

## *Series Editors*

Professor Michael J. Grimble, Professor of Industrial Systems and Director  
Professor Emeritus Michael A. Johnson, Professor of Control Systems and Deputy Director  
Industrial Control Centre, Department of Electronic and Electrical Engineering,  
University of Strathclyde, Graham Hills Building, 50 George Street, Glasgow G1 1QE, U.K.

## *Other titles published in this series:*

### *Genetic Algorithms*

K.F. Man, K.S. Tang and S. Kwong

### *Neural Networks for Modelling and Control of Dynamic Systems*

M. Nørgaard, O. Ravn, L.K. Hansen and N.K. Poulsen

### *Modelling and Control of Robot Manipulators (2nd Edition)*

L. Sciavicco and B. Siciliano

### *Fault Detection and Diagnosis in Industrial Systems*

L.H. Chiang, E.L. Russell and R.D. Braatz

### *Soft Computing*

L. Fortuna, G. Rizzotto, M. Lavorgna, G. Nunnari, M.G. Xibilia and R. Caponetto

### *Statistical Signal Processing*

T. Chonavel

### *Discrete-time Stochastic Processes (2nd Edition)*

T. Söderström

### *Parallel Computing for Real-time Signal Processing and Control*

M.O. Tokhi, M.A. Hossain and M.H. Shaheed

### *Multivariable Control Systems*

P. Albertos and A. Sala

### *Control Systems with Input and Output Constraints*

A.H. Glattfelder and W. Schaufelberger

### *Analysis and Control of Non-linear Process Systems*

K. Hangos, J. Bokor and G. Szederkényi

### *Model Predictive Control (2nd Edition)*

E.F. Camacho and C. Bordons

### *Digital Self-tuning Controllers*

V. Bobál, J. Böhm, J. Fessl and J. Macháček

### *Control of Robot Manipulators in Joint Space*

R. Kelly, V. Santibáñez and A. Loria

Publication due July 2005

### *Robust Control Design with MATLAB®*

D.-W. Gu, P.Hr. Petkov and M.M. Konstantinov

Publication due July 2005

### *Active Noise and Vibration Control*

M.O. Tokhi

Publication due November 2005

A. Zaknich

# Contents

<b>Part I Introduction</b>	<b>1</b>
<b>1 Adaptive Filtering</b>	<b>3</b>
1.1 Linear Adaptive Filters	5
1.1.1 Linear Adaptive Filter Algorithms	7
1.2 Nonlinear Adaptive Filters	9
1.2.1 Adaptive Volterra Filters	9
1.3 Nonclassical Adaptive Systems	10
1.3.1 Artificial Neural Networks	10
1.3.2 Fuzzy Logic	11
1.3.3 Genetic Algorithms	11
1.4 A Brief History and Overview of Classical Theories	12
1.4.1 Linear Estimation Theory	12
1.4.2 Linear Adaptive Filters	13
1.4.3 Adaptive Signal Processing Applications	14
1.4.4 Adaptive Control	16
1.5 A Brief History and Overview of Nonclassical Theories	17
1.5.1 Artificial Neural Networks	17
1.5.2 Fuzzy Logic	18
1.5.3 Genetic Algorithms	18
1.6 Fundamentals of Adaptive Networks	19
1.7 Choice of Adaptive Filter Algorithm	23
<b>2 Linear Systems and Stochastic Processes</b>	<b>25</b>
2.1 Basic Concepts of Linear Systems	27
2.2 Discrete-time Signals and Systems	29
2.3 The Discrete Fourier Transform (DFT)	31
2.3.1 Discrete Linear Convolution using the DFT	32
2.3.2 Digital Sampling Theory	33
2.3.2.1 Analogue Interpretation Formula	37
2.4 The Fast Fourier Transform	37
2.5 The z-Transform	40
2.5.1 Relationship between Laplace Transform and z-Transform	40
2.5.1.1 Bilateral z-Transform	41

2.5.1.2	Unilateral z-Transform .....	42
2.5.1.3	Region of Convergence (ROC) for the z-Transform ..	42
2.5.1.4	Region of Convergence (ROC) for General Signals..	43
2.5.2	General Properties of the DFT and z-Transform.....	44
2.6	Summary of Discrete-Time LSI Systems.....	46
2.7	Special Classes of Filters .....	48
2.7.1	Phase Response from Frequency Magnitude Response.....	50
2.8	Linear Algebra Summary.....	51
2.8.1	Vectors .....	51
2.8.2	Linear Independence, Vector Spaces, and Basic Vectors.....	52
2.8.3	Matrices.....	53
2.8.4	Linear Equations .....	55
2.8.5	Special Matrices .....	56
2.8.6	Quadratic and Hermitian Forms .....	59
2.8.7	Eigenvalues and Eigenvectors .....	59
2.9	Introduction to Stochastic Processes.....	61
2.10	Random Signals .....	63
2.11	Basic Descriptive Models of Random Signals .....	64
2.11.1	The Mean Square Value and Variance.....	64
2.11.2	The Probability Density Function.....	65
2.11.3	Jointly Distributed Random Variables.....	68
2.11.4	The Expectation Operator .....	68
2.11.5	The Autocorrelation and Related Functions .....	69
2.11.6	Power Spectral Density Functions.....	72
2.11.7	Coherence Function.....	73
2.11.8	Discrete Ergodic Random Signal Statistics .....	74
2.11.9	Autocovariance and Autocorrelation Matrices .....	75
2.11.10	Spectrum of a Random Process .....	76
2.11.11	Filtering of Random Processes .....	78
2.11.12	Important Examples of Random Processes .....	80
2.11.12.1	Gaussian Process .....	80
2.11.12.2	White Noise .....	80
2.11.12.3	White Sequences .....	81
2.11.12.4	Gauss-Markov Processes .....	81
2.11.12.5	The Random Telegraph Wave .....	81
2.12	Exercises.....	82
2.12.1	Problems.....	82
<hr/> <b>Part II Modelling</b>		<b>87</b>
<b>3</b>	<b>Optimisation and Least Square Estimation .....</b>	<b>89</b>
3.1	Optimisation Theory.....	89
3.2	Optimisation Methods in Digital Filter Design .....	91
3.3	Least Squares Estimation.....	95
3.4	Least Squares Maximum Likelihood Estimator .....	97

3.5	Linear Regression – Fitting Data to a Line .....	98
3.6	General Linear Least Squares .....	99
3.7	A Ship Positioning Example of LSE.....	100
3.8	Acoustic Positioning System Example.....	104
3.9	Measure of LSE Precision .....	108
3.10	Measure of LSE Reliability.....	109
3.11	Limitations of LSE.....	110
3.12	Advantages of LSE .....	110
3.13	The Singular Value Decomposition.....	111
3.13.1	The Pseudoinverse.....	112
3.13.2	Computation of the SVD .....	112
3.13.2.1	The Jacobi Algorithm .....	112
3.13.2.2	The QR Algorithm.....	115
3.14	Exercises.....	116
3.14.1	Problems.....	116
<b>4</b>	<b>Parametric Signal and System Modelling .....</b>	<b>119</b>
4.1	The Estimation Problem .....	120
4.2	Deterministic Signal and System Modelling .....	121
4.2.1	The Least Squares Method .....	122
4.2.2	The Padé Approximation Method .....	124
4.2.3	Prony's Method.....	127
4.2.3.1	All-Pole Modelling using Prony's Method .....	130
4.2.3.2	Linear Prediction .....	131
4.2.3.3	Digital Wiener Filter.....	132
4.2.4	Autocorrelation and Covariance Methods .....	133
4.3	Stochastic Signal Modelling .....	137
4.3.1	Autoregressive Moving Average Models .....	137
4.3.2	Autoregressive Models.....	139
4.3.3	Moving Average Models.....	140
4.4	The Levinson-Durbin Recursion and Lattice Filters .....	141
4.4.1	The Levinson-Durbin Recursion Development.....	142
4.4.1.1	Example of the Levinson-Durbin Recursion.....	145
4.4.2	The Lattice Filter.....	146
4.4.3	The Cholesky Decomposition .....	149
4.4.4	The Levinson Recursion.....	151
4.5	Exercises.....	154
4.5.1	Problems.....	154
<hr/> <b>Part III Classical Filters and Spectral Analysis</b>		<b>157</b>
<b>5</b>	<b>Optimum Wiener Filter .....</b>	<b>159</b>
5.1	Derivation of the Ideal Continuous-time Wiener Filter .....	160
5.2	The Ideal Discrete-time FIR Wiener Filter .....	162
5.2.1	General Noise FIR Wiener Filtering .....	164

5.2.2	FIR Wiener Linear Prediction .....	165
5.3	Discrete-time Causal IIR Wiener Filter .....	167
5.3.1	Causal IIR Wiener Filtering .....	169
5.3.2	Wiener Deconvolution .....	170
5.4	Exercises .....	171
5.4.1	Problems .....	171
<b>6</b>	<b>Optimal Kalman Filter .....</b>	<b>173</b>
6.1	Background to The Kalman Filter .....	173
6.2	The Kalman Filter .....	174
6.2.1	Kalman Filter Examples .....	181
6.3	Kalman Filter for Ship Motion .....	185
6.3.1	Kalman Tracking Filter Proper .....	186
6.3.2	Simple Example of a Dynamic Ship Models .....	189
6.3.3	Stochastic Models .....	192
6.3.4	Alternate Solution Models .....	192
6.3.5	Advantages of Kalman Filtering .....	193
6.3.6	Disadvantages of Kalman Filtering .....	193
6.4	Extended Kalman Filter .....	194
6.5	Exercises .....	194
6.5.1	Problems .....	194
<b>7</b>	<b>Power Spectral Density Analysis .....</b>	<b>197</b>
7.1	Power Spectral Density Estimation Techniques .....	198
7.2	Nonparametric Spectral Density Estimation .....	199
7.2.1	Periodogram Power Spectral Density Estimation .....	199
7.2.2	Modified Periodogram – Data Windowing .....	203
7.2.3	Bartlett’s Method – Periodogram Averaging .....	205
7.2.4	Welch’s Method .....	206
7.2.5	Blackman-Tukey Method .....	208
7.2.6	Performance Comparisons of Nonparametric Models .....	209
7.2.7	Minimum Variance Method .....	209
7.2.8	Maximum Entropy (All Poles) Method .....	212
7.3	Parametric Spectral Density Estimation .....	215
7.3.1	Autoregressive Methods .....	215
7.3.1.1	Yule-Walker Approach .....	216
7.3.1.2	Covariance, Least Squares and Burg Methods .....	217
7.3.1.3	Model Order Selection for the Autoregressive Methods .....	218
7.3.2	Moving Average Method .....	218
7.3.3	Autoregressive Moving Average Method .....	219
7.3.4	Harmonic Methods .....	219
7.3.4.1	Eigendecomposition of the Autocorrelation Matrix .....	219
7.3.4.1.1	Pisarenko’s Method .....	221
7.3.4.1.2	MUSIC .....	222

7.4	Exercises .....	223
7.4.1	Problems .....	223
<hr/>		
<b>Part IV Adaptive Filter Theory</b>		<b>225</b>
<hr/>		
<b>8</b>	<b>Adaptive Finite Impulse Response Filters .....</b>	<b>227</b>
8.1	Adaptive Interference Cancelling .....	228
8.2	Least Mean Squares Adaptation .....	230
8.2.1	Optimum Wiener Solution .....	231
8.2.2	The Method of Steepest Gradient Descent Solution .....	233
8.2.3	The LMS Algorithm Solution .....	235
8.2.4	Stability of the LMS Algorithm .....	237
8.2.5	The Normalised LMS Algorithm .....	239
8.3	Recursive Least Squares Estimation .....	239
8.3.1	The Exponentially Weighted Recursive Least Squares Algorithm .....	240
8.3.2	Recursive Least Squares Algorithm Convergence .....	243
8.3.2.1	Convergence of the Filter Coefficients in the Mean .....	243
8.3.2.2	Convergence of the Filter Coefficients in the Mean Square .....	244
8.3.2.3	Convergence of the RLS Algorithm in the Mean Square .....	244
8.3.3	The RLS Algorithm as a Kalman Filter .....	244
8.4	Exercises .....	245
8.4.1	Problems .....	245
<b>9</b>	<b>Frequency Domain Adaptive Filters .....</b>	<b>247</b>
9.1	Frequency Domain Processing .....	247
9.1.1	Time Domain Block Adaptive Filtering .....	248
9.1.2	Frequency Domain Adaptive Filtering .....	249
9.1.2.1	The Overlap-Save Method .....	251
9.1.2.2	The Overlap-Add Method .....	254
9.1.2.3	The Circular Convolution Method .....	255
9.1.2.4	Computational Complexity .....	256
9.2	Exercises .....	256
9.2.1	Problems .....	256
<b>10</b>	<b>Adaptive Volterra Filters .....</b>	<b>257</b>
10.1	Nonlinear Filters .....	257
10.2	The Volterra Series Expansion .....	259
10.3	A LMS Adaptive Second-order Volterra Filter .....	259
10.4	A LMS Adaptive Quadratic Filter .....	261
10.5	A RLS Adaptive Quadratic Filter .....	262
10.6	Exercises .....	264

10.6.1	Problems.....	264
<b>11</b>	<b>Adaptive Control Systems .....</b>	<b>267</b>
11.1	Main Theoretical Issues .....	268
11.2	Introduction to Model-reference Adaptive Systems.....	270
11.2.1	The Gradient Approach .....	271
11.2.2	Least Squares Estimation .....	273
11.2.3	A General Single-input-single-output MRAS.....	274
11.2.4	Lyapunov's Stability Theory .....	277
11.3	Introduction to Self-tuning Regulators.....	280
11.3.1	Indirect Self-tuning Regulators.....	282
11.3.2	Direct Self-tuning Regulators .....	283
11.4	Relations between MRAS and STR.....	284
11.5	Applications .....	285
<hr/> <b>Part V Nonclassical Adaptive Systems</b>		<b>287</b>
<b>12</b>	<b>Introduction to Neural Networks .....</b>	<b>289</b>
12.1	Artificial Neural Networks.....	289
12.1.1	Definitions .....	290
12.1.2	Three Main Types .....	290
12.1.3	Specific Artificial Neural Network Paradigms .....	292
12.1.4	Artificial Neural Networks as Black Boxed .....	293
12.1.5	Implementation of Artificial Neural Networks .....	294
12.1.6	When to Use an Artificial Neural Network .....	295
12.1.7	How to Use an Artificial Neural Network .....	295
12.1.8	Artificial Neural Network General Applications .....	296
12.1.9	Simple Application Examples .....	297
12.1.9.1	Sheep Eating Phase Identification from Jaw Sounds .....	298
12.1.9.2	Hydrate Particle Isolation in SEM Images.....	298
12.1.9.3	Oxalate Needle Detection in Microscope Images....	299
12.1.9.4	Water Level Determination from Resonant Sound Analysis .....	299
12.1.9.5	Nonlinear Signal Filtering .....	299
12.1.9.6	A Motor Control Example .....	300
12.2	A Three-layer Multi-layer Perceptron Model .....	300
12.2.1	MLP Backpropagation-of-error Learning.....	302
12.2.2	Derivation of Backpropagation-of-error Learning .....	303
12.2.2.1	Change in Error due to Output Layer Weights .....	303
12.2.2.2	Change in Error due to Hidden Layer Weights.....	304
12.2.2.3	The Weight Adjustments .....	305
12.2.2.4	Additional Momentum Factor .....	307
12.2.3	Notes on Classification and Function Mapping.....	308
12.2.4	MLP Application and Training Issues.....	308

12.3 Exercises .....	310
12.3.1 Problems .....	310
<b>13 Introduction to Fuzzy Logic Systems .....</b>	<b>313</b>
13.1 Basic Fuzzy Logic .....	313
13.1.1 Fuzzy Logic Membership Functions .....	314
13.1.2 Fuzzy Logic Operations .....	315
13.1.3 Fuzzy Logic Rules .....	316
13.1.4 Fuzzy Logic Defuzzification .....	317
13.2 Fuzzy Logic Control Design .....	318
13.2.1 Fuzzy Logic Controllers .....	319
13.2.1.1 Control Rule Construction .....	319
13.2.1.2 Parameter Tuning .....	321
13.2.1.3 Control Rule Revision .....	322
13.3 Fuzzy Artificial Neural Networks .....	322
13.4 Fuzzy Applications .....	323
<b>14 Introduction to Genetic Algorithms .....</b>	<b>325</b>
14.1 A General Genetic Algorithm .....	326
14.2 The Common Hypothesis Representation .....	327
14.3 Genetic Algorithm Operators .....	329
14.4 Fitness Functions .....	330
14.5 Hypothesis Searching .....	330
14.6 Genetic Programming .....	331
14.7 Applications of Genetic Programming .....	332
14.7.1 Filter Circuit Design Applications of GAs and GP .....	333
14.7.2 Tic-tac-to Game Playing Application of GAs .....	334
<hr/>	
<b>Part VI Adaptive Filter Application .....</b>	<b>337</b>
<hr/>	
<b>15 Applications of Adaptive Signal Processing .....</b>	<b>339</b>
15.1 Adaptive Prediction .....	340
15.2 Adaptive Modelling .....	342
15.3 Adaptive Telephone Echo Cancelling .....	343
15.4 Adaptive Equalisation of Communication Channels .....	344
15.5 Adaptive Self-tuning Filters .....	346
15.6 Adaptive Noise Cancelling .....	346
15.7 Focused Time Delay Estimation for Ranging .....	348
15.7.1 Adaptive Array Processing .....	349
15.8 Other Adaptive Filter Applications .....	350
15.8.1 Adaptive 3-D Sound Systems .....	350
15.8.2 Microphone Arrays .....	351
15.8.3 Network and Acoustic Echo Cancellation .....	352
15.8.4 Real-world Adaptive Filtering Applications .....	353

<b>16 Generic Adaptive Filter Structures .....</b>	<b>355</b>
16.1 Sub-band Adaptive Filters .....	355
16.2 Sub-space Adaptive Filters .....	358
16.2.1 MPNN Model.....	360
16.2.2 Approximately Piecewise Linear Regression Model.....	362
16.2.3 The Sub-space Adaptive Filter Model.....	364
16.2.4 Example Applications of the SSAF Model.....	366
16.2.4.1 Loudspeaker 3-D Frequency Response Model .....	367
16.2.4.2 Velocity of Sound in Water 3-D Model.....	369
16.3 Discussion and Overview of the SSAF .....	370
<b>References .....</b>	<b>373</b>
