| <b>Section I: Basics of Designing Virtual Reality Systems</b>   | <b>1</b>  |
| • <b>Chapter 1. Introduction: Virtual Reality in a Nutshell</b> | <b>3</b>  |
| ■ What Is Virtual Reality?                                      | 3         |
| ■ Goals and Applications of Virtual Reality                     | 3         |
| ■ Two Pillars of VR: Presence and 3D Multimodal Interaction     | 5         |
| ■ Building a Virtual Reality System                             | 8         |
| ■ About This Book   | 10        |
| ■ Final Notes   | 11        |
| ■ Acknowledgments   | 12        |
| ■ Summary and Pondering Points                                  | 12        |
| • <b>Chapter 2. Requirements Engineering and Storyboarding</b>  | <b>14</b> |
| ■ Example: Ship Simulator Design                                | 19        |
| ■ Summary and Pondering Points                                  | 26        |
| • <b>Chapter 3. Object and Scene Modeling</b>                   | <b>27</b> |
| ■ Object Modeling   | 27        |
| ■ Scene Construction  | 36        |
| ■ Object Placement  | 36        |
| ■ Multiple Frames of Reference                                  | 42        |
| ■ Re-Expressing Coordinates                                     | 43        |
| ■ Function and Behavior Modeling                                | 47        |
| ■ Ship Simulator Example Revisited                              | 49        |
| ■ Summary and Pondering Points                                  | 50        |
| • <b>Chapter 4. Putting It All Together</b>                     | <b>53</b> |
| ■ Example Continued: Ship Simulator, Level 2 Design             | 56        |
| ■ Summary and Pondering Points                                  | 65        |

|  |     |
|--|-----|
| ● <b>Chapter 5. Performance Estimation and System Tuning</b> ..... | 66  |
| ■ Tuning with LOD Models.....                                      | 66  |
| ■ Presence/Special Effects .....                                   | 67  |
| ■ Using Images and Textures.....                                   | 68  |
| ■ Summary and Pondering Points.....                                | 73  |
| <b>Section II: Creating the Virtual Reality</b> .....              | 75  |
| ● <b>Chapter 6. Output Display</b> .....                           | 77  |
| ■ The Human Visual System .....                                    | 77  |
| ■ Human Depth Perception and Stereoscopy.....                      | 81  |
| ■ Visual Display Systems.....                                      | 88  |
| ■ Human Aural System.....  | 98  |
| ■ Aural Display Systems.....                                       | 103 |
| ■ Haptics.....   | 105 |
| ■ Stimulation of Other Modalities I.....                           | 108 |
| ■ Summary and Pondering Points.....                                | 113 |
| ● <b>Chapter 7. Sensors and Input Processing</b> .....             | 115 |
| ■ Trackers.....  | 116 |
| ■ Event Generators .....   | 118 |
| ■ Sensor Errors and Calibration .....                              | 120 |
| ■ Summary and Pondering Points.....                                | 121 |
| ● <b>Chapter 8. 3D Multimodal Interaction Design</b> .....         | 122 |
| ■ Why Go 3D Multimodal? .....                                      | 122 |
| ■ Structured Approach to Interaction/Interface Design .....        | 123 |
| ■ Metaphors .....  | 125 |
| ■ Interface Design .....   | 126 |
| ■ Multimodality .....  | 128 |
| ■ Case Studies .....   | 130 |
| ◆ Ship Simulator .....   | 130 |
| ◆ Immersive Authoring .....  | 131 |
| ◆ Tabletop Computing.....  | 134 |
| ◆ Selection and Manipulation .....                                 | 137 |
| ◆ Navigation .....   | 142 |
| ◆ Menu Selection and Invocation .....                              | 143 |
| ◆ Whole Body Interaction .....                                     | 147 |
| ◆ Tangible Interface .....   | 148 |
| ◆ Alphanumeric Input .....   | 150 |
| ■ Summary and Pondering Points.....                                | 152 |
| ● <b>Chapter 9. Simulation I: Collision Detection</b> .....        | 153 |
| ■ Handling Collision.....  | 153 |

|   |     |
|---|-----|
| ■ Collision Detection with Line Segment(s) .....  | 155 |
| ■ Collision Among Polygonal Models .....  | 160 |
| ■ Bounding Volumes .....  | 166 |
| ■ Building a Bounding Volume .....  | 169 |
| ■ Bounding a Volume Hierarchy.....  | 172 |
| ■ Collision Among Bounding Volumes.....   | 173 |
| ■ Summary and Pondering Points .....  | 178 |
| <br>● <b>Chapter 10. Simulation II: Physics-Based Motion<br/>and Collision Response</b> ..... | 179 |
| ■ Center of Gravity and Moment of Inertia .....   | 179 |
| ■ Linear and Rotational Kinematics.....   | 185 |
| ■ Laws of Motion .....  | 187 |
| ■ Dynamics .....  | 191 |
| ■ Ad Hoc Collision Response.....  | 192 |
| ■ Physics-Based Collision Response .....  | 192 |
| ■ Real-Time Simulation Revisited .....  | 195 |
| ■ Deformation.....  | 196 |
| ■ Summary and Pondering Points .....  | 197 |
| <br>● <b>Chapter 11. Virtual Characters</b> .....   | 199 |
| ■ Form of a Character .....   | 199 |
| ■ Motion Control .....  | 200 |
| ■ Forward Kinematics .....  | 206 |
| ■ Inverse Kinematics .....  | 210 |
| ■ Summary and Pondering Points .....  | 213 |
| <br>● <b>Epilogue</b> .....   | 215 |
| ■ Other Areas of Virtual Reality.....   | 215 |
| ■ Is Virtual Reality Really Any Good? .....   | 216 |
| ■ Virtual Reality for Spatial Presence.....   | 216 |
| <br>References .....  | 219 |
| Index.....  | 227 |
