
Contents

Preface	v
1 Introduction	1
1.1 Interdisciplinary Aspects of Multimedia	2
1.2 Contents of This Book	4
1.3 Organization of This Book	4
1.3.1 Systems and Services for Multimedia Applications	5
1.3.2 Multimedia Applications	6
1.4 Further Reading About Multimedia.....	6
2 Database Systems	9
2.1 Multimedia Database Management Systems	9
2.2 Multimedia-specific Properties of an MMDBMS	11
2.2.1 Data Types in Multimedia Databases.....	11
2.2.2 Information Retrieval and Multimedia Queries	12
2.2.3 Name-preserving Data Management.....	12
2.2.4 Representation of Multimedia Data	12
2.2.5 Management and Output of Continuous Data	13
2.3 Data Modeling in MMDBMSs	13
2.3.1 Media and Documents.....	13
2.3.2 Modeling the Structure and Behavior of Media Data	14

2.3.3	Document Modeling.....	16
2.3.4	Meta Data	17
2.4	MMDBMS Implementation.....	19
2.4.1	Platform for Structural Data Management.....	20
2.4.2	Media Servers.....	21
2.4.3	Multimedia Output Components	22
2.5	Summary.....	22
3	Programming	23
3.1	Abstraction Levels.....	24
3.1.1	Device Drivers.....	25
3.1.2	System Software.....	25
3.1.3	Frameworks and Libraries.....	27
3.1.4	Application Generators.....	29
3.2	Requirements for Programming Languages	31
3.2.1	Very Large Data Volumes.....	31
3.2.2	Real-time Requirements	32
3.2.3	Synchronization.....	32
3.2.4	Reusability.....	32
3.2.5	Expandability	32
3.2.6	Maintainability	32
3.2.7	Robustness.....	33
3.3	Object-oriented Application Development.....	33
3.3.1	Basic Terms of the Object Model.....	33
3.3.2	Object Model Properties.....	35
3.3.3	Example: Java	37
3.4	Object-oriented Frameworks and Class Libraries	38
3.4.1	Data Type Modeling.....	38
3.4.2	Modeling Devices	39
3.4.3	Modeling Data Streams	39
3.4.4	Example: Java Media Framework.....	40
3.5	Distribution of Objects	40
3.5.1	Example: OMG and CORBA.....	41
3.5.2	Example: Digital Audio Video Council (DAVIC).....	43
3.5.3	Example: DSM-CC	46

4	Security	51
4.1	Definition of "Security"	51
4.2	General Security Requirements and Properties	52
4.3	Solution: Cryptography	57
4.3.1	Definition of Terms	57
4.3.2	Partial Encryption	58
4.3.3	Commercial Tools for Selective Video Encryption	62
4.3.4	Scalable Adaptation of the Encryption Cost	63
4.3.5	Transparent Encryption for Try&Buy Transactions	64
4.4	Solution: Digital Signatures	66
4.4.1	Methodology and Applications	66
4.4.2	Content-based Digital Signatures for Single and Motion Pictures	67
4.4.3	Problems with Hypermedia/Multimedia Formats	69
4.4.4	Certification—the Trusted Third Party	69
4.5	Solution: Steganographic Methods	70
4.5.1	Methodology and Applications	70
4.5.2	Digital Watermarks—Methodology	71
4.5.3	Methods for Single Images	72
4.5.4	Methods for Motion Pictures	76
4.5.5	Methods for Audio Data	77
4.5.6	Methods for 3D Scenes	78
4.5.7	Digital Fingerprints	78
4.5.8	Copyright Protection Architectures	79
4.6	Sample Applications	79
4.6.1	Unidirectional Distribution Services	80
4.6.2	Information Services	83
4.6.3	Conference Systems	84
4.7	Final Remarks	85
5	Documents, Hypertext, and Hypermedia	87
5.1	Documents	87
5.1.1	Document Architectures	88
5.1.2	Manipulating Multimedia Data	89
5.2	Hypertext and Hypermedia	90
5.2.1	Hypertext, Hypermedia, and Multimedia	91

5.2.2	Hypermedia Systems: Example and Typical Applications	94
5.2.3	History	101
5.2.4	Systems: Architecture, Nodes, and References	103
5.2.5	Closing Remarks on Hypertext Systems	107
5.3	The SGML Document Architecture	109
5.3.1	Using SGML	110
5.3.2	SGML and Multimedia	112
5.3.3	Final Remarks	113
5.4	Hypertext and the World Wide Web	113
5.4.1	Architecture of the World Wide Web	114
5.4.2	The Hypertext Transfer Protocol (HTTP)	114
5.5	The Hypertext Markup Language (HTML)	117
5.5.1	The Structure of HTML Pages	118
5.5.2	Meta Information	118
5.5.3	Tags in HTML	119
5.5.4	HTML Version Differences	119
5.5.5	Cascading Style Sheets	121
5.5.6	Creating HTML Pages	122
5.5.7	SGML and HTML	123
5.5.8	Extended Markup Language (XML)	123
5.5.9	Synchronized Multimedia Integration Language (SMIL)	124
5.6	Dynamic Documents	125
5.6.1	Common Gateway Interface (CGI)	125
5.6.2	Java	127
5.6.3	Applets and Applications in Java	129
5.6.4	JavaScript	130
5.6.5	ActiveX	131
5.6.6	Plug-Ins	131
5.6.7	LiveConnect: Example of an interaction between Java, JavaScript, and HTML	131
5.6.8	Closing Remarks	132
6	Design	133
6.1	Design-specific Properties of Images	133

6.2	Visualizations	135
6.2.1	Objective Visualizations	136
6.2.2	Abstract Visualizations	137
6.2.3	Producing Visualizations.....	138
6.2.4	Good and Bad Visualizations	139
6.3	Symbols: Logos, Icons, and Pictograms.....	140
6.4	Illustrations	141
6.5	Image Production Techniques	142
6.6	Typography.....	143
6.6.1	Layout.....	145
6.7	Esthetics.....	147
7	User Interfaces	151
7.1	Example: Remote-controlled Video Camera.....	153
7.2	Usability.....	155
7.2.1	Goals of Usability.....	155
7.2.2	Solving Usability Problems.....	155
7.3	Direct Manipulation.....	157
7.3.1	Characteristics of Direct Manipulation	157
7.3.2	Forms of Directness	158
7.3.3	Discussion of Direct Manipulation	159
7.4	Guidelines for User-friendly User Interfaces	160
7.5	Components of Graphical User Interfaces.....	161
7.6	GUI and the Audio Medium.....	168
7.7	Innovative Forms of Interaction	169
7.7.1	Virtual Reality	169
7.7.2	Computer-augmented Reality	169
8	Multimedia Learning	173
8.1	Learning Software	174
8.2	The Role of the Computer	174
8.3	Types of Learning Software	175
8.3.1	Learning Software Programs.....	175
8.3.2	Learning Environments	175
8.4	Learning Theories.....	176
8.4.1	Behaviorism	176

8.4.2	Cognitivism	177
8.4.3	Constructivism	178
8.4.4	Integrating the Learning Theories	179
8.5	Trends and Current Developments	180
8.6	Learning with Hypermedia	180
8.7	Adaptive Learning Systems	182
8.7.1	Intelligent Tutorial Systems (ITS).....	182
8.7.2	Adaptive Hypermedia Systems (AHS).....	184
8.8	AHS Systems — an Overview	185
8.8.1	Adaptive Educational and Learning Systems.....	185
8.8.2	Other Adaptive Hypermedia Systems	186
8.9	Telelearning	188
8.10	Computer-supported Cooperative Learning	189
8.11	eLearning Standards	190
8.11.1	Standards Organizations.....	190
8.11.2	The Metadata Scheme LOM	191
8.12	Closing Remarks.....	195
9	Multimedia Applications.....	197
9.1	Media Preparation.....	198
9.2	Media Editing	199
9.3	Media Integration.....	201
9.4	Media Transmission.....	203
9.4.1	Interactive Services	204
9.4.2	Multimedia Distribution Services	205
9.5	Media Usage	205
9.5.1	Electronic Books and Magazines	206
9.5.2	Kiosks	206
9.5.3	Tele-Shopping	207
9.5.4	Entertainment	207
9.6	Case Study: i-LAND.....	209
9.6.1	Motivation	209
9.6.2	The Roomware Concept.....	210
9.6.3	The DynaWall	211
9.6.4	The InteracTable.....	211

9.6.5 The CommChair	212
9.6.6 Software for Creativity and Innovation.....	212
9.6.7 Dynamic Offices.....	213
9.6.8 The Role of Computers in i-LAND.....	213
9.7 Closing Remarks.....	214
Bibliography	215
Index.....	235

Multimedia Applications

Steinmetz, R.; Nahrstedt, K.

2004, XVI, 246 p., Hardcover

ISBN: 978-3-540-40849-9
