## **PART I. MEASUREMENTS OF DNA DAMAGE, CELL DEATH, AND REGULATORS OF CYTOTOXICITY**

1 In Vitro Micronucleus Technique to Predict Chemosensitivity <b>Michael Fenech</b> .....	3
2 Cell Cycle and Drug Sensitivity <b>Aslamuzzaman Kazi and Q. Ping Dou</b> .....	33
3 TUNEL Assay as a Measure of Chemotherapy-Induced Apoptosis <b>Robert Wieder</b> .....	43
4 Apoptosis Assessment by the DNA Diffusion Assay <b>Narendra P. Singh</b> .....	55
5 PARP Cleavage and Caspase Activity to Assess Chemosensitivity <b>Alok C. Bharti, Yasunari Takada, and Bharat B. Aggarwal</b> .....	69
6 Diphenylamine Assay of DNA Fragmentation for Chemosensitivity Testing <b>Cicek Gercel-Taylor</b> .....	79
7 Immunodetecting Members of the Bcl-2 Family of Proteins <b>Richard B. Lock and Kathleen M. Murphy</b> .....	83
8 Correlation of Telomerase Activity and Telomere Length to Chemosensitivity <b>Yasuhiko Kiyozuka</b> .....	97
9 Application of Silicon Sensor Technologies to Tumor Tissue In Vitro: Detection of Metabolic Correlates of Chemosensitivity <b>Pedro Mestres-Ventura, Andrea Morguet, Anette Schofer, Michael Laue, and Werner Schmidt</b> .....	109
10 Overview of Tumor Cell Chemoresistance Mechanisms <b>Laura Gatti and Franco Zunino</b> .....	127
11 Flow Cytometric Monitoring of Fluorescent Drug Retention and Efflux <b>Awatar Krishan and Ronald M. Hamelik</b> .....	149

12	Flow Cytometric Measurement of Functional and Phenotypic P-Glycoprotein <i>Monica Pallis and Emma Das-Gupta</i> .....	167
13	Measurement of Ceramide and Sphingolipid Metabolism in Tumors: <i>Potential Modulation of Chemosensitivity</i> <i>David E. Modrak</i> .....	183
<b>PART II. GENOMICS, PROTEOMICS, AND CHEMOSENSITIVITY</b>		
14	Gene Expression Profiling to Characterize Anticancer Drug Sensitivity <i>James K. Breaux and Gerrit Los</i> .....	197
15	Identifying Genes Related to Chemosensitivity Using Support Vector Machine <i>Lei Bao</i> .....	233
16	Genetic Manipulation of Yeast to Identify Genes Involved in Regulation of Chemosensitivity <i>Giovanni L. Beretta and Paola Perego</i> .....	241
17	Real-Time RT-PCR (Taqman®) of Tumor mRNA to Predict Sensitivity of Specimens to 5-Fluorouracil <i>Tetsuro Kubota</i> .....	257
18	Use of Proteomics to Study Chemosensitivity <i>Julia Poland, Silke Wandschneider, Andrea Urbani, Sergio Bernardini, Giorgio Federici, and Pranav Sinha</i> .....	267
<b>PART III. IN VIVO ANIMAL MODELING OF CHEMOSENSITIVITY</b>		
19	Clinically Relevant Metastatic Breast Cancer Models to Study Chemosensitivity <i>Lee Su Kim and Janet E. Price</i> .....	285
20	Orthotopic Metastatic (MetaMouse®) Models for Discovery and Development of Novel Chemotherapy <i>Robert M. Hoffman</i> .....	297
21	Preclinical Testing of Antileukemic Drugs Using an In Vivo Model of Systemic Disease <i>Richard B. Lock, Natalia L. Liem, and Rachael A. Papa</i> .....	323
22	Assessing Growth and Response to Therapy in Murine Tumor Models <i>C. Patrick Reynolds, Bee-Chun Sun, Yves A. DeClerck, and Rex A. Moats</i> .....	335

23 Evaluation of Chemosensitivity of Micrometastases  
with Green Fluorescent Protein  
Gene-Tagged Tumor Models in Mice  
**Hayao Nakanishi, Seiji Ito, Yoshinari Mochizuki,  
and Masae Tatematsu ..... 351**

24 <sup>99m</sup>Tc-Annexin A5 Uptake and Imaging to Monitor Chemosensitivity  
**Tarik Z. Belhocine and Francis G. Blankenberg ..... 363**

25 Magnetic Resonance Imaging  
of Tumor Response to Chemotherapy  
**Richard Mazurchuk and Joseph A. Sperryak ..... 381**

26 Metabolic Monitoring of Chemosensitivity with <sup>18</sup>F-FDG PET  
**Guy Jerusalem and Tarik Z. Belhocine ..... 417**

Index ..... 441

Chemosensitivity

Volume II: In Vivo Models, Imaging, and Molecular  
Regulators

Blumenthal, R.D. (Ed.)

2005, XVIII, 442 p., Hardcover

ISBN: 978-1-58829-586-6
