

The European Physical Journal A

Volume 18 • Number 2-3 • October-November • 2003

■ Preface

- 167 A.P. Szczepaniak
A possible interpretation of the $\pi_1(1400)$ exotic meson

■ Structure and Spectroscopy of Hadrons

- 129 K.S. Kumar
Status and plans for neutral weak form factors measurements
- 135 U. Thoma
Scalar mesons and the search for the 0^{++} glueball
- 141 C.N. Papanicolas
**Nucleon deformation
A status report**
- 147 K.R. Schubert
CP violation in B-meson decays
- 155 R.F. Wagenbrunn et al.
Relativistic study of nucleon electroweak properties in a constituent-quark model
- 159 S. Baunack and the A4 Collaboration
**Parity-violating electron scattering at MAMI
Strangeness in the nucleon**
- 163 V. Credé
Baryon spectroscopy with the CB-ELSA detector at ELSA
- 171 E. Doroshkevich et al.
Study of baryon and search for dibaryon resonances by the $pp \rightarrow pp\pi^+\pi^-$ reaction
- 177 J. Ritman
Antiproton physics at GSI: Studying the physics of hadronic matter
- 181 T. Reichelt et al.
The Jefferson Laboratory E93-038 Collaboration
Measurement of the neutron electric form factor via recoil polarimetry
- 185 C. García-Recio et al.
 $S = -1$ meson-baryon scattering in coupled-channel unitarized Chiral Perturbation Theory
- 189 B. Metsch et al.
The spectrum and strong decays of baryons in a relativistic quark model
- 193 D. Merten et al.
Electromagnetic properties of baryons in a relativistic quark model
- 197 F.P. Sassen et al.
t-dependence of pion production in $\pi^-p \rightarrow \pi^0\pi^0n$

■ QCD-Inspired Quark Models of Hadrons and Nuclei

- 201 D.O. Riska
Nuclear forces and currents in large- N_c QCD
- 207 V.Yu. Grishina et al.
Polarization observables in high-energy deuteron photo-disintegration within the Quark-Gluon Strings Model
- 211 C.G. Strouthos
Phase diagram of the three-dimensional NJL model
- 215 A.E. Dorokhov and I.O. Cherednikov
Nonperturbative contribution to the quark form factor within the instanton model
- 219 S. Leupold
Determination of vector meson properties by matching resonance saturation to a constituent quark model
- 223 G. Martens et al.
Chromofields of strings and baryons

■ Effective Theories

- 227 B.R. Holstein
Effective effective interactions
- 231 P. Maris et al.
Facets of confinement and dynamical chiral symmetry breaking
- 237 H. Merkel
Experimental tests of Chiral Perturbation Theory

■ Lattice Gauge Theories

- 241 A.W. Thomas et al.
Recent developments in quark nuclear physics
- 247 D.B. Leinweber et al.
FLIC fermions and hadron phenomenology
- 253 K. Jansen
Lattice calculations
- 257 C. Michael
Beyond the quark model of hadrons from lattice QCD
- 261 R. Alkofer et al.
Infrared exponents and the running coupling of Landau gauge QCD and their relation to confinement
- 265 F. Frömel et al.
Spectral functions of quarks in quark matter
- 269 W. Detmold et al.
Moments of isovector quark distributions in lattice QCD

■ Soft and Hard Hadronic Processes

- 273 A.R. Dzierba
**Mapping gluonic excitations and confinement
The GlueX/Hall D project at Jefferson Lab**
- 277 T. Johansson
Meson production at CELSIUS

- 283 T. Nagae
Progress in hypernuclear physics
- 289 V.R. Brown et al.
Parity non-conservation in proton-proton elastic scattering
- 293 K. Hatanaka et al.
pd scattering at 250 MeV and three-nucleon forces
- 297 E. Doroshkevich et al.
Experiments on the search for the NN-decoupled $NN\pi$ -resonance d'
- 301 I.R. Afnan and A.D. Lahiff
The Bethe-Salpeter equation and the Low Energy Theorems for πN scattering
- 305 A.M. Gasparyan et al.
Exclusive and semi-inclusive strangeness and charm production in πN and NN reactions
- 309 T.S. Belozerova and V.K. Henner
Coupled-channel analysis of isoscalar f_0 -mesons in $\bar{N}N$ annihilation and $\pi\pi$ scattering
- 313 A.Yu. Illarionov et al.
Probing the deuteron structure at small N-N distances by cumulative pion production
- 317 Yu.N. Uzikov et al.
Short-range NN properties in the processes $pd \rightarrow dp$ and $pd \rightarrow (pp)n$
- 321 I. Seluzhenkov et al.
Charge “asymmetry” from the isospin symmetry in $pp \rightarrow pp\pi^+\pi^-$
- 323 W. Oelert
Hadronic threshold reactions
- 327 S.D. Bass
Manifestations of anomalous glue: Light-mass exotic mesons and $g_{\eta'NN}$
- 331 I. Fröhlich et al.
Exclusive η production in pp reactions
- 335 P. Moskal et al.
Eta physics at threshold
- 339 P. Fedorets and V. Kleber
Investigation of the $a_0^+(980)$ -resonance with ANKE
- 343 E. Oset et al.
Chiral dynamics in the $pp \rightarrow dK^+\bar{K}^0$ and $pp \rightarrow d\pi^+\eta$ reactions
- 347 W. Schroeder
Hyperon production in proton-proton collisions at the time-of-flight spectrometer COSY-TOF
- 351 P. Kowina et al.
Associated strangeness production at threshold
- 355 P. Winter et al.
First close-to-threshold measurement of the analysing power A_y in the reaction $\bar{p}p \rightarrow pp\eta$
- 359 C. Hanhart
Aspects of a_0^0 - f_0 mixing in the reaction $pn \rightarrow dX$
- 363 H. Toki et al.
Surface pion condensation in finite nuclei
- 367 S. Abdel-Samad et al.
Study of $p + d \rightarrow {}^3A + \pi$ reactions in the Δ -resonance region

■ Soft and Hard Electroweak Processes

- 371 R.A. Schumacher
Strangeness production and other recent results from Hall B at Jefferson Lab
- 377 G. van der Steenhoven
The (spin) structure of the nucleon
- 383 B. Foster
HERA results on the structure of the proton
- 389 M. Garçon
An introduction to the Generalized Parton Distributions
- 395 J.-C. Peng
Flavor structure of the nucleon sea
- 401 P. Pedroni
Helicity dependence of the γN interaction and the GDH sum rule
- 405 S. Schadmand
Photon-induced reactions
- 409 F. Ronchetti
Deuteron photodisintegration at high energy
- 413 H. Xiang
Measurement of π^- and π^+ photoproduction in deuterium at large momentum transfer for $E = 1.7\text{--}5.6\text{ GeV}$
- 417 J.G. Messchendorp
 $\pi\pi$ correlations in $\gamma + A$ reactions

- 421 S. Schneider et al.
 ηN final-state interaction in incoherent photoproduction of η -mesons from the deuteron
- 425 J.W. Martin
Prospects for measurements of parity-violating photoproduction of π^\pm
- 429 M. Vanderhaeghen
Generalized parton distributions
- 433 S.M. Eliseev
Deep inelastic scattering of leptons on nuclei: Hadron formation, cumulative particles production
- 437 I.P. Ivanov et al.
High-density QCD and saturation of nuclear partons
- 441 J. Stewart
Measurement of the polarized parton distribution functions at HERMES
- 445 A. Szczurek and J. Speth
Perturbative versus nonperturbative effects at medium energies in the $\gamma\gamma \rightarrow \pi^+\pi^-$ reaction
- 449 A.I. Signal and F.G. Cao
Parton symmetries and the NuTeV anomaly

■ Medium Modifications of Hadrons

- 453 J. Wambach
Hadrons in dense and hot matter
- 459 R. Rapp
Hadrons in hot and dense matter

463 M. Ericson and G. Chanfray
Scalar and pseudoscalar QCD susceptibilities in nuclei

467 W. Cassing
Transport analysis of in-medium hadron effects in pA and AA collisions

471 M. Beyer
Few-body correlations in the QCD phase diagram

475 A. Sibirtsev
Hadrons with charmed quarks in matter

479 M.J. Vicente Vacas
Experimental signals of σ -mesons in nuclei and chiral symmetry

483 E.F. Lütz et al.
Naturalness of nonlinear σ , ω self-couplings in relativistic mean-field models for neutron stars

487 Ulf-G. Meißner
Some recent results in baryon chiral perturbation theory

491 A. Rusetsky
Including virtual photons in strong interactions

495 B. Moussallam
Electromagnetic corrections in the anomaly sector and the π^0 lifetime

499 E. Epelbaum et al.
Quark mass dependence of the nuclear forces

503 V. Bernard et al.
Moments of polarized parton distribution functions

507 A. Wirzba et al.
In-medium chiral perturbation theory

511 G. Krein
Chiral-symmetry restoration in clustered hadronic matter

■ Matter under Extreme Conditions and Quark-Gluon Plasma

515 B.V. Jacak
Exploring superdense matter at RHIC

521 J.P. Wessels
Electron-positron pairs as a probe for hadrons in dense matter

527 A.H. Mueller
Saturation in small-x and heavy-ion physics

531 T. Barnes
Charmonium cross-sections and the QGP

537 Z. Rudy et al.
Properties of hot residual nuclei produced in pA reactions

■ Heavy-Quark Physics

541 M. Jezabek
**Heavy-quark physics
Recent developments and old problems**

543 Ulf-G. Meißner and S. Gardner
Chiral dynamics and $B \rightarrow 3\pi$ decay

547 D. Blaschke et al.
Mott effect and J/ψ dissociation at the quark-hadron phase transition

551 P. Urban
Gluonic penguin contribution to $B \rightarrow \pi\pi$ decays

555 H. Rohdjeß et al.
Cross-sections and spin observables in proton-proton elastic scattering: Results from EDDA at COSY

559 H. Weigel
Flavor symmetry breaking and strangeness in the nucleon

563 K.K. Seth
Experimental review of charmonium spectroscopy

567 R.G. Milner
Summary talk

■ **Editorial**

The Publishing Policy of the European Physical Journal A

Refereed and selected contributions from International
Conference on Quark Nuclear Physics

QNP2002. June 9-14, 2002. Jülich, Germany

Elster, C.; Speth, J.; Walcher, Th. (Eds.)

2004, XIII, 440 p., Hardcover

ISBN: 978-3-540-20661-3
