## I Problems

<b>1 Elementary Number Theory</b>	<b>3</b>
1.1 Integers . . . . .	3
1.2 Applications of Unique Factorization . . . . .	8
1.3 The <i>ABC</i> Conjecture . . . . .	9
1.4 Supplementary Problems . . . . .	10
<b>2 Euclidean Rings</b>	<b>13</b>
2.1 Preliminaries . . . . .	13
2.2 Gaussian Integers . . . . .	17
2.3 Eisenstein Integers . . . . .	17
2.4 Some Further Examples . . . . .	21
2.5 Supplementary Problems . . . . .	25
<b>3 Algebraic Numbers and Integers</b>	<b>27</b>
3.1 Basic Concepts . . . . .	27
3.2 Liouville's Theorem and Generalizations . . . . .	29
3.3 Algebraic Number Fields . . . . .	32
3.4 Supplementary Problems . . . . .	38
<b>4 Integral Bases</b>	<b>41</b>
4.1 The Norm and the Trace . . . . .	41
4.2 Existence of an Integral Basis . . . . .	43
4.3 Examples . . . . .	46
4.4 Ideals in $\mathcal{O}_K$ . . . . .	49
4.5 Supplementary Problems . . . . .	50

<b>5</b>	<b>Dedekind Domains</b>	<b>53</b>
5.1	Integral Closure . . . . .	53
5.2	Characterizing Dedekind Domains . . . . .	55
5.3	Fractional Ideals and Unique Factorization . . . . .	57
5.4	Dedekind's Theorem . . . . .	63
5.5	Factorization in $\mathcal{O}_K$ . . . . .	65
5.6	Supplementary Problems . . . . .	66
<b>6</b>	<b>The Ideal Class Group</b>	<b>69</b>
6.1	Elementary Results . . . . .	69
6.2	Finiteness of the Ideal Class Group . . . . .	71
6.3	Diophantine Equations . . . . .	73
6.4	Exponents of Ideal Class Groups . . . . .	75
6.5	Supplementary Problems . . . . .	76
<b>7</b>	<b>Quadratic Reciprocity</b>	<b>81</b>
7.1	Preliminaries . . . . .	81
7.2	Gauss Sums . . . . .	84
7.3	The Law of Quadratic Reciprocity . . . . .	86
7.4	Quadratic Fields . . . . .	88
7.5	Primes in Special Progressions . . . . .	91
7.6	Supplementary Problems . . . . .	94
<b>8</b>	<b>The Structure of Units</b>	<b>99</b>
8.1	Dirichlet's Unit Theorem . . . . .	99
8.2	Units in Real Quadratic Fields . . . . .	108
8.3	Supplementary Problems . . . . .	115
<b>9</b>	<b>Higher Reciprocity Laws</b>	<b>117</b>
9.1	Cubic Reciprocity . . . . .	117
9.2	Eisenstein Reciprocity . . . . .	122
9.3	Supplementary Problems . . . . .	125
<b>10</b>	<b>Analytic Methods</b>	<b>127</b>
10.1	The Riemann and Dedekind Zeta Functions . . . . .	127
10.2	Zeta Functions of Quadratic Fields . . . . .	130
10.3	Dirichlet's $L$ -Functions . . . . .	133
10.4	Primes in Arithmetic Progressions . . . . .	134
10.5	Supplementary Problems . . . . .	136
<b>11</b>	<b>Density Theorems</b>	<b>139</b>
11.1	Counting Ideals in a Fixed Ideal Class . . . . .	139
11.2	Distribution of Prime Ideals . . . . .	146
11.3	The Chebotarev density theorem . . . . .	150
11.4	Supplementary Problems . . . . .	153

## II Solutions

<b>1</b>	<b>Elementary Number Theory</b>	<b>159</b>
1.1	Integers . . . . .	159
1.2	Applications of Unique Factorization . . . . .	166
1.3	The <i>ABC</i> Conjecture . . . . .	170
1.4	Supplementary Problems . . . . .	173
<b>2</b>	<b>Euclidean Rings</b>	<b>179</b>
2.1	Preliminaries . . . . .	179
2.2	Gaussian Integers . . . . .	181
2.3	Eisenstein Integers . . . . .	185
2.4	Some Further Examples . . . . .	187
2.5	Supplementary Problems . . . . .	189
<b>3</b>	<b>Algebraic Numbers and Integers</b>	<b>197</b>
3.1	Basic Concepts . . . . .	197
3.2	Liouville's Theorem and Generalizations . . . . .	198
3.3	Algebraic Number Fields . . . . .	199
3.4	Supplementary Problems . . . . .	202
<b>4</b>	<b>Integral Bases</b>	<b>207</b>
4.1	The Norm and the Trace . . . . .	207
4.2	Existence of an Integral Basis . . . . .	208
4.3	Examples . . . . .	211
4.4	Ideals in $\mathcal{O}_K$ . . . . .	213
4.5	Supplementary Problems . . . . .	214
<b>5</b>	<b>Dedekind Domains</b>	<b>227</b>
5.1	Integral Closure . . . . .	227
5.2	Characterizing Dedekind Domains . . . . .	228
5.3	Fractional Ideals and Unique Factorization . . . . .	229
5.4	Dedekind's Theorem . . . . .	233
5.5	Factorization in $\mathcal{O}_K$ . . . . .	234
5.6	Supplementary Problems . . . . .	235
<b>6</b>	<b>The Ideal Class Group</b>	<b>245</b>
6.1	Elementary Results . . . . .	245
6.2	Finiteness of the Ideal Class Group . . . . .	245
6.3	Diophantine Equations . . . . .	247
6.4	Exponents of Ideal Class Groups . . . . .	248
6.5	Supplementary Problems . . . . .	250

<b>7 Quadratic Reciprocity</b>	<b>263</b>
7.1 Preliminaries . . . . .	263
7.2 Gauss Sums . . . . .	266
7.3 The Law of Quadratic Reciprocity . . . . .	267
7.4 Quadratic Fields . . . . .	270
7.5 Primes in Special Progressions . . . . .	270
7.6 Supplementary Problems . . . . .	272
<b>8 The Structure of Units</b>	<b>279</b>
8.1 Dirichlet's Unit Theorem . . . . .	279
8.2 Units in Real Quadratic Fields . . . . .	284
8.3 Supplementary Problems . . . . .	291
<b>9 Higher Reciprocity Laws</b>	<b>299</b>
9.1 Cubic Reciprocity . . . . .	299
9.2 Eisenstein Reciprocity . . . . .	303
9.3 Supplementary Problems . . . . .	308
<b>10 Analytic Methods</b>	<b>313</b>
10.1 The Riemann and Dedekind Zeta Functions . . . . .	313
10.2 Zeta Functions of Quadratic Fields . . . . .	316
10.3 Dirichlet's $L$ -Functions . . . . .	320
10.4 Primes in Arithmetic Progressions . . . . .	322
10.5 Supplementary Problems . . . . .	324
<b>11 Density Theorems</b>	<b>333</b>
11.1 Counting Ideals in a Fixed Ideal Class . . . . .	333
11.2 Distribution of Prime Ideals . . . . .	337
11.3 The Chebotarev density theorem . . . . .	340
11.4 Supplementary Problems . . . . .	341
