A. Advances

Disorders of Consciousness: Anatomical and Physiological Mechanisms. J. L. VALATX, I.N.S.E.R.M. U480, Claude Bernard University, Lyon, France

Abstract 3
Introduction 4
The Wake-Sleep Cycle 4
  Phenomenology 5
  Regulation 6
Wakefulness Network 8
  The Posterior Hypothalamus 11
    Histamine Network 11
    Orexin/Hypocretin Network 12
  Brainstem Acetylcholine and Amine Networks 14
  The Serotonin System 15
Tentative Functions of the Wake System 15
    Effect of Sleep Deprivation on Cognitive Performances 17
References 18

Advances in Craniosynostosis Research and Management. J. GUIMARÃES-FERREIRA[1], J. MIGUÉNS[2], and C. LAURITZEN[3], [1] Departments of Human Anatomy and Plastic Surgery, University of Lisbon School of Medicine, Lisbon, Portugal [2] Department of Neurosurgery, University of Lisbon School of Medicine, Lisbon, Portugal [3] Head, Craniofacial Unit, Department of Plastic Surgery, Sahlgrenska University Hospital, Göteborg, Sweden

Abstract 24
Introduction 24
Normal Craniofacial Embryology and Growth 25
Aetiology, Pathogenesis and Function 27
Classification and Diagnosis 34

Evolution of Surgical Treatment 35
Recent Advances..... 39
Molecular Studies 39
Imaging Techniques and Surgical Planning..... 39
Resorbable Fixation..... 40
Bone Substitutes and Tissue Engineering 41
Distraction Osteogenesis and the Spring-Mediated Cranioplasties..... 43
Resorbable Distractor Devices..... 46
Minimally Invasive Surgery..... 47
In Utero Surgery 48
Surgical Techniques..... 48
Sagittal Synostosis..... 49
Unicoronal Synostosis..... 50
Metopic Synostosis..... 56
Unilambdoid Synostosis..... 58
Bicoronal Synostosis 60
Saethre-Chotzen Syndrome 62
Crouzon and Pfeiffer Syndromes..... 62
Apert Syndrome..... 63
References..... 66

B. Technical Standards

Preoperative Clinical Evaluation, Outline of Surgical Technique and Outcome in Temporal Lobe Epilepsy. A. IMMONEN[1], L. JUTILA[2], R. KÄLVIÄINEN[2], E. MERVAALA[3], K. PARTANEN[4], J. PARTANEN[3], R. VANNINEN[4], A. YLINEN[5], I. ALAFUZOFF[6], L. PALJÄRVI[6], H. HURSKAINEN[1], J. RINNE[1], M. PURANEN[4], and M. VAPALAHTI[1], [1]Department of Neurosurgery, Kuopio University Hospital, Kuopio, Finland, [2]Department of Neurology, Kuopio University Hospital, Kuopio, Finland, [3]Department of Clinical Neurophysiology, Kuopio University Hospital, Kuopio, Finland, [4]Department of Clinical Radiology, Kuopio University Hospital, Kuopio, Finland, [5]Department of Neuroscience and Neurology, University of Kuopio, Kuopio, Finland, [6]Department of Clinical Pathology, Kuopio University Hospital, Kuopio, Finland

Abstract..... 88
Introduction..... 89
Epidemiology of Temporal Lobe Epilepsy (TLE) 89
Etiology and Pathology of TLE..... 90
Temporal Lobe Seizure Symptomatology..... 91
Mesial TLE..... 92
Neocortical TLE 92
Selection of Candidates for Preoperative Assessment..... 92

Neuropsychological Evaluation in TLE 93
WADA Test 94
Magnetic Resonance Imaging (MRI) in TLE 95
Volumetry 96
NMR-Spectroscopy 97
Lesions in MRI 98
Functional MRI 98
EEG-Videotelemetry in TLE 101
Interictal EEG 101
Diagnostic EEG-Videotelemetry 101
Intracranial EEG-Monitoring in TLE 102
Indications for Intracranial EEG 102
Intracranial EEG-Recording in Videotelemetry 102
Surgical Technique for Inserting the Electrodes 103
Complications of Invasive EEG-Monitoring 104
Functional Imaging in TLE 106
Positron Emission Tomography, PET 107
Single Photon Emission Computed Tomography, SPECT 109
Magnetoencephalography, MEG 110
Indications for Surgery in TLE 111
Surgery in Patients with Temporal Lobe Lesions 112
Technique of Tailored Temporal Lobe Resection with Amygdalo-Hippocampectomy 113
Peroperative Electrocorticography 117
Outcome of Surgery with Respect to Seizures 119
Complications 121
Conclusions 123
Acknowledgement 124
References 124

Motor Evoked Potential Monitoring for Spinal Cord and Brain Stem Surgery. F. Sala, P. Lanteri, and A. Bricolo, Department of Neurological Sciences and Vision, Section of Neurosurgery, University of Verona

Abstract 134
Introduction 134
Part I: Intraoperative Neurophysiological Techniques 135
The Past 135
Historical Background on MEP Monitoring 135
Misconceptions about MEP Monitoring 137
The Present 138
MEP Monitoring Techniques for Spinal Cord and Brainstem Procedures 138
Transcranial Electrical Stimulation of the Motor Cortex and Muscle Recordings (Multipulse Technique) 139

Transcranial Electrical Stimulation of the Motor Cortex and Epidural Recordings (Single Pulse Technique) 140
Mapping of the Corticospinal Tract During Brainstem Procedures ... 142
The "Future" 143
Mapping of the Corticospinal Tract During Spinal Cord Procedures: The Collision Technique 143
Monitoring of the Corticobulbar Tracts 144
Part II: Clinical Application 148
Correlation Between Intraoperative MEP Recordings and Post-Operative Motor Outcome 148
How to Avoid Irreversible MEP Loss 149
Warning Signals 150
Corrective Measures for the Management of Deteriorating Signals ... 152
Dose MEP Monitoring Really Make a Difference? 153
Illustrative Cases 153
Conclusions 161
References 165
Acknowledgments 165

Motor Evoked Potential Monitoring for the Surgery of Brain Tumours and Vascular Malformations. G. NEULOH and J. SCHRAMM, Department of Neurosurgery, University of Bonn, Germany

Abstract 172
Introduction 173
Direct Stimulation Mapping 173
Evoked Potentials 174
Motor Evoked Potentials 175
MEP Technique 176
Stimulation 177
Recording 183
Safety and Anesthesia 184
Equipment and Staffing 186
Neurophysiological Functional Mapping of the Pericentral Cortex 188
SEP Phase Reversal 189
Intraoperative Stimulation Mapping 193
Extraoperative Mapping with Grid Electrodes 195
Principles of Clinical Application 196
Indications for MEP Monitoring 196
Interpretation of MEP Changes 197
Correlation of Intraoperative MEP Changes and Motor Outcome 198
Surgical Reactions to MEP Changes 200
Influence of MEP Monitoring on Surgical Results and Outcome 201
Specific Applications 202
Supratentorial Tumors and Vascular Malformations 202

Central Tumors and AVMs 203
Insular Tumors and Sylvian AVMs 204
Infratentorial Surgery 208
Indications for MEP Monitoring 208
Impact on Surgical Strategy 208
Clinical Experience with MEP Monitoring for Infratentorial Surgery 208
Aneurysms 211
SEP Monitoring for Aneurysm Surgery 211
Conduction of MEP Monitoring for Aneurysm Surgery 212
Clinical Experience 212
Clinical Relevance of Aneurysm Monitoring 213
Summary and Conclusions 213
Why MEP Monitoring? 213
When to Perform MEP Monitoring? 217
How to Achieve Good MEP Monitoring? 217
How to Assess and Interpret MEPs? 218
Does MEP Monitoring Influence Surgical Strategy and Postoperative Outcome? 218
References 219

Functional Neuronavigation and Intraoperative MRI. C. NIMSKY, O. GANSLANDT, and R. FAHLBUSCH, Department of Neurosurgery, University Erlangen-Nürnberg, Erlangen, Germany

Abstract 229
Introduction 230
Functional Neuronavigation 231
Magnetoencephalography 232
Functional MRI 233
Clinical Impact of Functional Imaging 234
Comparing MEG/fMRI 234
Intraoperative Imaging 237
Low-Field MR Imaging 237
Clinical Experience 238
Pituitary Tumour Surgery 239
Glioma Surgery 240
Epilepsy Surgery 242
Limitations and Imaging Alternatives 242
High-Field MR Imaging 244
Integration of a High-Field Scanner into the Operating Room 245
First Clinical Results 247
Summary & Future Developments 248
Acknowledgments 254

Surgical Anatomy of the Insula. M. GUENOT[1], J. ISNARD[2], and M. SINDOU[1], [1] Department of Functional Neurosurgery, Hôpital Neurologique, P. Wertheimer, University of Lyon, France, [2] Department of Functional Neurology and Epileptology, Hôpital Neurologique P. Wertheimer, University of Lyon, France

Summary 265
Introduction 266
Descriptive Anatomy [33, 39] 269
The Borders of the Insula 269
The Insular Cortex (Fig. 7) 270
Relationships (Figs. 8–12) 272
The Association Fibers 273
Short Association Fibers 273
Long Ipsihemispheric Association Fascicles 273
Vascular Anatomy (Figs. 13–15) 274
Arterial Relationships 277
Veins 278
Functional Anatomy 278
Connections (Fig. 17) [1, 17, 18] 278
Physiological Roles of the Insula [1–3, 13, 14, 22, 23, 27] 280
Insula and Pain 281
The Insula and Epilepsy Surgery 283
Tumoral Surgery in the Insular Region 283
Conclusion 285
