

CONTENTS

Preface	v
Contributors	ix

PART I. THEORY AND TECHNICAL CONCEPT

1 Computational Biology: <i>Are We There Yet?</i>	3
<i>Gary Peltz</i>	
2 Statistical Theory in QTL Mapping	33
<i>Benjamin Yakir, Anne Pisanté, and Ariel Darvasi</i>	
3 Haplotype-Based Computational Genetic Analysis In Mice	51
<i>Jianmei Wang and Gary Peltz</i>	
4 Haplotype Structure of the Mouse Genome	71
<i>Jianmei Wang, Guochun Liao, Janet Cheng, Anh Nguyen, Jingshu Guo, Christopher Chou, Steven Hu, Sharon Jiang, John Allard, Steve Shafer, Anne Puech, John D. McPherson, Dorothee Foernzler, Gary Peltz, and Jonathan Usuka</i>	
5 SNP Discovery and Genotyping: <i>Methods and Applications</i>	85
<i>Jun Wang, Dee Aud, Soren Germer, and Russell Higuchi</i>	

PART II. SELECTED EXAMPLES: MURINE MODELS OF HUMAN DISEASE

6 Genetic and Genomic Approaches to Complex Lung Diseases Using Mouse Models	103
<i>Michael J. Holtzman, Edy Y. Kim, and Jeffrey D. Morton</i>	
7 Murine Models of Osteoporosis	147
<i>Robert F. Klein</i>	
8 Murine Models of Substance and Alcohol Dependence: <i>Unraveling Genetic Complexities</i>	177
<i>Kim Cronise and John C. Crabbe</i>	
9 Murine Models of Alcoholism: <i>From QTL to Gene</i>	199
<i>Chris Downing, Beth Bennett, and Thomas E. Johnson</i>	

PART III. SELECTED EXAMPLES:

THE GENETIC BASIS FOR HUMAN DISEASE

10	HLA Polymorphism and Disease Susceptibility	255
	<i>Henry A. Erlich</i>	
11	Asthma Genetics: <i>A Case Study</i>	269
	<i>William Cookson</i>	
	Index	301
