## PART I. METHODS FOR VIRUS ISOLATION AND DETECTION

1	Enhanced Culture Assay for Detection and Quantitation of Latently Infected, Resting CD4 <sup>+</sup> T-Cells Carrying Replication-Competent Virus in HIV-1-Infected Individuals <b>Janet D. Siliciano and Robert F. Siliciano</b> .....	3
2	Isolation, Propagation, and Titration of Human Immunodeficiency Virus Type 1 From Peripheral Blood of Infected Individuals <b>Hanneke Schuitemaker and Neeltje A. Kootstra</b> .....	17
3	Isolation of Human Immunodeficiency Virus Type 1 From Peripheral Blood Monocytes <b>Paul R. Gorry, Secondo Sonza, Katherine Kedzierska, and Suzanne M. Crowe</b> .....	25
4	Isolation, Propagation, and HIV-1 Infection of Monocyte-Derived Macrophages and Recovery of Virus From Brain and Cerebrospinal Fluid <b>Santhi Gorantla, Myhanh Che, and Howard E. Gendelman</b> .....	35
5	Isolation and HIV-1 Infection of Primary Human Microglia From Fetal and Adult Tissue <b>Kathleen Borgmann, Howard E. Gendelman, and Anuja Ghorpade</b> .....	49
6	Isolation of Human Immunodeficiency Virus Type 1 From Semen and Vaginal Fluids <b>Ann A. Kiessling</b> .....	71
7	Isolation and Quantification of HIV From Lymph Nodes <b>Catherine Tamalet</b> .....	87
8	Isolation of Human Immunodeficiency Virus Type 2 Biological Clones From Peripheral Blood Lymphocytes <b>Hetty Blaak</b> .....	95
9	Isolation and Confirmation of Human T-Cell Leukemia Virus Type 2 From Peripheral Blood Mononuclear Cells <b>Michael D. Lairmore and Andy Montgomery</b> .....	113

10	Isolation of Foamy Viruses From Peripheral Blood Lymphocytes <b>Joëlle Tobaly-Tapiero, Patricia Bittoun, and Ali Saïb .....</b>	<b>125</b>
11	<i>Alu</i> -LTR Real-Time Nested PCR Assay for Quantifying Integrated HIV-1 DNA <b>Audrey Brussel, Olivier Delelis, and Pierre Sonigo .....</b>	<b>139</b>
12	Quantification of HFV-Integrated DNA in Human Cells by <i>Alu</i> -LTR Real-Time PCR <b>Olivier Delelis, Audrey Brussel, and Pierre Sonigo .....</b>	<b>155</b>
13	Detection of HIV-1 Provirus and RNA by <i>In Situ</i> Amplification <b>Alcina Nicol and Gerard J. Nuovo .....</b>	<b>171</b>
14	Detection of HTLV-1 Gene on Cytologic Smear Slides <b>Kenji Kashima, Tsutomu Daa, and Shigeo Yokoyama .....</b>	<b>183</b>
15	Detection of HIV-2 by PCR <b>Feng Gao .....</b>	<b>191</b>
16	Quantitation of HIV-1 Viral RNA in Blood Plasma and Genital Secretions <b>Susan A. Fiscus .....</b>	<b>201</b>
17	Quantification of Proviral DNA Load of Human Immunodeficiency Virus Type 2 Subtypes A and B Using Real-Time PCR <b>Marie Gueudin, Florence Damond, and François Simon .....</b>	<b>215</b>
18	Plasma RNA Viral Load in HIV-1 Group O Infection by Real-Time PCR <b>Marie Gueudin and François Simon .....</b>	<b>221</b>
19	A New Combined HIV p24 Antigen and Anti-HIV-1/2/O Screening Assay <b>Susanne Polywka, Hedwig Duttmann, Frank Lübben, Rainer Laufs, and Jürgen Feldner .....</b>	<b>229</b>
20	A New Automated Fourth-Generation HIV Screening Assay With Sensitive Antigen Detection Module and High Specificity <b>Bernard Weber .....</b>	<b>245</b>
21	Detection of Antiviral Antibodies Using Enzyme-Linked Immunosorbent Assay <b>Ingrid G. Winkler .....</b>	<b>257</b>
22	Plaque-Reduction Assays for Human and Simian Immunodeficiency Virus Neutralization <b>Anna Nordqvist and Eva Maria Fenyö .....</b>	<b>273</b>
23	Detection of Drug-Resistant HIV-1 Strains <b>Ann A. Kiessling, S. J. Eyre, and B. D. Desmarais .....</b>	<b>287</b>

## PART II. MOLECULAR BIOLOGY METHODS

24	Determination of Cell Tropism of HIV-1 <b>Neeltje A. Kootstra and Hanneke Schuitemaker</b> .....	317
25	Determination of Co-Receptor Usage of HIV-1 <b>Hanneke Schuitemaker and Neeltje A. Kootstra</b> .....	327
26	Quantitative Evaluation of HIV and SIV Co-Receptor Use With GHOST(3) Cell Assay <b>Dalma Vödrös and Eva Maria Fenyö</b> .....	333
27	Phenotypic Characterization of Blood Monocytes From HIV-Infected Individuals <b>Philip J. Ellery and Suzanne M. Crowe</b> .....	343
28	Methods to Determine HIV-1 Ex Vivo Fitness <b>Awet Abraha, Ryan M. Troyer, Miguel E. Quiñones-Mateu, and Eric J. Arts</b> .....	355
29	A Yeast Recombination-Based Cloning System to Produce Chimeric HIV-1 Viruses and Express HIV-1 Genes <b>Dawn M. Moore, Eric J. Arts, Yong Gao, and Andre J. Marozsan</b> ...	369
30	PCR Amplification, Cloning, and Construction of HIV-1 Infectious Molecular Clones From Virtually Full-Length HIV-1 Genomes <b>Philip K. Ehrenberg and Nelson L. Michael</b> .....	387
31	Amplification and Cloning of Near Full-Length HIV-2 Genomes <b>Feng Gao</b> .....	399
32	Growth and Manipulation of a Human T-Cell Leukemia Virus Type 2 Full-Length Molecular Clone <b>Matthew Anderson and Patrick L. Green</b> .....	409
33	Construction and Analysis of Genomic, Full-Length Infectious Foamy Virus DNA Clones <b>Roman Wirtz and Martin Löchelt</b> .....	423
34	Molecular Characterization of Proteolytic Processing of the Gag Proteins of Human Spumaretrovirus <b>Klaus-Ingmar Pfrepper and Rolf M. Flügel</b> .....	435
35	Assessing the Relative Efficacy of Antiretroviral Activity of Different Drugs on Macrophages <b>Stefano Aquaro and Carlo-Federico Perno</b> .....	445
36	Gene Expression Profiling of HIV-1 Infection Using cDNA Microarrays <b>Angélique B. van 't Wout</b> .....	455

37 Determination of DC-SIGN and DC-SIGNR Repeat Region  
Variations  
*Huanliang Liu and Tuofu Zhu ..... 471*
