

Contents

Preface	vii
1 Squares	1
1.1 Square and Triangular Numbers	1
1.2 Pythagoras's Theorem	17
1.3 The Equation $a^2 + b^2 = c^2$	24
1.4 Sum of Two Squares	29
1.5 Complex Numbers	32
2 Numbers, Numbers Everywhere	43
2.1 Different Bases	43
2.2 Congruences	51
2.3 Continued Fractions	56
2.4 The Euclidean Algorithm	67
2.5 Infinity	72
3 Fibonacci Numbers	81
3.1 Recurrence Relations	81
3.2 Fibonacci and Lucas Numbers	85
3.3 The Golden Section	94
4 Prime Numbers	101
4.1 Introduction	101
4.2 The Distribution of Primes	104

4.3	Large Primes	111
4.4	The Riemann Hypothesis	120
5	Choice and Chance	127
5.1	Arrangements and Permutations	127
5.2	Binomial Coefficients	138
5.3	Probability	146
6	Geometrical Constructions	151
6.1	Ruler and Compasses	151
6.2	Unsolvable Problems	163
6.3	Properties of the Triangle	168
6.4	Coordinate Geometry	174
6.5	Regular Polyhedra	183
7	The Algebra of Groups	195
7.1	Introduction	195
7.2	Groups	201
7.3	Subgroups	208
7.4	Permutation Groups	215
7.5	Further Material	218
7.6	Groups of Small Order	224
7.7	Dihedral and Polyhedral Groups	229
	References	235
	Index	237
