
Contents

Preface	v
Contributors	xi
Color Plates	xiii
1 Multiple Myeloma: <i>Challenges and Opportunities</i> Douglas Joshua, Ross D. Brown, and P. Joy Ho	1
2 Immunophenotyping of Plasma Cells in Multiple Myeloma Gema Mateo Manzanera, Jesús F. San Miguel Izquierdo, and Alberto Orfao de Matos	5
3 Plasma Cell Labeling Index Philip R. Greipp and Shaji Kumar	25
4 Conventional Cytogenetics in Myeloma Lynda J. Campbell	37
5 Multicolor Spectral Karyotyping in Multiple Myeloma Jeffrey R. Sawyer	49
6 Detection of Chromosome 13 Deletions by Fluorescent <i>In Situ</i> Hybridization Scott VanWier and Rafael Fonseca	59
7 Comparative Genomic Hybridization for Analysis of Changes in DNA Copy Number in Multiple Myeloma Pulivarthi H. Rao	71
8 Southern Blotting of IgH Rearrangements in B-Cell Disorders Edna Yuen and Ross D. Brown	85
9 Identification and Assembly of V Genes As Idiotypic-Specific DNA Fusion Vaccines in Multiple Myeloma Surinder S. Sahota, Mark Townsend, and Freda K. Stevenson	105
10 Identification of Clonotypic IgH VDJ Sequences in Multiple Myeloma Brian J. Taylor, Jitra Kriangkum, Erin R. Strachan, Juanita Wizniak, and Linda M. Pilarski	121
11 Real-Time Polymerase Chain Reaction of Immunoglobulin Rearrangements for Quantitative Evaluation of Minimal Residual Disease in Myeloma Mara Compagno, Barbara Mantoan, Monica Astolfi, Mario Boccadoro, and Marco Ladetto	145

12	Incomplete DJH Rearrangements David González and Ramón García-Sanz	165
13	Identification of Malignant Plasma Cells by mRNA <i>In Situ</i> Hybridization Ross D. Brown and P. Joy Ho	175
14	The SCID-hu Myeloma Model Joshua Epstein and Shmuel Yaccoby	183
15	The 5T2MM Murine Model of Multiple Myeloma: <i>Maintenance and Analysis</i> Karin Vanderkerken, Kewal Asosingh, Angelo Willems, Hendrik De Raeve, Pedro Couck, Frans Gorus, Peter Croucher, and Ben Van Camp	191
16	Determination of Telomerase Activity and Telomere Length Kai-da Wu and Malcolm A. S. Moore	207
17	Dendritic Cell/Myeloma Hybrid Vaccine Dajing Xia, Tim Chan, and Jim Xiang	225
18	Genetically Engineered Myeloma Cell Vaccine Siguo Hao, Tim Chan, and Jim Xiang	235
19	An In Vitro Osteoclast-Forming Assay to Measure Myeloma Cell-Derived Osteoclast-Activating Factors Andrew C. W. Zannettino, Amanda N. Farrugia, L. Bik To, and Gerald J. Atkins	245
20	Clonality Detection of the Expanded T-Cell Populations in Patients With Multiple Myeloma Daniel M-Y. Sze	257
21	Detecting Mismatch Repair Defects in Myeloma Mark Velangi, Elizabeth Matheson, Andrew Hall, and Julie Irving	269
22	Methylation-Specific Polymerase Chain Reaction Oliver Galm and James G. Herman	279
23	Making Sense of DNA Microarray Data Wei-min Liu, Sunhee K. Ro, and Walter H. Koch	293
	Index	305

Multiple Myeloma

Methods and Protocols

Brown, R.D.; Ho, P.J. (Eds.)

2005, XIV, 310 p. 70 illus., 1 illus. in color., Hardcover

ISBN: 978-1-58829-392-3
