Preface	v
Contributors	xi

PART I. VIRAL DETECTION

1	Viral Detection <i>Feng Wang-Johanning and Gary L. Johanning</i>	3
2	Quantitative Detection of Epstein-Barr Virus DNA in Clinical Specimens by Rapid Real-Time PCR Targeting a Highly Conserved Region of EBNA-1 <i>Servi J. C. Stevens, Sandra A. W. M. Verkuijlen, and Jaap M. Middeldorp</i>	15
3	Profiling of Epstein-Barr Virus Latent RNA Expression in Clinical Specimens by Gene-Specific Multiprimed cDNA Synthesis and PCR <i>Servi J. C. Stevens, Antoinette A. T. P. Brink, and Jaap M. Middeldorp</i>	27
4	Quantitative Detection of Viral Gene Expression in Populations of Epstein-Barr Virus-Infected Cells In Vivo <i>Donna R. Hochberg and David A. Thorley-Lawson</i>	39
5	Detection and Quantification of the Rare Latently Infected Cell Undergoing Herpes Simplex Virus Transcriptional Activation in the Nervous System In Vivo <i>Nancy M. Sawtell</i>	57
6	Reporter Cell Lines for the Detection of Herpes Simplex Viruses <i>Szu-Hao Kung</i>	73

PART II. VIRUS STRUCTURE AND IMAGING

7	Unraveling the Architecture of Viruses by High-Resolution Atomic Force Microscopy <i>Alexander J. Malkin, Marco Plomp, and Alexander McPherson</i>	85
8	Studying the Structure of Large Viruses With Multiresolution Imaging <i>Carmen San Martín</i>	109
9	Herpes Simplex Virus–Cell Interactions Studied by Low-Fading Contrasted Immunofluorescence <i>Helle Lone Jensen and Bodil Norrild</i>	129

- 10 Herpes Simplex Virus–Cell Interactions Studied by Immunogold Cryosection Electron Microscopy
Helle Lone Jensen and Bodil Norrild 143
- 11 FTIR Microscopy Detection of Cells Infected With Viruses
Vitaly Erukhimovitch, Marina Talyshinsky, Yelena Souprun, and Mahmoud Huleihel 161

PART III. VIRUS ENTRY

- 12 The JC Virus-Like Particle Overlay Assay
Hirofumi Sawa and Rika Komagome 175
- 13 Analysis of Fusion Using a Virus-Free Cell Fusion Assay
Marisa P. McShane and Richard Longnecker 187
- 14 Pseudovirions as Specific Tools for Investigation of Virus Interactions With Cells
Martin Sapp and Hans-Christoph Selinka 197

PART IV. GENE EXPRESSION

- 15 Simultaneous *In Situ* Detection of RNA, DNA, and Protein Using Tyramide-Coupled Immunofluorescence
Brian A. Van Tine, Thomas R. Broker, and Louise T. Chow 215
- 16 Identification and Characterization of Herpesviral Immediate-Early Genes
Yan Yuan 231

PART V. REPLICATION AND GENOME MAINTENANCE

- 17 Methods for Measuring the Replication and Segregation of Epstein-Barr Virus-Based Plasmids
Priya Kapoor and Lori Frappier 247
- 18 DNA Affinity Purification of Epstein-Barr Virus OriP-Binding Proteins
Constandache Atanasiu, Larissa Lezina, and Paul M. Lieberman 267

PART VI. PATHOGENESIS

- 19 Pre-B-Cell Colony Formation Assay
Masato Ikeda and Richard Longnecker 279
- 20 Luciferase Real-Time Bioluminescence Imaging for the Study of Viral Pathogenesis
Gary D. Luker and David A. Leib 285

PART VII. COMPLEX CELL SYSTEMS

- 21 Culturing Primary and Transformed Neuronal Cells for Studying Pseudorabies Virus Infection
Toh Hean Ch'ng, E. Alexander Flood, and Lynn William Enquist 299

22	Human Papillomavirus Type 31 Life Cycle: <i>Methods for Study Using Tissue Culture Models</i> Frauke Fehrmann and Laimonis A. Laimins	317
PART VIII. RECOMBINANT GENETICS		
23	Molecular Genetics of Herpesviruses: <i>A Recombinant Technology Approach</i> Jason S. Knight, Subhash C. Verma, Ke Lan, and Erle S. Robertson	333
24	Molecular Genetics of DNA Viruses: <i>Recombinant Virus Technology</i> Bernhard Neuhiel and Henri-Jacques Delecluse	353
25	Genetic Analysis of Cytomegalovirus by Shuttle Mutagenesis Manfred Lee and Fenyong Liu	371
26	Construction of a Gene Inactivation Library for <i>Bovine herpesvirus 1</i> Using Infectious Clone Technology Timothy J. Mahony, Fiona M. McCarthy, Jennifer L. Gravel, and Peter L. Young	387
27	Selective Silencing of Viral Gene E6 and E7 Expression in HPV-Positive Human Cervical Carcinoma Cells Using Small Interfering RNAs Ming Jiang and Jo Milner	401
PART IX. COMPUTATION/SYSTEMS BIOLOGY OF VIRUSES		
28	Design of a Herpes Simplex Virus Type 2 Long Oligonucleotide-Based Microarray: <i>Global Analysis of HSV-2 Transcript Abundance During Productive Infection</i> J. S. Aguilar, Peter Ghazal, and Edward K. Wagner	423
29	Real-Time Quantitative PCR Analysis of Viral Transcription James Papin, Wolfgang Vahrson, Rebecca Hines-Boykin, and Dirk P. Dittmer	449
30	Rapid Screening of Chemical Inhibitors That Block Processive DNA Synthesis of Herpesviruses: <i>Potential Application to High-Throughput Screening</i> Robert P. Ricciardi, Kai Lin, Xulin Chen, Dorjbal Dorjsuren, Robert Shoemaker, and Shizuko Sei	481
Index		493
