<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	General Introduction	1
1.2	Outline and Scope	3
<b>2</b>	<b>Review of Gyro-Devices</b>	<b>7</b>
2.1	Introduction	7
2.2	Classification of Fast Wave Microwave Sources	8
2.2.1	Gyrotron Oscillator and Gyroklystron Amplifier	11
2.2.2	Cyclotron Autoresonance Maser (CARM)	12
2.2.3	Gyro-TWT (Travelling Wave Tube) and Gyrotwystron Amplifier	16
2.2.4	Gyro-BWO (Backward Wave Oscillator)	17
2.2.5	Overview of Gyro-Devices	18
2.2.6	Magnicons and Gyroharmonic Converters	19
2.2.7	Free Electron Lasers	20
2.3	Remarks	24
<b>3</b>	<b>Basic Principles and Gyrotron Cavities</b>	<b>25</b>
3.1	Basic Principle of Gyrotrons	25
3.2	Eigenmodes of Tapered, Open Resonator Cavities	31
3.2.1	Physical Model for the High Frequency Fields in a Resonator	32
3.2.2	Coaxial Cavity Structures	39
3.2.3	Complex Cavities	41
3.3	Remarks	43
<b>4</b>	<b>Calculation of RF Behaviour</b>	<b>45</b>
4.1	Equation of Motion	45
4.2	Self-Consistent Calculations	57
4.3	Dimensionless Variables	62
4.4	Mode Competition in Gyrotron Oscillators	67
4.4.1	Energy Transfer to a Single Mode	70
4.4.2	Mode Suppression	71
4.4.3	Startup	72
4.4.4	Time Dependent Formulation	74

4.4.5	Current Neutralization .....	75
4.4.6	Mode Competition with Different Harmonics .....	77
<b>5</b>	<b>Practical Considerations</b>	
	<b>for Gyrotron Design .....</b>	<b>83</b>
5.1	Introduction .....	83
5.2	Wall Losses .....	83
5.3	Voltage Depression and Limiting Current .....	87
5.4	Choice of Beam Radius .....	90
5.5	Fresnel Parameter .....	91
5.6	Starting Current .....	91
5.7	Rieke Diagrams for Gyrotrons .....	98
<b>6</b>	<b>Electron Optical and Guiding System .....</b>	<b>103</b>
6.1	Introduction .....	103
6.2	Magnetron Injection Gun .....	103
6.2.1	General Remarks .....	103
6.2.2	Preliminary Design .....	106
6.2.3	Codes for the Design of MIGs .....	108
6.2.4	Design Procedure of MIGs .....	109
6.3	Beam Guidance .....	112
6.4	Beam Dump-Collecting System .....	116
6.4.1	General Remarks .....	116
6.4.2	Theory of Depressed Collectors .....	117
6.4.3	Magnetic Decompression .....	118
6.4.4	Design of Depressed Collectors for Gyrotrons .....	120
6.4.5	Some General Remarks .....	124
<b>7</b>	<b>Output Taper and Quasi-optical Launcher .....</b>	<b>127</b>
7.1	General Remarks .....	127
7.2	Output Taper .....	128
7.2.1	Methods of Taper Analysis and Synthesis .....	129
7.3	Quasi-optical Mode Converter .....	133
7.3.1	Basic Principle of Quasi-optical Mode Converters .....	135
7.3.2	Improved Quasi-optical Mode Converters .....	137
7.4	Concluding Remarks .....	145
<b>8</b>	<b>RF Window .....</b>	<b>147</b>
8.1	General Remarks .....	147
8.2	Practical Aspects of High Power Windows .....	148
8.3	Theory of Disc Type Windows .....	152
8.4	Broadband Output Windows .....	155
8.5	Diamond Windows for Gyrotrons .....	157
8.6	Concluding Remarks .....	160

<b>9</b>	<b>Examples</b>	163
9.1	General Remarks	163
9.2	A Very High-Power, 140 GHz Conventional Gyrotron	164
9.3	A 165 GHz Coaxial Gyrotron	169
9.4	Multifrequency Gyrotron	172
9.5	Second Harmonic Gyrotrons	176
9.6	Concluding Remarks	181
<b>10</b>	<b>Applications</b>	183
10.1	Introduction	183
10.2	ECRH Applications	185
10.3	ECR Discharges for Generation of Multiply Charged Ions and Soft X-Rays	186
10.4	High Frequency Broadband ESR Spectroscopy	188
10.5	Processing of Advanced Ceramics	190
10.5.1	Experimental Setup	192
10.5.2	Experimental Results	194
10.6	Millimeter-Wavelength Radar	199
10.6.1	Active Millimeter Wave Meteorology-Cloud Radar	200
10.6.2	Space Debris Monitoring Radar	202
10.6.3	High Power Nanosecond Radar	202
10.7	RF-Drivers for TeV Linear Colliders	204
	<b>References</b>	207
	<b>Index</b>	225

Gyrotrons

High-Power Microwave and Millimeter Wave Technology

Kartikeyan, M.V.; Borie, E.; Thumm, M.

2004, XI, 228 p., Hardcover

ISBN: 978-3-540-40200-8
