Preface	v
1. CUSUM Procedure	1
1.1 CUSUM Procedure for Exponential Family	1
1.2 Operating Characteristics	2
1.3 Strong Renewal Theorem and Ladder Variables	4
1.4 ARL in the Normal Case	10
2. Change-Point Estimation	15
2.1 Asymptotic Quasistationary Bias	15
2.2 Second-Order Approximation	17
2.3 Two Examples	24
2.3.1 Normal Distribution	24
2.3.2 Exponential Distribution	25
2.4 Case Study	26
2.4.1 Nile River Data (Normal Case):	27
2.4.2 British Coal Mining Disaster (Exponential Case)	28
2.4.3 IBM Stock Price (Variance Change)	31
3. Confidence Interval for Change-Point	37
3.1 A Lower Confidence Limit	37
3.2 Asymptotic Results	38
3.3 Second-Order Approximation	40
3.4 Estimated Lower Limit	42
3.5 Confidence Set	43
4. Inference for Post-Change Mean	45
4.1 Inference for θ When $\hat{\nu} = \nu$	45
4.1.1 Estimation	45
4.1.2 Bias of $\hat{\theta}_0$	46
4.1.3 A Corrected Normal Pivot	48
4.2 Post-Change Mean	51
4.2.1 Bias of $\hat{\theta}$	52
4.2.2 A Corrected Normal Pivot	54

4.3	Numerical Examples and Discussions	57
4.4	Proofs	59
4.4.1	Proof of Lemma 4.2	59
4.4.2	Derivation of Corollary 4.7	62
4.5	Case Study	64
4.5.1	Nile River	64
4.5.2	Coal Mining Disaster	64
5.	Estimation After False Signal	67
5.1	Conditional Random Walk with Negative Drift	67
5.2	Corrected Normal Approximation	71
5.2.1	Bias of Z_{N_0}	71
5.2.2	Variance of Z_{N_0}	73
5.3	Numerical Comparison and Discussion	78
6.	Inference with Change in Variance	81
6.1	Introduction	81
6.2	Change-Point Estimation	82
6.3	Bias of $\hat{\theta}$ and $\hat{\sigma}^2$	85
6.3.1	Bias of $\hat{\theta}$	85
6.3.2	Bias of $\hat{\sigma}^2$	89
6.4	Corrected Confidence Interval	91
6.5	Numerical Evaluation	95
6.6	Appendix	97
6.6.1	Proof of Lemma 6.2	97
6.6.2	Proof of Lemma 6.4	98
6.7	Case Study	99
6.7.1	IBM Stock Prices:	99
6.7.2	Nile River Data	101
7.	Sequential Classification and Segmentation	103
7.1	Introduction	103
7.2	Online Classification	105
7.3	Offline Segmentation	108
7.4	Second-Order Approximations	110
7.5	Discussion and Generalization	112
7.5.1	Some Discussion	112
7.5.2	Double CUSUM Procedure	113
7.5.3	Multistate Change Model	113
7.6	Proofs	114
8.	An Adaptive CUSUM Procedure	117
8.1	Definition	117
8.2	Examples	118
8.2.1	Simple Change Model	118
8.2.2	Linear Post-Change Means	119

8.3	Simple Change Model	119
8.3.1	A Nonlinear Renewal Theorem	119
8.3.2	Average Run Lengths	121
8.4	Biases of Estimators	125
8.4.1	Bias of $\hat{\nu}$	125
8.4.2	Bias of $\hat{\mu}$	126
8.5	Discussions	128
8.6	Appendix	129
8.6.1	Limiting Distribution of W_n	129
8.6.2	Proof of Lemma 8.5	129
8.7	Case Study	130
8.7.1	Global Warming Detection	130
9.	Dependent Observation Case	133
9.1	Introduction	133
9.2	Model-based CUSUM Procedure	134
9.2.1	AR(1) Change-Point Model	134
9.2.2	Bias of Change-Point Estimator	135
9.2.3	Bias of $\hat{\theta}$	139
9.3	Numerical Results	141
10.	Other Methods and Remarks	145
10.1	Shiryayev–Roberts Procedure	145
10.2	Comparison with CUSUM Procedure	147
10.3	Case Study: Nile River Data	147
10.4	Concluding Remarks	149
	Bibliography	151
	Index	157

Inference for Change Point and Post Change Means
After a CUSUM Test

Wu, Y.

2005, XIII, 158 p., Softcover

ISBN: 978-0-387-22927-0
