
Contents

1 The Holocene: Considerations with Regard to its Climate and Climate Archives	
<i>Jörg F. W. Negendank</i>	1
2 Nonlinear Dynamics of the Climate System	
<i>Klaus Dethloff, Annette Rinke, Dörthe Handorf, Antje Weisheimer, Wolfgang Dorn</i>	13
3 A Discourse About Quasi-realistic Climate Models and Their Applications in Paleoclimatic Studies	
<i>Hans von Storch</i>	43
4 Holocene Climate Variability from Model Simulations – State of the Art	
<i>Eva Bauer and Dörthe Handorf</i>	57
5 Marine Paleoclimatology – Motivation, Tools, and Results	
<i>Bert Rein</i>	77
6 Corals as Climate Archive	
<i>Thomas Felis and Jürgen Pätzold</i>	91
7 Annually Laminated Lake Sediments and Their Palaeoclimatic Relevance	
<i>Achim Brauer</i>	109
8 Interpreting Climate Proxies from Tree-rings	
<i>Gerhard Helle and Gerhard H. Schleser</i>	129
9 The Environmental and Climate Record in Polar Ice Cores	
<i>Hubertus Fischer</i>	149

10 Reconstructing Large-scale Variability from Palaeoclimatic Evidence by Means of Data Assimilation Through Upscaling and Nudging (DATUN) <i>Julie M. Jones and Martin Widmann</i>	171
11 Mid- to Late Holocene Lake Ecosystem Response to Catchment and Climatic Changes – A Detailed Varve Analysis of Lake Holzmaar (Germany) <i>Janina Baier, Jörg F. W. Negendank and Bernd Zolitschka</i>	195
12 Holocene Palaeoclimate in the Saharo–Arabian Desert <i>Sushma Prasad and Jörg F. W. Negendank</i>	209
13 Transfer Functions for Paleoclimate Reconstructions – Theory and Methods <i>Thomas Kumke, Christian Schölzel and Andreas Hense</i>	229
14 Transfer Functions for Paleoclimate Reconstructions – Applications <i>Thomas Kumke, Andreas Hense, Christian Schölzel, Andrei A. Andreev, Cathrin Brüchmann, Christoph Gebhardt, Gerhard Helle, Ulrike Kienel, Norbert Kühl, Thomas Litt, Frank Neumann, Gerhard Schleser</i>	245
15 Climate Information from Stable Hydrogen and Carbon Isotopes of C₃ Plants – Growth Chamber Experiments and Field Observations <i>Christoph Mayr, Peter Trimborn, Josef Lipp, Thorsten E. E. Grams, Wolfgang Graf, Hans-Dieter Payer and Willibald Stichler</i>	263
16 Detection of Climate Modes as Recorded in a Seasonal-resolution Coral Record Covering the Last 250 Years <i>Norel Rimbu, Gerrit Lohmann, Thomas Felis, Jürgen Pätzold</i>	281
17 Phase Stability of the Solar Schwabe Cycle in Lake Holzmaar, Germany, and GISP2, Greenland, between 10,000 and 9,000 cal. BP <i>Heinz Vos, Cathrin Brüchmann, Andreas Lücke, Jörg F. W. Negendank, Gerhard H. Schleser and Bernd Zolitschka</i>	293
18 Variable Freshwater Input to the Arctic Ocean During the Holocene: Implications for Large-Scale Ocean-Sea Ice Dynamics as Simulated by a Circulation Model <i>Matthias Prange and Gerrit Lohmann</i>	319
19 Forced Climate Variability During the Last Millennium with the Earth System Model CLIMBER-2 <i>Eva Bauer, Martin Claußen, Anja Hünerbein and Victor Brovkin</i>	337

20 The Contribution of High-resolution Magnetostratigraphic Analyses to Paleoclimatic Reconstructions	
<i>Norbert R. Nowaczyk, Ute Frank, Jens Mingram, Gergana Yancheva, Liu Jaqui and Jörg F. W. Negendank</i>	351
21 Internal Climate Variability in Global and Regional Climate Models	
<i>Dörthe Handorf, Wolfgang Dorn, Klaus Dethloff, Annette Rinke, Antje Weisheimer</i>	365
22 Climate Diagnostics by Adjoint Modelling: A Feasibility Study	
<i>Simon Blessing, Klaus Fraedrich and Frank Lunkeit</i>	383
23 Evidence for the Climate During the Late Maunder Minimum from Proxy Data and Model Simulations Available Within KIHZ	
<i>KIHZ-Consortium: Jens Zinke, Hans von Storch, Beate Müller, Eduardo Zorita, Bert Rein, Birgit Mieding, Heinz Miller, Andreas Lücke, Gerhard H. Schleser, Markus J. Schwab, Jörg F. W. Negendank, Ulrike Kienel, Jesus Fidel González-Rouco, Wolf-Christian Dullo and Anton Eisenhauer</i>	397

The Climate in Historical Times

Towards a Synthesis of Holocene Proxy Data and
Climate Models

Fischer, H.; Kumke, Th.; Lohmann, G.; Miller, H.;
Negendank, J. (Eds.)

2004, XXI, 487 p. 157 illus., 10 illus. in color., Hardcover

ISBN: 978-3-540-20601-9
