**Laudatio on Professor Leopold B. Felsen**  
*Peter Russer* ..... XIII

**Lectio Magistralis**  
*Leopold B. Felsen* ..... XIX

---

## Part I Fields

---

**Electrodynamic Modeling of Metamaterials with Negative Refractive Index**  
*Wolfgang J. R. Hoefer* ..... 3

**Representation of the Field Excited by a Line Source near a 2D Periodic Artificial Material**  
*F. Capolino, D. R. Jackson, D. R. Wilton, L. B. Felsen* ..... 13

**Surface Wave Excitation at Edges in Anisotropic Impedance Surfaces**  
*G. Manara, S. Mugnaini, P. Nepa, A. A. Serra* ..... 25

**Multimode Modeling and Imaging in Nondestructive Testing**  
*K. J. Langenberg, R. Marklein, K. Mayer, H. Wiggemhauser, M. Krause* ..... 35

**Statistical Aspects of Radar Polarimetry**  
*Ernst Lüneburg, Wolfgang-Martin Boerner* ..... 43

**On Wave Dynamics Pertaining to Structures with Aperiodic Order**  
*Vincenzo Galdi, Vincenzo Pierro, Giuseppe Castaldi, Vincenzo Fiumara, Innocenzo M. Pinto, Leopold B. Felsen* ..... 55

**On Some Elements of the Spectral Theory of Diffraction by Singularities**  
*J. M. L. Bernard* ..... 65

**The Truncated Floquet Wave Diffraction Theory for Planar Phased Arrays:  
An Overview**

*M. Albani, F. Capolino, A. Cucini, L. B. Felsen, S. Maci, F. Mariottini, E. Martini,  
A. Polemi, R. Tiberio, A. Toccafondi* . . . . . 75

**Efficient Analysis of Cascaded Structures by the Method of Lines (MoL)**

*Larissa Vietzorreck, Wilfrid Pascher* . . . . . 95

---

**Part II Networks**

---

**Design of Waveguide Filters Using Multiple Irises and Folded Elements**

*M. Mongiardo, L. Accatino, M. Dionigi, P. Kozakowski, A. Lamecki,  
L. Marcaccioli, M. Mrozowski, R. Sorrentino, C. Tomassoni, R. Vincenti Gatti* . . . 105

**Lagrangian Equivalences and the Approximation of Fields by Networks**

*J. M. Arnold, D. F. Parker* . . . . . 119

**Network Methods Applied to Multilayered Cylindrical Radiating Structures**

*Bruno Biscontini, Markus Burger, Peter Russer* . . . . . 129

**Application of System Identification to Time-domain Modeling of  
Electromagnetic Structures**

*Fabio Coccetti, Peter Russer* . . . . . 143

**Hybrid Transmission Line Matrix – Multipole Expansion (TLMME) Method**

*Petr Lorenz, Peter Russer* . . . . . 157

---

**Part III Computational Methods**

---

**EM-Based Simulation of Substrate Coupling in Integrated Circuits**

*Thomas Brandtner, Robert Weigel* . . . . . 171

**The Impedance/Admittance Transformation Concept in Engineering  
Electrodynamics**

*Reinhold Pregla, Stefan Helfert, Łukasz Gręda, Agnieszka Barcz* . . . . . 179

**Physical-Based Methods for Matrix Compression in Large Array Problems:  
A Unified View**

*G. Vecchi, M. Orefice, S. Maci, A. Neto* . . . . . 187

**Embedding Approach to Handling Complexity in Electromagnetic Field  
Problems**

*Anton Tijhuis, Martijn van Beurden, Bas de Hon, Frank van de Water* . . . . . 197

**TLM Model Order Reduction**

*Dzianis Lukashevich, Peter Russer, Andreas Cangellaris* . . . . . 205

---

**Part IV Systems**

---

**A New Antenna Principle for Satellite Radio Reception including the Option for Diversity and Multiband Application**
*Heinz Lindenmeier, Jochen Hopf, Leopold Reiter* . . . . . 221

**Simulation of Systems Containing Electromagnetic, Analogue and Digital Subsystems**
*Mohamed Sobhy, Wolfgang Dressel, Peter Russer* . . . . . 233

**A Ray-Optical Channel Model for Vehicle-to-Vehicle Communication**
*Jürgen Maurer, Thomas Fügen, Werner Wiesbeck* . . . . . 243

**RFID: Ideas for Future Development**
*P. Lugli, S. Bovelli, A. Di Carlo, M. Berliocchi, A. Bolognesi, M. Manenti* . . . . . 255

**UTD Modelling of Radar Scenes for Coherent Multiband Processing**
*Uwe Siart, Simón Tejero* . . . . . 263

**Compact Overview of a Scheme for Sensing Shallowly-Buried Objects Beneath a Moderately Rough Interface**
*Vincenzo Galdi, Leopold B. Felsen* . . . . . 271

Fields, Networks, Computational Methods, and Systems  
in Modern Electrodynamics

A Tribute to Leopold B. Felsen

Russer, P.; Mongiardo, M. (Eds.)

2004, XXX, 280 p., Hardcover

ISBN: 978-3-540-23929-1
