

CONTENTS

| | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| Preface | v |
| Contributors | ix |
| 1 Targeting of the EGFR As a Modulator of Cancer Chemotherapy | 1 |
| <i>Jose Baselga</i> | |
| 2 Cyclin-Dependent Kinase Inhibitors in Combination Chemotherapy | 27 |
| <i>Manish A. Shah and Gary K. Schwartz</i> | |
| 3 Development of Protein Kinase C and Cyclin-Dependent Kinase Inhibitors As Potentiators of Cytotoxic Drug Action in Leukemia | 61 |
| <i>Steven Grant</i> | |
| 4 Carboxyamidotriazole, an Inhibitor of Nonvoltage-Operated Calcium Entry: <i>Single-Agent and Combination Therapy for Ovarian Carcinoma</i> | 89 |
| <i>Chad M. Michener and Elise C. Kohn</i> | |
| 5 Targeted α -Particle Therapy: <i>A Rational Approach to Drug Development in Hematologic Diseases and Solid Tumors</i> | 107 |
| <i>John M. Burke, David A. Scheinberg, and Joseph G. Jurcic</i> | |
| 6 Pharmacological Modulation of Fluoropyrimidines: <i>Building on the Lessons of the Past</i> | 133 |
| <i>Owen A. O'Connor</i> | |
| 7 Development of Inhibitors of HER2 With Taxanes: <i>New Directions in Breast Cancer Therapy</i> | 175 |
| <i>Shanu Modi, Monica N. Fornier, and Andrew D. Seidman</i> | |
| 8 Targeting NF- κ B to Increase the Activity of Cisplatin in Solid Tumors | 197 |
| <i>Don S. Dizon, Carol Aghajanian, X. Jun Yan, and David R. Spriggs</i> | |
| 9 Combinations of Chemotherapy and G3139, an Antisense Bcl-2 Oligonucleotide | 209 |
| <i>Luba Benimetskaya, Sridhar Mani, and C. A. Stein</i> | |

| | | |
|-----------|------------------------------------------------------|-----|
| 10 | Use of Animal Models to Evaluate Signal Transduction | |
| | Inhibitors As Modulators of Cytotoxic Therapy | 231 |
| | <i>Beverly A. Teicher</i> | |
| | Index | 277 |
