

Contents

Foreword	v
Preface	ix
1. Structure and Function of the Immune System in Vertebrates	1
2. Ontogeny and the Development of Cells Mediating Innate and Adaptive Immunity	57
3. Phenotypic Characteristics of Neonatal B Cells	91
4. Molecular Characteristics of Neonatal B-Cell Repertoire	107
5. Genetically Programmed Temporal Ordered Activation of Neonatal B-Cell Clones	131
6. Antibody Response in Fetuses and Newborns	145
7. Effect of Maternal Antibodies on Neonatal B-Cell Response	159
8. Neonatal Autoimmune Diseases Caused by Maternal Pathogenic Autoantibodies	179
9. Phenotypic Characteristics of Neonatal T Cells	193
10. Expression of MHC Molecules in Neonates	219
11. Neonatal Cytokine Network	227
12. Cell-Mediated Immune Responses in Neonates	241
13. Fetal and Neonatal Tolerance	253
14. Development of Efficient Prophylactic Vaccines and Theracines for Newborns and Infants	273
References	303
Index	373
