
Contents

1	Introduction	1
1.1	A Brief Overview	1
1.2	Objective of the Thesis	2
1.3	Structure of the Thesis	4
2	Equivalence-Scale Measurement	7
2.1	Expert Approaches	7
2.1.1	Literature Survey	7
2.1.2	Evaluation	9
2.2	Economic Approaches	9
2.2.1	Demand Theory	9
2.2.2	Literature Survey	11
2.2.3	Evaluation	17
2.3	Survey Approaches	20
2.3.1	Consensual Approach	21
2.3.2	Subjective Approach	25
3	The Potential Dependence of Equivalence Scales on Income	39
3.1	Plausibility of Constant Equivalence Scales	40
3.2	Empirical Picture	42
3.3	Conclusion	43
4	Equivalence Scales, Employment and Household Production	45
4.1	The Earnings-Capacity Argument	46
4.2	The Household-Production Argument	47
4.3	Conclusion	49
5	A New Consensual Approach	51
5.1	Introduction	51
5.2	The New Survey Design	52
5.3	On the Choice of Income as an Indicator of Well-Being	53

VIII Contents

5.4	Validity and Reliability: Test Methods	53
5.4.1	Validity	53
5.4.2	Reliability	55
6	Survey I	57
6.1	Motivation and Outline	57
6.2	Questionnaire Design	58
6.3	Breakdown of the Samples	63
6.3.1	Demographic Situation	63
6.3.2	Income, Education, and Employment	64
6.3.3	Conclusion	66
6.4	Regression Model, Notation, and Data Preparation	66
6.5	Country-specific Regression Analysis	69
6.6	Cross-country Differences	74
6.7	Descriptive Analysis	77
6.8	Validity	82
6.9	Reliability	87
7	Survey II	93
7.1	Motivation and Outline	93
7.2	On Internet Surveys	94
7.3	Questionnaire Design	97
7.4	Breakdown of the Samples	100
7.4.1	Demographic Situation	100
7.4.2	Income, Education, and Employment	101
7.4.3	Conclusion	102
7.5	Regression Model, Notation, and Data Preparation	103
7.6	Country-specific Regression Analysis	105
7.7	Cross-country Differences	110
7.8	Descriptive Analysis	112
7.9	Validity	122
7.10	Reliability	127
8	Conclusion	131
	Appendix	135
	List of Symbols	149
	List of Figures and Tables	153
	References	157
