Preface .....	v
Contributors .....	xiii

## PART I. THE CLINICAL SCOPE OF FIBROSIS

1 Pulmonary Fibrosis <i>David A. Zisman, Michael P. Keane, John A. Belperio, Robert M. Strieter, and Joseph P. Lynch, III</i> .....	3
2 Renal Fibrosis <i>H. William Schnaper</i> .....	45
3 Transforming Growth Factor- $\beta$ : A Key Mediator of Fibrosis <i>Alain Mauviel</i> .....	69

## PART II. REGULATION OF EXTRACELLULAR MATRIX METABOLISM: CULTURED CELLS

4 Isolation and Culture of Skin Fibroblasts <i>Laure Rittié and Gary J. Fisher</i> .....	83
5 Isolation and Culture of Hepatic Stellate Cells <i>Ralf Weiskirchen and Axel M. Gressner</i> .....	99
6 Isolation and Phenotypic Characterization of Lung Fibroblasts <i>Carolyn J. Baglole, Sireesha Y. Reddy, Stephen J. Pollock, Steven E. Feldon, Patricia J. Sime, Terry J. Smith, and Richard P. Phipps</i> .....	115
7 Methods for Measuring Type I Collagen Synthesis In Vitro <i>David C. Rishikof, Ping-Ping Kuang, Mangalalaxmy Subramanian, and Ronald H. Goldstein</i> .....	129
8 Methods for Assessing the Molecular Mechanisms Controlling Gene Regulation <i>Richard A. Rippe and Branko Stefanovic</i> .....	141
9 Methods for Measuring TGF- $\beta$ Using Antibodies, Cells, and Mice <i>Vladimir Jurukovski, Branka Dabovic, Vesna Todorovic, Yan Chen, and Daniel B. Rifkin</i> .....	161

## PART III. STUDYING FIBROSIS USING ANIMAL MODELS

10 Morphological Methods for Assessment of Fibrosis <i>Rakesh K. Kumar</i> .....	179
---	-----

11	Methods for Measuring Hydroxyproline and Estimating In Vivo Rates of Collagen Synthesis and Degradation <b>Robin J. McNulty</b> .....	189
12	Approaches to Evaluation of Fibrogenic Pathways in Surgical Lung Biopsy Specimens <b>Cory M. Hogaboam, Kristin J. Carpenter, Holly Evanoff, and Steven L. Kunkel</b> .....	209
13	Animal Models for Adult Dermal Wound Healing <b>Mary Birch, Annette Tomlinson, and Mark W. J. Ferguson</b> .....	223
14	Modeling Liver Fibrosis in Rodents <b>Christothea Constandinou, Neil Henderson, and John P. Iredale</b> .....	237
15	Animal Models of Pulmonary Fibrosis <b>Mehrnaz Gharaee-Kermani, Matthew Ullenbruch, and Sem H. Phan</b> .....	251
16	Animal Models of Renal Fibrosis <b>Michael Zeisberg, Mary A. Soubasakos, and Raghu Kalluri</b> .....	261
17	Animal Models of Cardiac Fibrosis <b>Yao Sun and Karl T. Weber</b> .....	273

#### PART IV. GENETIC APPROACHES TO STUDYING FIBROSIS

18	Finding Fibrosis Genes: <i>The Lung</i> <b>Lauranell H. Burch and David A. Schwartz</b> .....	293
19	Genetic Studies to Identify Hepatic Fibrosis Genes and SNPs in Human Populations <b>Christopher Paul Day</b> .....	315
20	Analysis of Microarray Experiments for Pulmonary Fibrosis <b>Nilesh B. Davé and Naftali Kaminski</b> .....	333
21	DNA Microarrays and Data Mining to Study Hepatic Fibrosis <b>Bernd Schnabl, Youkyung Hwang Choi, Curt H. Hagedorn, and Ramón Bataller</b> .....	359
22	Analysis of Proteins Dominantly Expressed in Hepatic Stellate Cells of Activated Phenotype: <i>The Molecular Approach for Liver Fibrosis</i> <b>Norifumi Kawada</b> .....	371

Index	.....	381
