■ Part I Regional Aspects of Coral Reef Health and Disease

1	The Coral Reefs of Eilat – Past, Present and Future: Three Decades of Coral Community Structure Studies	1
	YOSSI LOYA	
1.1	Introduction	1
1.1.1	The Gulf of Eilat/Aqaba: Geographical Setting, Geological, Physical and Biological Characteristics.....	1
1.1.2	The Coral Reefs of Eilat	6
1.2	Changes in Coral Community Structure at Eilat Due to Natural Perturbations and Human Disturbances During 1969–1982	7
1.2.1	Natural Catastrophes: Extreme Midday Low Tides.....	7
1.2.2	Coral Community Stability	10
1.2.3	Oil-Pollution Effects on Eilat Corals.....	10
1.3	Mechanisms That Generate and Maintain Coral Diversity in the Northern Gulf of Eilat/Aqaba	12
1.3.1	Hypothesis 1.....	12
1.3.2	Hypothesis 2.....	13
1.4	Man's Destructive Activities: Acute Degradation of the Coral Reefs of Eilat Due to Eutrophication	17
1.4.1	Acute Degradation of Coral Diversity and Living Cover at Eilat During 1986–2000 Due to Eutrophication by Urban Sewage and Net Pen Fish Farms.....	17
1.4.2	Eutrophication Effects on the Reef's Food Chain, Metabolism, Interspecific Interactions and Genetic Structure of Coral Populations	19
1.4.3	Detrimental Effects of Eutrophication on Coral Reproduction.....	20
1.4.4	Coral Diseases and Syndromes	23
1.4.5	Local Extinction or Decrease in Abundance of Organisms Associated with Corals	25
1.4.6	Recent Assessments of the Effects of the Fish Farms on the Coral Reefs of Eilat.....	25
1.5	Conclusions and a Word of Warning.....	27
	References	29

2 Coral Reef Diseases in the Wider Caribbean	35
ERNESTO WEIL	
2.1 Introduction	35
2.2 Historical Perspective	37
2.3 Current Status	41
2.3.1 Pathology and Etiology	41
2.3.2 Epizootiology	48
2.4 Causes, Origin and Ecological Consequences	57
2.5 Some Unresolved Questions and Future Directions.....	58
References	64
3 Coral Disease on the Great Barrier Reef	69
BETTE L. WILLIS, CATHIE A. PAGE, and ELIZABETH A. DINSDALE	
3.1 Introduction.....	69
3.2 Overview of Diseases Infecting Great Barrier Reef and Indo-Pacific Corals	70
3.2.1 Black Band Disease on the Great Barrier Reef	71
3.2.2 Skeletal Eroding Band: an Indo-Pacific Coral Disease?.....	74
3.2.3 White Syndrome – a Collective Term for Conditions Producing White Symptoms on the Great Barrier Reef	74
3.2.4 Brown Band: a New Syndrome on the Great Barrier Reef	75
3.2.5 Gorgonian Infections on the Great Barrier Reef: Black Necrosing Syndrome.....	76
3.2.6 Coral-Algal Interactions: Algal Infections?	76
3.2.7 Pigmentation Response in <i>Porites</i> : A symptom with a variety of causes?.....	77
3.2.8 Coral Tumours.....	78
3.3 Coral Disease Surveys on the Great Barrier Reef	78
3.3.1 Survey Protocols	79
3.3.2 Results of Large-Scale AIMS LTMP Surveys	82
3.3.3 Results of Regional Disease Prevalence Surveys.....	89
3.3.4 Discussion and Conclusions	97
3.3.5 Some Unresolved Questions and Future Research.....	101
References.....	102
4 Coral Diseases in Gulf of México Reefs	105
ERIC JORDÁN-DAHLGREN and ROSA. E. RODRÍGUEZ-MARTÍNEZ	
4.1 Introduction	105
4.2 Study Sites	106
4.3 Methods.....	107
4.4 Results.....	108
4.4.1 Community Structure of the Reefs	108
4.4.2 Diseases and Syndromes	110

4.5	Discussion	114
	References.....	117
5	Coral Bleaching: Signs of Change in Southern Japan.....	119
	ROBERT VAN WOESIK, AKIYUKI IRIKAWA, and YOSHI LOYA	
5.1	Introduction	119
5.1.1	Environmental Setting.....	120
5.1.2	Objectives	122
5.2	Materials and Methods	122
5.2.1	Field Study.....	122
5.2.2	Data Acquisition and Processing.....	123
5.3	Results.....	123
5.3.1	Community Responses.....	123
5.3.2	Species-Specific Responses	123
5.4	Discussion	137
5.5	Unresolved Questions and Future Research	138
	References.....	140
6	Coral Bleaching in a Temperate Sea: From Colony Physiology to Population Ecology.....	143
	MAOZ FINE and YOSHI LOYA	
6.1	Introduction	143
6.2	Spatial Distribution of Bleaching.....	146
6.3	Physiological Effects of Bleaching on <i>Oculina patagonica</i>	147
6.3.1	Reproduction	147
6.3.2	Regeneration and Growth	148
6.4	Alternative Source of Photosynthetic Products During Coral Bleaching	151
6.5	Prospects for <i>Oculina patagonica</i> Population.....	152
6.6	Unresolved Questions.....	154
	References.....	155
7	Coral Bleaching, Diseases and Mortality in the Western Indian Ocean...157	
	TIM McCLANAHAN	
7.1	Introduction	157
7.2	Bleaching	157
7.2.1	The Environmental Background	157
7.2.2	Bleaching in 1998	159
7.2.3	Bleaching in 2003	161
7.2.4	Coral Bleaching and Mortality.....	162
7.2.5	Acclimation and Adaptation to Bleaching	164
7.2.6	The Effects of Coral Bleaching and Mortality on Fish and Fisheries	165
7.2.7	Recovery from Coral Mortality	167

7.3	Coral Diseases	169
7.3.1	The “Fungal Syndrome”	169
7.3.2	The Working Hypotheses	172
7.3.3	Some Unresolved Questions and Future Research.....	173
	References.....	174

■ Part II Microbial Ecology and Physiology of Corals

8	Symbiont Diversity on Coral Reefs and Its Relationship to Bleaching Resistance and Resilience	177
	ANDREW C. BAKER	
8.1	Introduction	177
8.1.1	Overview.....	177
8.2	Diversity of <i>Symbiodinium</i>	178
8.2.1	Historical Perspective on Diversity	178
8.2.2	Current Understanding of Diversity.....	179
8.3	Distribution of <i>Symbiodinium</i>	180
8.3.1	Host-Systematic Distribution of <i>Symbiodinium</i>	180
8.3.2	Symbiont Diversity Within Single Species of Host.....	181
8.3.3	Recombinant Symbioses and the Return of the Hopeful Monster	182
8.4	Resistance and Resilience to Coral Bleaching	182
8.4.1	Bleaching Resistance	183
8.4.2	Bleaching Resilience	185
8.4.3	Environmental History, Time Delays and Naïveté	187
8.4.4	Regional Differences in Bleaching Response	187
8.4.5	Symbiont Diversity and Bacterial Bleaching.....	189
8.5	Understanding the Past History and Future Fate of Coral Reefs	189
8.6	Research Priorities	190
	References.....	191
9	Stress Effects on Metabolism and Photosynthesis of Hermatypic Corals	195
	NOGA STAMBLER AND ZVY DUBINSKY	
9.1	Introduction	195
9.2	Methods Used for Measuring Stress on Coral Photosynthesis and Respiration	196
9.3	Photoacclimation	197
9.4	Photoinhibition	198
9.5	Depth Effects on Metabolism and Photosynthesis	202
9.6	Temperature Stress	203
9.7	Anthropogenic Effects	207

9.7.1	Eutrophication	207
9.7.2	Herbicide	207
9.7.3	Cyanide	208
9.7.4	Copper	208
9.8	Starvation	208
9.9	Sedimentation Effects	209
9.10	Pathogens	209
9.11	Zooxanthellae Genetic Variation	209
9.12	Coral Bleaching	210
9.13	Unresolved Questions and Future Research	211
	References.....	212
10	What Can Regeneration Processes Tell Us About Coral Disease?.....	217
	ESTI KRAMARSKY-WINTER	
10.1	Introduction	217
10.2	Environmental Conditions Affecting Regeneration	218
10.3	Physiological Parameters	221
10.4	Bleaching and Regeneration.....	224
10.5	Cellular Aspect of Regeneration.....	225
10.6	What Regeneration Mechanisms May Tell Us About Disease and Recovery?.....	227
10.7	Unresolved Questions and Future Research	227
	References.....	228
11	Bacteria as a Source of Coral Nutrition.....	231
	ARIEL KUSHMARO and ESTI KRAMARSKY-WINTER	
11.1	Introduction	231
11.2	Bacterial Suspension Feeding.....	231
11.3	Endolithic Community and Nitrogen Fixation in the Coral Skeleton.....	232
11.4	Coral Surface and the Mucus Microlayer	233
11.5	Interaction Between Corals and Bacteria	234
11.6	Aggregates as a Possible Nutrition Source	235
11.7	Conclusion.....	237
11.8	Unanswered Questions and Further Research Directions	238
	References.....	238
12	Antimicrobial Activity of Sponges and Corals	243
	DOVI KELMAN	
12.1	Introduction	243
12.2	Antimicrobial Activity of Sponges.....	244
12.3	Antimicrobial Activity of Corals	250
12.4	Some Unresolved Questions and Future Research.....	254
12.4.1	Nontoxic Antimicrobial Activity	254
12.4.2	Localization of Antimicrobials	255

12.4.3 Role of Associated Bacteria in the Production of Antimicrobials	255
References.....	255
13 Microbial Communities of Coral Surface Mucopolysaccharide Layers ...	259
KIM B. RITCHIE and GARRIET W. SMITH	
13.1 Introduction	259
13.2 Structure of the Coral Surface Mucopolysaccharide Layer	259
13.3 Changes in the Coral Surface Mucopolysaccharide Layer Composition Lead to Changes in the Bacterial Population Structure	262
13.4 Unresolved Questions and Future Research	263
References.....	263
14 Culture-Independent Analyses of Coral-Associated Microbes	265
FOREST ROHWER and SCOTT KELLEY	
14.1 Introduction	265
14.2 Coral Reefs and the Marine Microbial Food Web.....	265
14.3 Uncultured Microbes and the Three Domains of Life.....	267
14.4 Uncultured Microbes Associated with Healthy Corals.....	268
14.5 Culture-Independent Analyses of Coral Diseases.....	270
14.6 Microbial Growth on Corals.....	271
14.7 Conclusions	272
14.8 Major Unanswered Questions and Future Research	272
14.8.1 What Are Coral-Associated Prokaryotes Doing?.....	272
14.8.2 What Is the Mucus Made of?	273
14.8.3 Culturing the Uncultured.....	274
References.....	275
 ■ Part III Coral Diseases	
15 Aspergillosis of Gorgonians.....	279
GARRIET W. SMITH and ERNESTO WEIL	
15.1 Introduction and History	279
15.2 Infection Patterns.....	279
15.3 Identity of the Pathogen	280
15.4 Host Range	284
15.5 Future Work.....	286
References.....	286
16 White Pox Disease of the Caribbean Elkhorn Coral, <i>Acropora palmata</i>	289
KATHRYN PATTERSON SUTHERLAND and KIM B. RITCHIE	
16.1 Introduction	289

16.2	The Coral Pathogen, <i>Serratia marcescens</i>	290
16.3	Loss of <i>Acropora palmata</i> in the Florida Keys National Marine Sanctuary: 1994–2002	292
16.4	Potential Sources of the White Pox Pathogen	296
16.5	Unresolved Questions and Future Research	297
	References.....	297
17	Temperature-Regulated Bleaching and Tissue Lysis of <i>Pocillopora damicornis</i> by the Novel Pathogen <i>Vibrio coralliilyticus</i>	301
	Yael Ben-Haim Rozenblat and Eugene Rosenberg	
17.1	Introduction	301
17.2	<i>Pocillopora damicornis</i>	302
17.3	How General Is Bacterial Bleaching of Corals?.....	303
17.4	Isolation and Characterization of <i>Vibrio coralliilyticus</i>	303
17.5	Bleaching of <i>Pocillopora damicornis</i> by <i>Vibrio coralliilyticus</i>	308
17.6	The Pathogen Was Present in Bleached Corals in the Red Sea, Eilat	310
17.7	Lysis of Coral Tissue by <i>Vibrio coralliilyticus</i>	311
17.8	The Effect of Temperature on the Infection	313
17.9	Protease Activity of <i>Vibrio coralliilyticus</i>	314
17.10	Effect of Higher Than Normal Temperatures on Different Eilat Corals	316
17.11	General Discussion and Conclusions	317
17.12	Unresolved Problems and Directions of Future Research	320
	References.....	321
18	Black Band Disease.....	325

19 Dark Spots Disease and Yellow Band Disease, Two Poorly Known Coral Diseases with High Incidence in Caribbean Reefs	337
DIEGO L. GIL-AGUDELO, GARRIET W. SMITH, JAIME GARZÓN-FERREIRA, ERNESTO WEIL, and DIRK PETERSEN	
19.1 Introduction	337
19.2 Dark Spots Disease.....	338
19.2.1 Original Description	338
19.2.2 Species Affected by the Disease	339
19.2.3 Geographic Range and Prevalence of the Disease	339
19.2.4 Environmental Parameters Affecting Dark Spots Disease.....	340
19.2.5 Growth Rate of Dark Spots Disease	341
19.2.6 Pathological Studies.....	341
19.2.7 Other Studies and Observations	341
19.3 Yellow Band and/or Blotch Disease	343
19.3.1 Original Description	343
19.3.2 Species Affected by the Disease	344
19.3.3 Geographic Range and Prevalence of the Disease	345
19.3.4 Growth Rate of Yellow Band Disease	346
19.3.5 Pathological Studies.....	346
19.3.6 Other Studies and Observations	347
19.4 Unresolved Questions and Future Research	347
19.4.1 Field Determinations	347
19.4.2 Laboratory Determinations	347
References.....	348
20 White Plague, White Band, and Other “White” Diseases.....	351
JOHN BYTHELL, OLGA PANTOS, and LAURIE RICHARDSON	
20.1 Introduction	351
20.2 White Plague – One Disease or Many?	352
20.3 White Band Disease – A Different Pathology?	355
20.4 Other “White” Diseases	358
20.5 Outbreaks of the White Diseases:	
Relative Severity and Prevalence.....	358
20.6 Bacterial 16S rDNA Diversity of White Plague Affected Corals	359
20.7 Histopathology.....	361
20.8 Some Unresolved Questions and Future Directions.....	363

KERRI M. MULLEN, ESTHER C. PETERS, and C. DREW HARVELL	
22.1 Theoretical Framework	377
22.2 Known Mechanisms of Coral Resistance	378
22.2.1 Structure and Function of Coral Cells	378
22.2.2 Innate Immune Response	379
22.2.3 Coral Immune System	380
22.3 Gorgonians: the Sea Fan as a Model System	386
22.3.1 Generalized Antifungal Activity	388
22.3.2 Chitinase.....	389
22.3.3 Melanin.....	389
22.3.4 Amoebocyte Recruitment	392
22.3.5 Encapsulation with Gorgonin	393
22.4 Some Unresolved Questions and Future Research.....	394
References.....	395

■ Part IV Coral Bleaching

23 Temperature Stress and Coral Bleaching	401
PAUL L. JOKIEL	
23.1 Introduction	401
23.1.1 The Bleaching Phenomenon	401
23.1.2 Bleaching as a Disease Symptom.....	402
23.1.3 Coral Bleaching as an Environmental Indicator.....	402
23.1.4 Phenomenology Versus Mechanisms	402
23.2 Phenomenology Overview.....	403
23.2.1 Bleaching and Coral Function.....	403
23.2.2 General Principles of Bleaching Phenomena	405
23.2.3 Evidence for Acclimatization.....	411
23.2.4 Evidence for Adaptation	411
23.3 Mechanisms Involved in Bleaching, Acclimatization and Adaptation	412
23.3.1 Primary Mechanisms of Cause	412
23.3.2 Acclimatization Mechanisms.....	413
23.3.3 Behavioral Protective Mechanisms.....	415
23.4 Adaptation Mechanisms.....	416
23.5 Climate Change, Bleaching and the Future of Coral Reefs.....	417
23.6 Unresolved Questions and Future Research	419
References.....	419

24 The Adaptive Hypothesis of Bleaching	427
ROBERT W. BUDDEMEIER, ANDREW C. BAKER, DAPHNE G. FAUTIN, and J. REBECCA JACOBS	
24.1 Introduction	427
24.1.1 Biological Background	427
24.1.2 Conceptual Background	427
24.1.3 Aim and Scope	428
24.2 Adaptive Bleaching: Characteristics and Definitions	429
24.2.1 Terminology	429
24.2.2 Diversity in Taxonomy, Scale, and Environment	429
24.2.3 Stochasticity	431
24.3 Accumulating Evidence	433
24.3.1 Taxonomic and Functional Diversity	433
24.3.2 Existence of Distinguishable, Changeable Partnerships	434
24.3.3 Characteristics of Ecospecies	436
24.4 Discussion and Development	438
24.4.1 The Adaptive Bleaching Hypothesis in Its Original Sense – Evidence for Existence	438
24.4.2 Symbiotic Adaptation as a General Phenomenon	438
24.5 Conclusions and Recommendations	439
24.5.1 Summary	439
24.5.2 Unresolved Questions and Future Research	439
References	440
25 The Bacterial Disease Hypothesis of Coral Bleaching	445
EUGENE ROSENBERG	
25.1 Introduction	445
25.2 The Bleaching Disease of <i>Oculina patagonica</i>	446
25.3 <i>Vibrio shiloi</i> : the Causative Agent of Bleaching of <i>O. patagonica</i>	448
25.3.1 Virulence Mechanisms of <i>V. shiloi</i>	449
25.4 Effect of Temperature on <i>V. shiloi</i> Virulence Factors	451
25.5 Transmission of the Disease	452
25.6 The Generality of the Bacterial Infection Hypothesis of Coral Bleaching	454
25.6.1 Patchy Bleaching	454
25.6.2 Mass Bleaching	455
25.7 Some Unresolved Questions and Future Research	457
References	459
26 Coral Reefs and Projections of Future Change	463
OVE HOEGH-GULDBERG	
26.1 Introduction	463
26.1.1 The State of the World's Reefs	463
26.2 Human Impacts on Reefs	465

26.2.1	Anthropogenic Changes to Reef Health	465
26.2.2	Climate Change: Past and Current	467
26.2.3	Coral Bleaching and Climate Change	468
26.3	Projections of Future Change.....	469
26.3.1	Projected Conditions over this Century	469
26.3.2	Responses of Coral Populations to Global Climate Change.....	471
26.3.3	Implications for Reef Distribution and Biodiversity	477
26.3.4	Integrated Impacts: the Importance of Reef Resilience	479
26.4	Conclusion: Socio-Economic Costs and the Precautionary Principle	480
	References.....	481
