## Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Overview and Background	1
1.1.1	Overview	1
1.1.2	EAs Described	2
1.2	Previous Research	6
1.2.1	Diversity Introduction and Maintenance	7
1.2.2	Addition of Memory	8
1.2.3	Importance of the Characteristics of the Landscape	9
1.3	Open Research Issues	9
1.4	Importance and Relevance	10
1.5	Book Structure	11
<b>2</b>	<b>Problem Analysis</b>	13
2.1	Overview	13
2.2	Non-stationary Problems	13
2.3	EA Performance in Dynamic Environments	14
2.4	Algorithm Attributes	15
2.4.1	Change Detection	15
2.4.2	Response to Change	17
2.5	Summary	17
<b>3</b>	<b>Solutions from Nature and Engineering</b>	19
3.1	Overview	19
3.2	Biological Systems	19
3.2.1	Immunology Background	20
3.2.2	Application of Immune System Techniques	21
3.3	Engineering Control Systems	21
3.3.1	Sliding Mode Control Systems	22
3.4	Summary	23

<b>4</b>	<b>Diversity Measurement</b>	25
4.1	Efficient Diversity Measurement	25
4.1.1	Overview	25
4.1.2	Background	26
4.1.3	Concept Review	29
4.1.4	A New Method of Computing Population Diversity	30
4.1.5	Relationship to Diversity Measures in Genotypic Space	31
4.1.6	Explanation and Example	34
4.1.7	Computational Efficiency	35
4.1.8	An Alternative Diversity Computation Method for Binary Genotypic Space	35
4.1.9	Computing Diversity Measures in Phenotypic Space	36
4.1.10	Measuring Genotypic Diversity of Non-binary Populations	37
4.1.11	Section Summary	41
4.2	Improved Diversity Measurement for Dynamic Problems	42
4.2.1	Limitations of Current Diversity Measurement Methods	42
4.2.2	Measurement of Search-Space Coverage	43
4.2.3	Dispersion Index, $\Delta$ , Defined	45
4.2.4	Demonstration and Interpretation of the Dispersion Index	51
4.3	Summary	52
<b>5</b>	<b>A New EA for Dynamic Problems</b>	53
5.1	Overview	53
5.2	New EA Design Goals	53
5.2.1	Automatic Detection of and Response to Fitness Landscape Changes	54
5.2.2	Dispersion Control	54
5.2.3	Growth Capability for Adaptive Information Exploitation	54
5.3	New EA Architecture	54
5.3.1	Combined Change Detection and Dispersion Maintenance	55
5.3.2	Reduction in Maximum Error	56
5.3.3	Potential for Adaptive Change Response Using Sentinels	56
5.4	Sentinel Placement	57
5.4.1	Overview	57
5.4.2	Desired Features of a Sentinel Placement Algorithm	58
5.4.3	The Placement Problem	59
5.4.4	Heuristic Sentinel Placement	60
5.4.5	Placement Quality	65
5.4.6	Sentinel Placement Algorithm in High-Dimension Search Spaces	65

5.4.7	Recommended Prime Multiplier Values for Dimensions 1 Through 12 .....	67
5.4.8	Sentinel Placement in Asymmetric Search Spaces .....	68
5.5	Summary .....	68
<b>6</b>	<b>Experimental Methods</b> .....	69
6.1	Overview .....	69
6.2	Problem Generator Background .....	69
6.3	Generator Requirements .....	70
6.3.1	Changing Fitness Peak Heights .....	70
6.3.2	Changing Fitness Peak Shapes .....	70
6.3.3	Changing Fitness Peak Locations .....	71
6.3.4	The Dynamics of Change .....	71
6.3.5	Problem Generator Requirements Summary .....	71
6.4	Problem Generator Description and Features .....	72
6.4.1	Specifying the Morphology .....	72
6.4.2	Specifying the Dynamics .....	73
6.4.3	Examples .....	76
6.4.4	Linear Motion .....	76
6.4.5	Changing Cone Shapes .....	78
6.4.6	Changing Peak Heights .....	78
6.4.7	DF1 Summary .....	78
6.5	Test Problem Description .....	78
6.5.1	Test Problem Overview .....	78
6.5.2	Static Landscape Structures .....	81
6.5.3	Dynamic Behavior Applied .....	81
6.5.4	Number of Sentinels .....	83
6.6	Comparison Experiments .....	83
6.7	Special Static Problems .....	84
6.8	Summary .....	84
<b>7</b>	<b>Performance Measurement</b> .....	85
7.1	Overview .....	85
7.2	Issues in Performance Measurement .....	85
7.3	Requirements for Performance Measurement .....	87
7.4	Performance Measurement: Collective Mean Fitness .....	87
7.5	Alternative Performance Metrics .....	90
7.6	Additional Summary Dynamic Information .....	91
7.7	Summary .....	92
<b>8</b>	<b>Analysis and Interpretation of Experimental Results</b> .....	93
8.1	Introduction .....	93
8.2	Overview of the Effect of Sentinels .....	93
8.3	Comprehensive Experimental Results .....	96
8.3.1	Summary of Collective Fitness Results Using Sentinels ..	101

XII Contents

8.4	Overview of Comparison to Other Techniques . . . . .	101
8.5	Comparison Analysis and Combined Techniques . . . . .	104
8.6	Summary of Top-Performing Techniques . . . . .	107
8.7	Relationship Between Collective Fitness and Collective Dispersion . . . . .	112
8.8	Important Dispersion Levels for Different Movement Periods . .	120
8.9	Summary of Experimental Results . . . . .	121
<b>9</b>	<b>Experimental Results for Population Initialization . . . . .</b>	<b>123</b>
9.1	Overview . . . . .	123
9.2	Background . . . . .	123
9.3	Experiment . . . . .	124
9.4	Experimental Results . . . . .	125
9.5	Analysis . . . . .	130
9.6	Summary . . . . .	130
<b>10</b>	<b>Summary and Conclusion . . . . .</b>	<b>133</b>
10.1	Summary and Review . . . . .	133
10.2	Research Results . . . . .	133
10.3	Open Issues and Suggested Areas for Future Research . . . . .	135
10.3.1	Examination of More Problems . . . . .	135
10.3.2	Variable Fitness Landscape Change Periods . . . . .	135
10.3.3	Additional Capabilities of Sentinels . . . . .	135
10.3.4	Additional Combinations of Techniques . . . . .	136
10.3.5	Selection as a Dispersion Mechanism . . . . .	136
10.4	Conclusion . . . . .	137
	<b>Notation . . . . .</b>	<b>139</b>
	<b>References . . . . .</b>	<b>141</b>
	<b>Index . . . . .</b>	<b>147</b>

Designing Evolutionary Algorithms for Dynamic  
Environments

Morrison, R.W.

2004, XII, 149 p. 82 illus., Hardcover

ISBN: 978-3-540-21231-7
