

Contents

1 Electric Scanning Probe Imaging and Modification of Ferroelectric Surfaces

S. V. Kalinin and D. A. Bonnell	1
1.1 SPM Imaging and Control of Ferroelectric Materials.....	1
1.2 Non-contact Electrostatic Imaging of Ferroelectric Surfaces.....	3
1.3 Contact Imaging and Polarization Dynamics	11
1.4 Simultaneous Acquisition of PFM and Potential Images.....	37
1.5 Conclusions.....	39

2 Challenges in the Analysis of the Local Piezoelectric Response

C. Harnagea and A. Pignolet	45
2.1 Introduction.....	45
2.2 Analysis of the First Harmonic Signal in Voltage Modulated SFM.....	47
2.3 Calibration of the Piezoresponse Signal	51
2.4 Local Measurements.....	53
2.5 Interpretation of the Piezoresponse Signal.....	55
2.6 Electric Field in the Sample.....	66
2.7 Influence of the Cantilever Elastic Properties and of the AC Probing Frequency on the Measurements.....	77
2.8 Conclusions.....	81

3 Electrical Characterization of Nanoscale Ferroelectric Structures

S. Tiedke and T. Schmitz	87
3.1 Introduction.....	87
3.2 P(V) Curve and Characteristic Values.....	88
3.3 Sample Preparation and Contacting.....	89
3.4 Suitable Measurement Methods	92
3.5 Measurement Results and Interpretation.....	98
3.6 Application to Memory Structures	108

4 Nanoscale Optical Probes of Ferroelectric Materials

J. Levy and O. Tikhomirov	115
4.1 Introduction.....	115
4.2 Overview of Optical Microscopy	115
4.3 History of Optical Probes of Ferroelectrics.....	118
4.4 Laser Techniques	120

4.5	Ferroelectric Physics from Optical Probes.....	121
4.6	Confocal Scanning Optical Microscopy	125
4.7	Near-Field Scanning Optical Microscopy.....	133
4.8	Future Directions.....	137
5	Scanning Nonlinear Dielectric Microscopy for Investigation of Ferroelectric Polarization	
Y. Cho.....		143
5.1	Introduction	143
5.2	Principle and Theory for SNDM.....	144
5.3	Higher Order Nonlinear Dielectric Microscopy	149
5.4	Three-Dimensional Measurement Technique	153
5.5	Tbit/inch ² Ferroelectric Data Storage Based on SNDM	155
5.6	Conclusions	161
6	Nanoscale Piezoelectric Phenomena in Epitaxial PZT Thin Films	
V. Nagarajan, A. Roytburd, and R. Ramesh.....		163
6.1	Introduction	163
6.2	Nonlinear Thermodynamic Theory	165
6.3	What Happens in Small Confined Dimensions? (Piezoelectric Measurements On Nanoscale Islands).....	172
6.4	Conclusions	189
7	Scanning Probe Microscopy of Ferroelectric Domains near Phase Transitions	
M. Abplanalp, M. Zgonik, and P. Günter		193
7.1	Introduction	193
7.2	Piezoresponse Scanning Force Microscopy	195
7.3	Ferroelectric Domains near Phase Transitions.....	201
7.4	Local Hysteresis Loops and Nanoscale Switching of Domains	210
7.5	Conclusions	218
8	Nanodomain Engineering in Ferroelectric Crystals Using High Voltage Atomic Force Microscopy	
Y. Rosenwaks, M. Molotskii, A. Agronin, P. Urenski, M. Shvebelman, and G. Rosenman.....		221
8.1	Introduction	221
8.2	Nanodomain Reversal in Ferroelectric Crystals Using High Voltage Atomic Force Microscopy.....	229
8.3	Piezoelectric Coefficient Measurements Using High Voltage Atomic Force Microscopy.....	246
8.4	Nanodomain Characterization Using Scanning Probe Microscopy	250
8.5	Summary and Conclusions	261

**9 Nanoinspection of Dielectric and Polarization Properties
at Inner and Outer Interfaces in PZT Thin Films**

L.M. Eng, S. Grafström, C. Loppacher, X.M. Lu , F. Schlaphof,
K. Franke, G. Suchaneck, and G. Gerlach 267

 9.1 Introduction..... 267

 9.2 Methods 268

 9.3 Materials 270

 9.4 Results 271

 9.5 Conclusions..... 276

Index..... 279

Nanoscale Characterisation of Ferroelectric Materials

Scanning Probe Microscopy Approach

Alexe, M.; Gruverman, A. (Eds.)

2004, XIII, 282 p., Hardcover

ISBN: 978-3-540-20662-0
