## Contents

<b>Preface</b> .....	vii
<b>1 Formulation of the Problems and Their Nonstationary Boundary Integral Equations</b> .....	1
1.1 The Initial-Boundary Value Problems .....	1
1.2 A Matrix of Fundamental Solutions .....	8
1.3 Time-dependent Plate Potentials .....	13
1.4 Nonstationary Boundary Integral Equations .....	16
<b>2 Problems with Dirichlet Boundary Conditions</b> .....	19
2.1 Function Spaces .....	19
2.2 Solvability of the Transformed Problems .....	21
2.3 Solvability of the Time-dependent Problems .....	28
<b>3 Problems with Neumann Boundary Conditions</b> .....	37
3.1 The Poincaré–Steklov Operators .....	37
3.2 Solvability of the Problems .....	42
<b>4 Boundary Integral Equations for Problems with Dirichlet and Neumann Boundary Conditions</b> .....	43
4.1 Time-dependent Potentials .....	43
4.2 Nonstationary Boundary Integral Equations .....	51
4.3 The Direct Method .....	53
<b>5 Transmission Problems and Multiply Connected Plates</b> ...	57
5.1 Infinite Plate with a Finite Inclusion .....	57
5.2 Multiply Connected Finite Plate .....	64
5.3 Finite Plate with an Inclusion .....	75

<b>6</b>	<b>Plate Weakened by a Crack</b> .....	81
6.1	Formulation and Solvability of the Problems .....	81
6.2	The Poincaré–Steklov Operator .....	85
6.3	Time-dependent Potentials .....	87
6.4	Infinite Plate with a Crack .....	91
6.5	Finite Plate with a Crack .....	93
<b>7</b>	<b>Initial-Boundary Value Problems with Other Types of Boundary Conditions</b> .....	99
7.1	Mixed Boundary Conditions .....	99
7.2	Combined Boundary Conditions .....	108
7.3	Elastic Boundary Conditions .....	114
<b>8</b>	<b>Boundary Integral Equations for Plates on a Generalized Elastic Foundation</b> .....	119
8.1	Formulation and Solvability of the Problems .....	119
8.2	A Matrix of Fundamental Solutions .....	121
8.3	Properties of the Boundary Operators .....	126
8.4	Solvability of the Boundary Equations .....	127
<b>9</b>	<b>Problems with Nonhomogeneous Equations and Nonhomogeneous Initial Conditions</b> .....	129
9.1	The Time-dependent Area Potential .....	129
9.2	The Nonhomogeneous Equation of Motion .....	131
9.3	Initial Potentials .....	133
<b>A</b>	<b>The Fourier and Laplace Transforms of Distributions</b> .....	139
	<b>References</b> .....	145
	<b>Index</b> .....	147

Variational and Potential Methods for a Class of Linear  
Hyperbolic Evolutionary Processes

Chudinovich, I.

2005, XII, 148 p., Hardcover

ISBN: 978-1-85233-888-6
