Preface .....	v	II. ALZHEIMER'S DISEASE	
Contributors .....	ix	6 Neurotoxicity of the Alzheimer's $\beta$ -Amyloid Peptide: <i>Spectroscopic and Microscopic Studies</i> .....	61
Companion CD ( <i>Inside Back Cover</i> ) .....	xi	<b>David R. Howlett</b>	
Prologue: <i>Nano- and Microimaging Surgical Anesthesia</i> <i>in Epilepsy Patients</i> .....	xiii	7 Functional Imaging and Psychopathological Consequences of Inflammation in Alzheimer's Dementia .....	75
<b>Patricia A. Broderick, David N. Rahni, and</b> <b>Steven V. Pacia</b>		<b>Jan Versijpt, Rudi A. Dierckx, and Jakob Korf</b>	
I. PARKINSON'S DISEASE		8 Neurotoxic Oxidative Metabolite of Serotonin: <i>Possible Role in Alzheimer's Disease</i> .....	85
1 Magnetic Resonance Imaging and Magnetic Resonance Spectroscopy in Parkinson's Disease: <i>Structural vs Functional Changes</i> .....	3	<b>Ladislav Volicer, Monika Z. Wrona,</b> <b>Wayne Matson, and Glenn Dryhurst</b>	
<b>W. R. Wayne Martin</b>		9 Predicting Progression of Alzheimer's Disease With Magnetic Resonance .....	95
2 Positron Emission Tomography and Single-Photon Emission Tomography in the Diagnosis of Parkinson's Disease: <i>Differential Diagnosis</i> <i>From Parkinson-Like Degenerative Diseases</i> .....	13	<b>Kejal Kantarci and Clifford R. Jack, Jr.</b>	
<b>Paul D. Acton</b>		10 Stages of Brain Functional Failure in Alzheimer's Disease: <i>In Vivo Positron Emission Tomography</i> <i>and Postmortem Studies Suggest Potential Initial</i> <i>Reversibility and Later Irreversibility</i> .....	107
3 Positron Emission Tomography in Parkinson's Disease: <i>Cerebral Activation Studies and</i> <i>Neurochemical and Receptor Research</i> .....	25	<b>Stanley I. Rapoport</b>	
<b>André R. Troiano and A. Jon Stoessl</b>		III. EPILEPSY	
4 [ $^{123}\text{I}$ ]-Altropane SPECT: <i>How It Compares to Other</i> <i>Positron Emission Tomography and Single-Photon</i> <i>Emission Tomography Dopamine Transporters</i> <i>in Early Parkinson's Disease</i> .....	37	11 Neocortical Epilepsy: $\alpha$ -Methyl-L-Tryptophan and <i>Positron Emission Tomography Studies</i> .....	123
<b>Hubert H. Fernandez, Paula D. Ravin,</b> <b>and Dylan P. Wint</b>		<b>Jun Natsume, Andrea Bernasconi,</b> <b>and Mirko Diksic</b>	
5 Positron Emission Tomography and Embryonic Dopamine Cell Transplantation in Parkinson's Disease .....	45	12 Pediatric Cortical Dysplasia: <i>Positron Emission Tomography Studies</i> .....	131
<b>Yilong Ma, Vijay Dhawan, Curt Freed,</b> <b>Stanley Fahn, and David Eidelberg</b>		<b>Bharathi Dasan Jagadeesan, Csaba Juhász,</b> <b>Diane C. Chugani, and Harry T. Chugani</b>	
		13 Bioimaging L-Tryptophan in Human Hippocampus and Neocortex: <i>Subtyping Temporal</i> <i>Lobe Epilepsy</i> .....	141
		<b>Steven V. Pacia and Patricia A. Broderick</b>	

14	In Vivo Intrinsic Optical Signal Imaging of Neocortical Epilepsy ..... 149 <b>Sonya Bahar, Minah Suh, Ashesh Mehta, and Theodore H. Schwartz</b>	19	Pyramidal Tract Involvement in Adult Krabbe's Disease: <i>Magnetic Resonance Imaging and Proton Magnetic Resonance Spectroscopy Abnormalities</i> ..... 215 <b>Laura Farina, Alberto Bizzi, and Mario Savoirdo</b>
15	Intraoperative Magnetic Resonance Imaging in the Surgical Treatment of Epilepsy ..... 177 <b>Theodore H. Schwartz</b>	20	Imaging Leukodystrophies: <i>Focus on Lysosomal, Peroxisomal, and Non-Organellar Pathology</i> ..... 225 <b>Annette O. Nusbaum</b>
16	Periodic Epileptiform Discharges Associated With Increased Cerebral Blood Flow: <i>Role of Single-Photon Emission Tomography Imaging</i> ..... 193 <b>Imran I. Ali and Noor A. Pirzada</b>	21	Advanced Magnetic Resonance Imaging in Leukodystrophies ..... 239 <b>Edwin Y. Wang and Meng Law</b>
17	Imaging White Matter Signals in Epilepsy Patients: <i>A Unique Sensor Technology</i> ..... 199 <b>Patricia A. Broderick and Steven V. Pacia</b>	22	Childhood Mitochondrial Disorders and Other Inborn Errors of Metabolism Presenting With White Matter Disease ..... 261 <b>Adeline Vanderver and Andrea L. Gropman</b>
IV.	LEUKODYSTROPHY (WHITE MATTER) DISEASES	23	Mitochondrial Disease: <i>Brain Oxidative Metabolism Studied by <math>^{31}\text{P}</math>, <math>^1\text{H}</math>, and <math>^{13}\text{C}</math> Magnetic Resonance Spectroscopy, Functional Magnetic Resonance Imaging, and Positron Emission Tomography</i> ..... 297 <b>Graham J. Kemp</b>
18	Overview of the Leukoencephalopathies: <i>An MRI Point of View</i> ..... 209 <b>Edwin H. Kolodny</b>		Index ..... 309
