PART I. INTRODUCTION

1 Introduction to Endocrinology	3
<i>P. Michael Conn</i>	

PART II. HORMONE SECRETION AND ACTION

2 Receptors: <i>Molecular Mediators of Hormone Action</i>	9
<i>Kelly E. Mayo</i>	
3 Second-Messenger Systems and Signal Transduction Mechanisms	35
<i>Eliot R. Spindel</i>	
4 Steroid Hormones	49
<i>Derek Henley, Jonathan Lindzey, and Kenneth S. Korach</i>	
5 Plasma Membrane Receptors for Steroid Hormones in Cell Signaling and Nuclear Function	67
<i>Richard J. Pietras and Clara M. Szego</i>	
6 Growth Factors	85
<i>Derek LeRoith and William L. Lowe Jr.</i>	
7 Prostaglandins and Leukotrienes: <i>Locally Acting Agents</i>	93
<i>John A. McCracken</i>	
8 The Neuroendocrine–Immune Interface	113
<i>Michael S. Harbuz and Stafford L. Lightman</i>	

Part III. Insects/Plants/Comparative

9 Insect Hormones	127
<i>Lawrence I. Gilbert</i>	
10 Phytohormones and Signal Transduction Pathways in Plants	137
<i>William Teale, Ivan Paponov, Olaf Tietz, and Klaus Palme</i>	
11 Comparative Endocrinology	149
<i>Fredrick Stormshak</i>	

Part IV. Hypothalamic–Pituitary

12	Hypothalamic Hormones: <i>GnRH, TRH, GHRH, SRIF, CRH, and Dopamine</i>	173
	<i>Constantine A. Stratakis and George P. Chrousos</i>	
13	Anterior Pituitary Hormones	197
	<i>Ilan Shimon and Shlomo Melmed</i>	
14	Posterior Pituitary Hormones	211
	<i>Daniel G. Bichet</i>	
15	Endocrine Disease: <i>Value for Understanding Hormonal Actions</i>	233
	<i>Anthony P. Heaney and Glenn D. Braunstein</i>	
16	The Pineal Hormone (Melatonin)	255
	<i>Irina V. Zhdanova and Richard J. Wurtman</i>	
17	Thyroid Hormones (T_4 , T_3)	267
	<i>Takahiko Kogai and Gregory A. Brent</i>	
18	Calcium-Regulating Hormones: <i>Vitamin D and Parathyroid Hormone</i>	283
	<i>Geoffrey N. Hendy</i>	
19	Oncogenes and Tumor Suppressor Genes in Tumorigenesis of the Endocrine System	301
	<i>Anthony P. Heaney and Shlomo Melmed</i>	
20	Insulin Secretion and Action	311
	<i>Run Yu, Hongxiang Hui, and Shlomo Melmed</i>	
21	Cardiovascular Hormones	321
	<i>Willis K. Samson and Meghan M. Taylor</i>	
22	Adrenal Medulla (Catecholamines and Peptides)	337
	<i>William J. Raum</i>	
23	Hormones of the Kidney	353
	<i>Masashi Mukoyama and Kazuwa Nakao</i>	
24	Reproduction and Fertility	367
	<i>Neena B. Schwartz</i>	
25	Endocrinology of Fat, Metabolism, and Appetite	375
	<i>Rachel L. Batterham and Michael A. Cowley</i>	
26	Endocrinology of the Ovary	391
	<i>Denis Magoffin, Ashim Kumar, Bulent Yildiz, and Ricardo Azziz</i>	
27	The Testis	405
	<i>Amiya Sinha Hikim, Ronald S. Swerdloff, and Christina Wang</i>	
28	Endocrinology of Aging	419
	<i>Steven W. J. Lamberts</i>	
	Index	429

Endocrinology

Basic and Clinical Principles

Melmed, S.; Conn, P.M. (Eds.)

2005, 456 p. 183 illus., 1 illus. in color., Hardcover

ISBN: 978-1-58829-427-2

A product of Humana Press
