.2	Three Molecular Operations .....	39
	Notes on References .....	43

---

## Part II Formal Modelling of Gene Assembly

---

<b>4</b>	<b>Model Forming .....</b>	<b>47</b>
4.1	Formalizing Genes .....	47
4.2	Levels of Abstraction .....	51
4.3	Formalizing Molecular Operations .....	53

4.4	Marriage of Models .....	55
	Notes on References .....	56
<b>5</b>	<b>Mathematical Preliminaries</b> .....	57
5.1	Sets and Functions .....	57
5.2	Strings .....	58
5.3	Signed Strings .....	59
5.4	Circular Strings .....	61
5.5	Graphs .....	62
	Notes on References .....	65
<b>6</b>	<b>MDS Arrangements and MDS Descriptors</b> .....	67
6.1	MDS Arrangements .....	67
6.2	MDS Descriptors .....	69
	Notes on References .....	73
<b>7</b>	<b>MDS Descriptor Pointer Reduction System</b> .....	75
7.1	Assembly Operations on MDS Descriptors .....	75
7.2	The Assembling Power of the Operations .....	80
	Notes on References .....	81
<b>8</b>	<b>Legal Strings</b> .....	83
8.1	Representation by Legal Strings .....	83
8.2	Realizable Legal Strings .....	85
	Notes on References .....	90
<b>9</b>	<b>String Pointer Reduction System</b> .....	91
9.1	Assembly Operations on Strings .....	91
9.2	Equivalence to Descriptor Pointer Reduction System .....	93
9.2.1	Ld and Snr .....	93
9.2.2	Hi and Spr .....	95
9.2.3	Dlad and Sdr .....	96
	Notes on References .....	97
<b>10</b>	<b>Overlap Graphs</b> .....	99
10.1	Overlap Graphs of Legal Strings .....	99
10.2	Realizable Graphs .....	102
10.3	The Overlap Equivalence Problem .....	105
	Notes on References .....	108
<b>11</b>	<b>Graph Pointer Reduction System</b> .....	109
11.1	Assembly Operations on Graphs .....	109
11.2	Equivalence to String Pointer Reduction System .....	112
11.2.1	From snr to gnr .....	112
11.2.2	From spr to gpr .....	113

11.2.3 From <i>sdr</i> to <i>gdr</i> .....	113
11.2.4 Reverse Implications .....	115
Notes on References .....	117

---

## Part III Properties of Gene Assembly

---

<b>12 Invariants</b> .....	121
12.1 MDS–IES Descriptors .....	121
12.2 Invariant Theorem .....	126
Notes on References .....	129
<b>13 Patterns of Subsets of Rules</b> .....	131
13.1 Small Reductions .....	131
13.2 Disjoint Cycles .....	133
13.3 Subsets of Successful Patterns .....	138
13.3.1 <i>snr</i> .....	138
13.3.2 <i>snr</i> and <i>spr</i> .....	139
13.3.3 <i>snr</i> and <i>sdr</i> .....	141
13.3.4 <i>spr</i> .....	143
13.3.5 <i>sdr</i> .....	145
13.3.6 <i>spr</i> and <i>sdr</i> .....	147
13.4 Complexity of Reductions .....	147
Notes on References .....	149
<b>14 Gene Assembly Through Cyclic Graph Decomposition</b> .....	151
14.1 Graphs with Labels and Colors .....	151
14.2 Folding an MI-graph .....	156
14.3 Unfolding Paired MI-graphs .....	159
14.4 Assembled MI-graphs of Genomes .....	164
14.5 Intracyclic Unfolding .....	166
Notes on References .....	175

---

## Part IV Epilogue

---

<b>15 Intermolecular Model</b> .....	179
15.1 String Rules .....	179
15.2 The Intermolecular Model in Terms of Signed Strings .....	180
15.3 Invariants of the Intermolecular Model .....	182
Notes on References .....	184
<b>16 Discussion</b> .....	187
16.1 Between Biology and Computer Science .....	187
16.2 Gene Assembly Strategies .....	188

XII     Contents

16.3 Scope of the Operations .....	189
16.4 Pointer Alignment .....	190
Notes on References .....	191
<b>References</b> .....	<b>193</b>
<b>Index</b> .....	<b>197</b>

Computation in Living Cells

Gene Assembly in Ciliates

Ehrenfeucht, A.; Harju, T.; Petre, I.; Prescott, D.M.;

Rozenberg, G.

2004, XIV, 202 p., Hardcover

ISBN: 978-3-540-40795-9
