Preface	v
Contributors	xi
1 Exploiting Dendritic Cells for Active Immunotherapy of Cancer and Chronic Infection <i>David O'Neill and Nina Bhardwaj</i>	1
2 A Mathematical Approach for Optimizing Dendritic Cell-Based Immunotherapy <i>Gennady Bocharov, Neville J. Ford, and Burkhard Ludewig</i>	19
3 Delivery of Tumor Antigens to Dendritic Cells Using Biodegradable Microspheres <i>Ying Waeckerle-Men, Bruno Gander, and Marcus Groettrup</i>	35
4 RNA Transfection of Dendritic Cells <i>Frank Grünebach, Martin R. Müller, and Peter Brossart</i>	47
5 Isolation and Generation of Clinical-Grade Dendritic Cells Using the CliniMACS System <i>John D. M. Campbell, Christoph Piechaczek, Gregor Winkels, Edith Schwamborn, Daniela Micheli, Sonja Hennemann, and Jürgen Schmitz</i>	55
6 Generation of Clinical Grade Monocyte-Derived Dendritic Cells Using the CliniMACS System <i>Thomas Putz, Hubert Gander, Reinhold Ramoner, Claudia Zelle-Rieser, Andrea Rahm, Walter Nussbaumer, Georg Bartsch, Lorenz Hörtl, and Martin Thurnher</i>	71
7 Adenoviral Transduction of Dendritic Cells <i>Rienk Offringa, Kitty Kwappenberg, Martijn Rabelink, Delphine Rea, and Rob Hoebe</i>	83
8 Generation of Autologous Peptide- and Protein-Pulsed Dendritic Cells for Patient-Specific Immunotherapy <i>David O'Neill and Nina Bhardwaj</i>	97
9 Phenotypical and Functional Characterization of Clinical-Grade Dendritic Cells <i>I. Jolanda M. de Vries, Gosse J. Adema, Cornelis J. A. Punt, and Carl G. Figdor</i>	113
10 Dendritic Cells in Clinical Trials for Multiple Myeloma <i>Volker L. Reichardt and Peter Brossart</i>	127

11	Identification of Tumor-Associated Autoantigens With SEREX Özlem Türeci, Dirk Usener, Sandra Schneider, and Ugur Sahin	137
12	Application of Proteomics and Protein Analysis for Biomarker and Target Finding for Immunotherapy Petra Weingarten, Petra Lutter, Andreas Wattenberg, Martin Blueggel, Sonja Bailey, Joachim Klose, Helmut E. Meyer, and Christoph Huels	155
13	Isolation and Expansion of Tumor-Reactive Cytotoxic T-Cell Clones for Adoptive Immunotherapy Helga Bernhard, Burkhard Schmidt, Dirk H. Busch, and Christian Peschel	175
14	Tracking Adoptively Transferred Antigen-Specific T-Cells With Peptide/MHC Multimers Norbert Meidenbauer and Andreas Mackensen	185
15	Gene Transfer of MHC-Restricted Receptors Helmut W. H. G. Kessels, Monika C. Wolkers, and Ton N. M. Schumacher	201
16	Immunotherapy With CTL Restricted by Nonspecific MHC Liqian Gao, Anne-Marie Downs, and Hans J. Stauss	215
17	Designing TCR for Cancer Immunotherapy Ralf-Holger Voss, Jürgen Kuball, Matthias Theobald	229
18	Isolation and Expansion of Tumor-Specific CD4 ⁺ T-Cells by Means of Cytokine Secretion Christian Becker	257
19	Methods for the Ex Vivo Characterization of Human CD8 ⁺ T Subsets Based on Gene Expression and Replicative History Analysis Nathalie Rufer, Patrick Reichenbach, and Pedro Romero	265
20	Regulatory T Cells in Antitumor Therapy: <i>Isolation and Functional Testing of CD4⁺CD25⁺ Regulatory T-Cells</i> Helmut Jonuleit and Edgar Schmitt	285
21	Monoclonal Antibody-Based Strategies in Autoimmunity and Transplantation Lucienne Chatenoud	297
22	Producing Bispecific and Bifunctional Antibodies Dipankar Das and Mavanur R. Suresh	329
23	Antibody–Cytokine Fusion Proteins for the Therapy of Cancer Gustavo Helguera and Manuel L. Penichet	347

24	Synthesis and Biological Evaluation of a Paclitaxel Immunconjugate Ahmad Safavy and Kevin P. Raisch	375
25	Cytotoxic Tumor Targeting With scFv Antibody-Modified Liposomes Cornelia Marty and Reto A. Schwendener	389
26	Intravenous Immunoglobulin Treatment for Fibrosis, Atherosclerosis, and Malignant Conditions Ilan Krause and Yehuda Shoenfeld	403
27	Study of T-Cell Costimulatory Blockade In Vivo at a Single Cell Level Minh Diem Vu and Xian Chang Li	409
28	Stem Cell Transplantation: <i>Graft-Mediated Antileukemia Effects</i> William J. Hogan and Hans Joachim Deeg	421
29	Influence of Radiation Protocols on Graft-vs-Host Disease Incidence After Bone-Marrow Transplantation in Experimental Models Sebastian Schwarte and Matthias W. Hoffmann	445
30	Induction of Chimerism and Tolerance Using Freshly Purified or Cultured Hematopoietic Stem Cells in Nonmyeloablated Mice Nikos Emmanouilidis and Christian P. Larsen	459
31	Induction of Mixed vs Full Chimerism to Potentiate GVL Effects After Bone-Marrow Transplantation Markus Y. Mapara and Megan Sykes	469
32	Application of Donor Lymphocytes Expressing a Suicide Gene for Early GVL Induction and Later Control of GVH Reactions After Bone-Marrow Transplantation Attilio Bondanza, Fabio Ciceri, and Chiara Bonini	475
Index		487
