

Contents

Preface.....	v
1 Introduction.....	1
1.1 Queues and Queuing Theory	1
1.2 Models of Queuing Control	2
1.2.1 Introduction.....	2
1.2.2 Control of the Number of Servers.....	2
1.2.3 Control of the Service Rate.....	4
1.2.4 Control of the Queue Discipline	5
1.2.5 Control of the Admission of Customers	6
1.3 Methodologies of Queuing Control	7
1.3.1 Dynamic Programming	7
1.3.2 Heuristic Algorithms.....	9
1.3.3 Fuzzy Logic Control	9
1.4 Control of Queuing Systems.....	11
1.5 Issues of Fuzzy Queuing Control.....	12
1.6 Applications of Queuing Control.....	13
2 Fuzzy Logic.....	15
2.1 Fuzzy Sets.....	15
2.2 Operations of Fuzzy Sets	17
2.3 The Extension Principle.....	20
2.4 Linguistic Variables.....	22
2.5 Fuzzy Reasoning.....	23
2.6 Rules of Inference.....	23
2.7 Mamdani Implication	24
3 Knowledge and Fuzzy Control.....	27
3.1 Introduction	27
3.2 Knowledge-Based Systems as Controllers	27
3.3 Fuzzification	28
3.4 Knowledge Base	29
3.5 Inference Engine.....	32
3.6 Defuzzification	33
3.7 Design Parameters of a Fuzzy Logic Controller	35
3.8 Fuzzy Queue Control.....	35

4	Control of the Service Activities	37
4.1	Introduction	37
4.2	Single Server with Vacations.....	37
4.2.1	Problem Description	37
4.2.2	Architecture of the Fuzzy Knowledge-Based Controller	39
4.2.3	A Numerical Example	44
4.2.4	An Extension	46
4.3	Parallel Servers with Vacations	47
4.3.1	Problem Description	47
4.3.2	Fuzzy Controller	48
4.3.3	A Numerical Example	52
4.4	Single Server without Switching Costs.....	54
4.4.1	Problem Description	54
4.4.2	Fuzzy Controller	55
4.4.3	A Numerical Example	56
4.5	Single Server with Switching Costs.....	57
4.5.1	Problem Description	57
4.5.2	Fuzzy Controller	58
4.5.3	A Numerical Example	59
4.6	Tandem Servers without Service Costs	60
4.6.1	Problem Description	60
4.6.2	Fuzzy Controller	61
4.6.3	A Numerical Example	62
4.7	Tandem Servers with Service Costs	64
4.7.1	Problem Description	64
4.7.2	Fuzzy Controller	64
4.7.3	A Numerical Example	66
5	Control of the Queue Discipline.....	69
5.1	Introduction	69
5.2	Parallel Servers with Different Service Rates.....	69
5.2.1	Problem Description	69
5.2.2	Fuzzy Controller	70
5.2.3	A Numerical Example	73
5.3	Parallel Servers with Heterogeneity in Service Functions.....	75
5.3.1	Problem Description	75
5.3.2	Fuzzy Controller	76
5.3.3	A Numerical Example	79
5.4	Parallel Servers with Different Service Rates and Service Functions	79
5.4.1	Problem Description	79
5.4.2	Fuzzy Controller	80
5.4.3	A Numerical Example	82
5.5	Queuing System with Heterogeneous Servers	83
5.5.1	Problem Description	83
5.5.2	Fuzzy Controller	84
5.5.3	A Numerical Example	86
5.6	Parallel Servers with Two Uncontrolled Arrival Streams	88

5.6.1 Problem Description	88
5.6.2 Fuzzy Controller	88
5.6.3 A Numerical Example	91
6 Control of the Admission of Customers	95
6.1 Introduction	95
6.2 Single Server with One Arrival Stream	95
6.2.1 Problem Description	95
6.2.2 Fuzzy Controller	96
6.2.3 A Numerical Example	98
6.3 Parallel Servers with One Arrival Stream.....	100
6.3.1 Problem Description	100
6.3.2 Fuzzy Controller	101
6.3.3 A Numerical Example	101
6.4 Parallel Servers with Two Arrival Streams	102
6.4.1 Problem Description	102
6.4.2 Fuzzy Controller	102
6.4.3 A Numerical Example	104
6.5 Two Stations in Tandem with Their Own Arrival Streams	104
6.5.1 Problem Description	104
6.5.2 Fuzzy Controller	105
6.5.3 A Numerical Example	114
7 Coordinating Multiple Control Policies	117
7.1 Introduction	117
7.2 Two Stations in Tandem with Two Arrival Streams	117
7.2.1 Problem Description	117
7.2.2 Fuzzy Controller	118
7.2.3 A Numerical Example	123
7.3 Two Stations in Tandem with Two Arrival Streams and Service Costs.....	124
7.3.1 Problem Description	124
7.3.2 Fuzzy Controller	124
7.3.3 A Numerical Example	127
7.4 Three-Station Network with Two Arrival Streams.....	128
7.4.1 Problem Description	128
7.4.2 Fuzzy Controller	128
7.4.3 A Numerical Example	131
7.5 Three-Station Network with Controlled and Uncontrolled Arrivals.....	132
7.5.1 Problem Description	132
7.5.2 Fuzzy Controller	133
7.5.3 A Numerical Example	135
8 Applications of Fuzzy Queuing Control to the Internet	137
8.1 Introduction	137
8.2 Drop and Delay Balancing in the Differentiated Services	139
8.2.1 Problem Description	139

8.2.2 Fuzzy Controller	140
8.2.3 A Numerical Example	141
8.2.4 Performance Evaluation.....	143
8.3 Congestion Control in the Differentiated Services	145
8.3.1 Problem Description	145
8.3.2 Fuzzy Controller	145
8.3.3 Performance Evaluation.....	148
8.4 Quality of Service Routing for Next-Generation Networks	148
8.4.1 Problem Description	148
8.4.2 Fuzzy Routing.....	149
8.4.3 Performance Evaluation.....	151
9 Closure	155
Appendix: Markov Queuing Models and Simulation.....	157
A.1 Introduction.....	157
A.2 Simulating Random Variables.....	157
A.3 The Memoryless Assumption.....	160
A.4 Continuous-Time Markov Chains	162
A.5 Simulation of a Markov Queuing System	165
References	169
Index.....	173

Fuzzy Control of Queuing Systems

Zhang, R.; Phillis, Y.; Kouikoglou, V.

2005, X, 175 p., Hardcover

ISBN: 978-1-85233-824-4
