Invited papers

Grossmann W., Schimek M.G., Sint P.P., The history of COMPSTAT and key-steps of statistical computing during the last 30 years	1
Ali A.A., Jansson M., Hybrid algorithms for construction of <i>D</i> -efficient designs	37
Amari S., Park H., Ozeki T., Geometry of learning in multilayer perceptrons	49
Braverman A., Kahn B., Visual data mining for quantized spatial data	61
Carr D.B., Sung M.-H., Graphs for representing statistics indexed by nucleotide or amino acid sequences	73
Chen, C. H. et al., Matrix visualization and information mining	85
Cramer K., Kamps U., Zuckschwerdt C., st-apps and 101	
Critchley F. et al., The case sensitivity function approach to diagnostic and robust computation: A relaxation strategy	113
Cuevas A., Fraiman R., On the bootstrap methodology for functional data	127
Deistler M., Ribarits T., Hanzon B., A novel approach to parametrization and parameter estimation in linear dynamic systems	137
Fung W.K. et al., Statistical analysis of handwritten Arabic numerals in a Chinese population	149
Gather U., Fried R., Methods and algorithms for robust filtering	159
Gentleman R., Using GO for statistical analyses	171
Ghosh S., Computational challenges in determining an optimal design for an experiment	181
Groos J., Kopp-Schneider A., Visualization of parametric carcinogenesis models	189
Heinzel H., Mittlboeck M., Design aspects of a computer simulation study for assessing uncertainty in human lifetime toxicokinetic models	199

Held L., Simultaneous inference in risk assessment; a Bayesian perspective	213
Hofmann H., Interactive biplots for visual modelling	223
Hornik K., R: The next generation	235
House L.L., Banks D., Robust multidimensional scaling	251
Høy M., Westad F., Martens H., Improved jackknife variance estimates of bilinear model parameters	261
Huh M.Y., Line mosaic plot: Algorithm and implementation	277
Kafadar K., Wegman E.J., Graphical displays of Internet traffic data	287
Kiers H.A.L., Clustering all three modes of three-mode data: Computational possibilities and problems	303
Kneip A., Sickles R.C., Song W., Functional data analysis and mixed effect models	315
Martinez A.R., Wegman E.J., Martinez W.L., Using weights with a text proximity matrix	327
Min W., Tsay R.S., On canonical analysis of vector time series	339
Neuwirth E., Learning statistics by doing or by describing: The role of software	351
Ostrouchov G., Samatova N.F., Embedding methods and robust statistics for dimension reduction	359
Peña D., Rodríguez J., Tiao G.C., A general partition cluster algorithm	371
Priebe C.E. et al., Iterative denoising for cross-corpus discovery	381
Ramsay J.O., From data to differential equations	393
Riani, M., Atkinson A., Simple simulations for robust tests of multiple outliers in regression	405
Saporta G., Bourdeau M., The St@tNet project for teaching statistics	417
Schimek M.G., Schmidt W., An automatic thresholding approach to gene expression analysis	429
Schölkopf B., Kernel methods for manifold estimation	441
Scott D.W., Outlier detection and clustering by partial mixture modeling	453
Shibata R., InterDatabase and DandD	465

Swayne D.F., Buja A., Exploratory visual analysis of graphs in GGobi	477
Tenenhaus M., PLS regression and PLS path modeling for multiple table analysis	489
Theus M., 1001 graphics	501
Torsney B., Fitting Bradley Terry Models using a multiplicative algorithm	513
Tunnichliffe-Wilson G., Morton A., Modelling multiple time series: Achieving the aims	527
Van Huffel S., Total least squares and errors-in-variables modeling: Bridging the gap between statistics, computational mathematics and engineering	539

Contributed papers (on CD)

Achcar J.A., Martinez E.Z., Louzada-Neto F., Binary data in the presence of misclassifications	557
Adachi K., Multiple Correspondence spline analysis for graphically representing nonlinear relationships between variables	565
Almeida R. et al., Modelling short term variability interactions in ECG: QT versus RR	573
Amendola A., Niglio M., Vitale C., The threshold ARMA model and its autocorrelation function	581
Araki Y., Konishi S., Imoto S., Functional discriminant analysis for microarray gene expression data via radial basis function networks	589
Arhipov S., Fractal peculiarities of birth and death	597
Arhipova I., Balina S., The problem of choosing statistical hypotheses in applied statistics	605
Arteche J., Reducing the bias of the log-periodogram regression in perturbed long memory series	613
Bartkowiak A., Distal points viewed in Kohonen's self-organizing maps	623
Bastien P., PLS-Cox model: Application to gene expression	631
Bayraksan G., Morton D.P., Testing solution quality in stochastic programming: A single replication procedure	639

Beran R., Low risk fits to discrete incomplete multi-way layouts.....	647
Bertail P., Cl��men��on S., Approximate regenerative block-bootstrap for Markov chains.....	655
Betinec M., Two measures of credibility of evolutionary trees	665
Biffignandi S., Pisani S., A statistical database for the trade sector: A prototype of a new data collection tool.....	673
