Preface .....	IX
<b>Introduction .....</b>	<b>3</b>
<b>1 Microstructure .....</b>	<b>5</b>
<b>2 Atomic Structure of Solids .....</b>	<b>13</b>
2.1 Atomic Bonding .....	13
2.2 Crystal Structure .....	20
2.2.1 Crystal Systems and Space Lattice .....	20
2.2.2 Crystal Structures of Metals .....	24
2.2.3 Crystal Structure of Ceramic Materials .....	30
2.2.4 Crystal Structure of Polymers .....	32
2.3 Indexing Crystallographic Planes and Directions .....	35
2.4 Representation of Orientations: Stereographic Projection .....	41
2.5 Experimental Crystallographic Methods .....	45
2.5.1 Bragg's law .....	45
2.5.2 X-ray Methods .....	46
2.5.3 Electron Microscopy .....	53
2.5.4 Crystallographic Textures .....	55
<b>3 Crystal Defects .....</b>	<b>63</b>
3.1 Overview .....	63
3.2 Point Defects .....	63
3.2.1 Types of point defects .....	63
3.2.2 Thermodynamics of point defects .....	65
3.2.3 Experimental evidence of point defects .....	68
3.3 Dislocations .....	71
3.3.1 Geometry of dislocations .....	71
3.3.2 Evidence of dislocations .....	78
3.4 Grain Boundaries .....	82

3.4.1	Terminology and Definitions . . . . .	82
3.4.2	Atomic Structure of Grain Boundaries . . . . .	84
3.4.2.1	Low angle grain boundaries . . . . .	84
3.4.2.2	High angle grain boundaries . . . . .	87
3.5	Phase Boundaries . . . . .	98
3.5.1	Classification of Phase Boundaries . . . . .	98
3.5.2	Phenomenological Characterization of Phase Boundaries	102
<b>4</b>	<b>Alloys . . . . .</b>	<b>107</b>
4.1	Constitution of Alloys . . . . .	107
4.2	Thermodynamics of Alloys . . . . .	121
4.3	Solid Solutions . . . . .	125
4.4	Intermetallic Compounds . . . . .	133
4.4.1	Overview . . . . .	133
4.4.2	Ordered Solid Solutions . . . . .	134
4.4.3	Compound Phases . . . . .	142
4.4.4	Phases with High Packing Density . . . . .	144
4.4.5	Electronic Phases (Hume-Rothery-phases) . . . . .	148
4.5	Multicomponent Systems . . . . .	151
<b>5</b>	<b>Diffusion . . . . .</b>	<b>155</b>
5.1	Phenomenology and Basic Laws . . . . .	155
5.2	The Diffusion Constant . . . . .	162
5.3	Atomistics of Solid State Diffusion . . . . .	165
5.4	Correlation Effects . . . . .	176
5.5	Chemical Diffusion . . . . .	179
5.6	Thermodynamic factor . . . . .	183
5.7	Grain Boundary Diffusion . . . . .	186
5.8	Diffusion in Nonmetals: Ionic Conductors . . . . .	190
<b>6</b>	<b>Mechanical Properties . . . . .</b>	<b>197</b>
6.1	Basic Elements of Elasticity . . . . .	197
6.2	The Flow Curve . . . . .	202
6.3	Mechanisms of Plastic Deformation . . . . .	210
6.3.1	Crystallographic Slip by Dislocation Motion . . . . .	210
6.3.2	Mechanical Twinning . . . . .	220
6.4	The Critical Resolved Shear Stress . . . . .	226
6.4.1	Schmid's Law . . . . .	226
6.4.2	Dislocation Model of the Critically Resolved Shear Stress . . . . .	230
6.4.2.1	Elastic Properties of Dislocations . . . . .	230
6.4.2.2	Interaction of dislocations . . . . .	235
6.4.3	Thermally Activated Dislocation Motion . . . . .	237
6.5	Strain Hardening of fcc Single Crystals . . . . .	241
6.5.1	Geometry of Deformation . . . . .	241

6.5.2	Dislocation Models of Strain Hardening .....	245
6.5.3	Dissociation of Dislocations .....	252
6.6	Strength and Deformation of Polycrystals .....	257
6.7	Strengthening Mechanisms .....	264
6.7.1	Solid Solution Hardening .....	264
6.7.2	Dispersion Hardening .....	271
6.7.3	Precipitation Hardening .....	274
6.8	Time Dependent Deformation .....	278
6.8.1	Strain Rate Sensitivity of Flow Stress: Superplasticity ..	278
6.8.2	Creep .....	281
6.8.3	Anelasticity and Viscoelasticity .....	288
<b>7</b>	<b>Recovery, Recrystallization, Grain Growth .....</b>	<b>303</b>
7.1	Phenomena and Terminology .....	303
7.2	Energetics of Recrystallization .....	308
7.3	Deformation Microstructure .....	312
7.4	Recovery .....	316
7.5	Nucleation .....	321
7.6	Grain Boundary Migration .....	327
7.7	Kinetics of Primary Recrystallization .....	330
7.8	The Recrystallization Diagram .....	335
7.9	Recrystallization in Homogeneous Alloys .....	337
7.10	Recrystallization in Multiphase Alloys .....	338
7.11	Normal Grain Growth .....	341
7.12	Discontinuous Grain Growth (Secondary Recrystallization) ..	347
7.13	Dynamic Recrystallization .....	348
7.14	Recrystallization Textures .....	350
7.15	Recrystallization in Nonmetallic Materials .....	356
<b>8</b>	<b>Solidification .....</b>	<b>357</b>
8.1	The liquid state .....	357
8.2	Nucleation of the Solid State .....	360
8.3	Crystal Growth .....	367
8.3.1	Shape of a crystal .....	367
8.3.2	Atomistics of Crystal Growth .....	369
8.3.3	Crystal growth in the melt .....	371
8.3.3.1	Solidification of pure metals .....	371
8.3.3.2	Solidification of alloys .....	373
8.3.3.3	Solidification of eutectic alloys .....	376
8.4	Microstructure of a Cast Ingot .....	378
8.5	Solidification Defects .....	380
8.6	Rapid Solidification of Metals and Alloys .....	382
8.7	Solidification of Glasses and Polymers .....	385
8.7.1	Ionic crystals and glasses .....	385
8.7.2	Polymers .....	386

<b>9</b>	<b>Solid State Phase Transformations</b>	<b>389</b>
9.1	Pure Metals	389
9.2	Alloys	389
9.2.1	Diffusion Controlled Phase Transformations	389
9.2.1.1	General classification	389
9.2.1.2	Thermodynamics of decomposition	390
9.2.1.3	Nucleation and spinodal decomposition	396
9.2.1.4	Metastable phases	401
9.2.1.5	Age hardening	403
9.2.1.6	Growth kinetics of precipitates	407
9.2.1.7	Eutectoid decomposition and discontinuous precipitation	411
9.2.2	Martensitic Transformations	413
9.2.3	Applications	419
9.2.3.1	TTT diagrams	419
9.2.3.2	Technological importance of martensite transformations: some examples	419
<b>10</b>	<b>Physical Properties</b>	<b>423</b>
10.1	Fundamentals of Electron Theory	423
10.2	Mechanical and Thermal Properties	430
10.3	Thermal Conductivity	436
10.4	Electrical Properties	439
10.4.1	Conductors, semi-conductors and insulators	439
10.4.2	Conductivity of metals	443
10.4.3	Modeling of the Electrical Conductivity	446
10.4.4	Superconductivity	452
10.5	Magnetic Properties	457
10.5.1	Dia- and paramagnetism	457
10.5.2	Ferromagnetism	459
10.6	Optical Properties	466
10.6.1	Light	466
10.6.2	Reflection of metallic surfaces	468
10.6.3	Insulators	468
10.6.3.1	Color	468
10.6.3.2	Absorption	470
10.6.3.3	Photoconductivity	471
10.6.3.4	Luminescence	472
10.6.4	Applications	473
	References	475
	Specific Literature	483
	Index	487
