Preface	v
Contributors	xiii

PART I. MODELS OF HYPERTENSION

1 Congenic/Consomic Models of Hypertension <i>Delyth Graham, Martin W. McBride, Nicholas J. R. Brain, and Anna F. Dominiczak</i>	3
2 Mouse Knockout Models of Hypertension <i>Michael Bader</i>	17
3 Production of Transgenic Models in Hypertension <i>Elena Popova, Michael Bader, and Alexander Krivokharchenko</i>	33
4 Measuring Blood Pressure in Small Laboratory Animals <i>Klaas Kramer and René Remie</i>	51

PART II. ASSESSMENT OF FREE RADICALS IN ENDOTHELIAL DYSFUNCTION

5 Analysis of Superoxide Anion Production in Tissue <i>Michela Zanetti, Livius V. d'Uscio, Timothy E. Peterson, Zvonimir S. Katusic, and Timothy O'Brien</i>	65
6 Measurement of Vascular Reactive Oxygen Species Production by Chemiluminescence <i>Tomasz J. Guzik and Keith M. Channon</i>	73
7 A Guide to Wire Myography <i>Angela Spiers and Neal Padmanabhan</i>	91

PART III. NUCLEIC ACID TECHNIQUES

8 Selection of Candidate Genes in Hypertension <i>Charles A. Mein, Mark J. Caulfield, and Patricia B. Munroe</i>	107
9 Genome-Wide Scanning With SSLPs in the Rat <i>Carol Moreno, Kathleen Kennedy, Jaime Wendt Andrae, and Howard J. Jacob</i>	131
10 Extraction of RNA From Cells and Tissue <i>Ian M. Bird</i>	139
11 Single-Strand Conformational Polymorphism Analysis: <i>Basic Principles and Routine Practice</i> <i>Yanbin Dong and Haidong Zhu</i>	149

12	Single-Nucleotide Polymorphism Genotyping for Disease Association Studies Myriam Fornage and Peter A. Doris	159
13	Denaturing High-Performance Liquid Chromatography Using the WAVE DNA Fragment Analysis System Elizabeth Donohoe	173
14	TaqMan Real-Time PCR Quantification: Conventional and Modified Methods Michihiro Yoshimura, Shota Nakamura, and Hisao Ogawa	189
15	Generation of High-Sensitivity Antisense cDNA Probes by Asymmetric PCR Ian M. Bird	199
16	New Advances in Microarrays: Finding the Genes Causally Involved in Disease Claudio Napoli, Filomena de Nigris, and Vincenzo Sica	215
17	Pharmacogenetics and Pharmacogenomics Klaus Lindpaintner	235

PART IV. PROTEINS AND PROTEOMICS

18	Determination of the Endogenous Nitric Oxide Synthase Inhibitor Asymmetric Dimethylarginine in Biological Samples by HPLC Tom Teerlink	263
19	Proteomic Approaches in the Analysis of Hypertension Soren Naaby-Hansen, Gayathri D. Warnasuriya, Claire Hastie, Piers Gallney, and Rainer Cramer	275

PART V. GENE TRANSFER

20	Gene Transfer in Endothelial Dysfunction and Hypertension Sabyasachi Sen, Pdraig M. Strappe, and Timothy O'Brien	299
21	Nonviral Gene Delivery Methods in Cardiovascular Diseases Marika Ruponen, Zanna Hyvönen, Arto Urtti, and Seppo Ylä-Herttuala	315
22	Construction and Characterization of Helper-Dependent Adenoviral Vectors for Sustained In Vivo Gene Therapy Kazuhiro Oka and Lawrence Chan	329
23	Adenovirus-Mediated Gene Transfer In Vivo: An Approach to Reduce Oxidative Stress Yi Chu	351
24	Gene Therapy for Hypertension: Antisense Inhibition of the Renin–Angiotensin System M. Ian Phillips and Birgitta Kimura	363

25	Modulation of Gene Expression by RNAi Cezary Wójcik, Rosalind Fabunmi, and George N. DeMartino	381
26	In Vivo Biopanning: <i>A Methodological Approach to Identifying Novel Targeting Ligands for Delivery of Biological Agents to the Vasculature</i> Lorraine M. Work, Campbell G. Nicol, Laura Denby, and Andrew H. Baker	395
PART VI. STEM CELLS		
27	Cardiomyocytes Derived From Embryonic Stem Cells Kenneth R. Boheler, David G. Crider, Yelena Tarasova, and Victor A. Maltsev	417
PART VII. BIOINFORMATICS		
28	<i>In Silico</i> and Wet-Bench Identification of Nuclear Matrix Attachment Regions Stephen A. Krawetz, Sorin Draghici, Robert Goodrich, Zhandong Liu, and G. Charles Ostermeier	439
29	Biomedical Informatics Methods in Pharmacogenomics Qing Yan	459
Index		487

Hypertension

Methods and Protocols

Fennell, J.P.; Baker, A.H. (Eds.)

2005, XVI, 502 p. 98 illus., Hardcover

ISBN: 978-1-58829-323-7

A product of Humana Press
