Preface	vii
Glossary	xv
Chapter 1	Introduction to Optical Frequency-Modulated Continuous-Wave Interference.	1
1.1	Historical Development	2
1.2	Optical FMCW Interference and its Characteristics	4
Chapter 2	Principles of Optical Frequency-Modulated Continuous-Wave Interference	7
2.1	Overview of Physical Optics.	7
2.2	Optical FMCW Interference	16
2.2.1	Sawtooth-Wave Optical FMCW Interference	20
2.2.2	Triangular-Wave Optical FMCW Interference	28
2.2.3	Sinusoidal-Wave Optical FMCW Interference	32
2.3	Multiple-Beam Optical FMCW Interference	38
2.4	Multiple-Wavelength Optical FMCW Interference	40
Chapter 3	Optical Sources for Optical Frequency-Modulated Continuous-Wave Interference.	45
3.1	Introduction to Optical Sources	45
3.2	Laser Principles	46
3.2.1	Energy Levels in Substances	46
3.2.2	Optical Absorption and Emissions	47
3.2.3	Active Medium and Population Inversion	49
3.2.4	Optical Resonator and Laser Modes	53
3.2.5	Frequency Modulation	57
3.3	Semiconductor Lasers (Laser Diodes)	62

3.3.1	Energy Bands in Semiconductors	62
3.3.2	Optical Absorption and Emissions in Semiconductors	66
3.3.3	Active Medium and Population Inversion of Semiconductor Lasers	67
3.3.4	Optical Resonator and Modes of Semiconductor Lasers	74
3.3.5	Frequency Modulation of Semiconductor Lasers ...	76
3.3.6	Driving Circuits for Semiconductor Lasers	79
3.3.7	Laser Noise, Frequency Drift and Feedback Light Effect	80
Chapter 4	Optical Detectors for Optical Frequency-Modulated Continuous-Wave Interference	83
4.1	Introduction to Optical Detectors	83
4.2	Semiconductor Photodiodes	86
4.2.1	PN Photodiodes	87
4.2.2	PIN Photodiodes	90
4.2.3	Avalanche Photodiodes (APD)	91
4.3	Photodiode Biasing and Signal Amplification	93
4.4	Noise in Detection Process	96
Chapter 5	Coherence Theory of Optical Frequency-Modulated Continuous-Wave Interference	99
5.1	Effect of the Frequency Bandwidth of Optical Sources	99
5.2	Coherence of Optical FMCW Waves	104
5.3	Influence of the Phase Noise of Optical Sources	107
Chapter 6	Optical Frequency-Modulated Continuous-Wave Interferometers	111
6.1	Construction of Optical FMCW Interferometers	111
6.2	The Michelson FMCW Interferometer	116
6.3	The Mach-Zehnder FMCW Interferometer	118
6.4	The Fabry-Perot FMCW Interferometer	119
Chapter 7	Fiber-optic Frequency-Modulated Continuous-Wave Interferometers	121
7.1	Introduction to Optical Fibers	121

7.1.1	Single-Mode Optical Fibers	125
7.1.2	Birefringent Optical Fibers	126
7.2	Introduction to Fiber-optic Components	130
7.2.1	Fiber-optic Directional Couplers	131
7.2.2	Fiber-optic Polarizers	135
7.2.3	Fiber-optic Polarization Controllers	136
7.2.4	Fiber-optic Connectors	138
7.2.5	Fiber-optic Splices	141
7.3	Fiber-optic Michelson FMCW Interferometers	142
7.4	Fiber-optic Mach-Zehnder FMCW Interferometers	145
7.5	Fiber-optic Fabry-Perot FMCW Interferometers	146
Chapter 8	Multiplexed Fiber-optic Frequency-Modulated Continuous-Wave Interferometers	149
8.1	Frequency-Division Multiplexed Fiber-optic FMCW Interferometers	150
8.2	Time-Division Multiplexed Fiber-optic FMCW Interferometers	152
8.3	Time-Frequency-Division Multiplexed Fiber-optic FMCW Interferometers	154
8.4	Coherence-Division Multiplexed Fiber-optic FMCW Interferometers	155
Chapter 9	Fiber-optic Frequency-Modulated Continuous-Wave Interferometric Sensors	159
9.1	Introduction to Fiber-optic Sensors	159
9.2	Fiber-optic FMCW Interferometric Displacement Sensors	161
9.2.1	Reflectometric Single-Mode Fiber FMCW Displacement Sensors	162
9.2.2	Multiplexed Reflectometric Single-Mode Fiber FMCW Displacement Sensors	165
9.3	Fiber-optic FMCW Interferometric Strain Sensors	182
9.3.1	Behavior of Birefringent Fibers under Tensile Forces	182
9.3.2	Transmissive Birefringent Fiber FMCW Strain Sensors	186
9.3.3	Reflectometric Birefringent Fiber FMCW Strain Sensors	189

9.4	Fiber-optic FMCW Interferometric Stress Sensors	194
9.4.1	Behavior of Birefringent Fibers under Perpendicular Forces	194
9.4.2	Transmissive Distributed Birefringent Fiber FMCW Stress Sensors	196
9.4.3	Reflectometric Distributed Birefringent Fiber FMCW Stress Sensors	198
9.5	Fiber-optic FMCW Interferometric Temperature Sensors ..	201
9.5.1	Reflectometric Single-Mode Fiber FMCW Temperature Sensors	201
9.5.2	Multiplexed Reflectometric Single-Mode Fiber FMCW Temperature Sensors	203
9.6	Fiber-optic FMCW Interferometric Rotation Sensors (Gyroscopes)	204
9.6.1	Principles of Fiber-optic Gyroscopes	204
9.6.2	Single-Mode Fiber FMCW Gyroscopes	213
9.6.3	Differential Single-Mode Fiber FMCW Gyroscopes	215
9.6.4	Birefringent Fiber FMCW Gyroscopes	216
9.6.5	Differential Birefringent Fiber FMCW Gyroscopes	219
Chapter 10	Signal Processing of Optical Frequency-Modulated Continuous-Wave Interference	223
10.1	Frequency Measurement	224
10.1.1	Time-Fixed Cycle-Counting Method	225
10.1.2	Number-Fixed Cycle-Counting Method	226
10.1.3	Pulse-Filling Method	228
10.2	Phase Measurement	230
10.2.1	Pulse-Filling Method	230
10.2.2	Phase-Locked-Loop Method	232
10.2.3	Digital Signal Processing Method	233
References	235
Index	241

Optical Frequency-Modulated Continuous-Wave (FMCW)
Interferometry

Zheng, J.

2005, XVIII, 254 p. 137 illus., Hardcover

ISBN: 978-0-387-23009-2
