

Table of Contents

1. Microrheology	1
<i>M.L. Gardel, M.T. Valentine, and D.A. Weitz</i>	
1.1 Introduction.....	1
1.2 Active Microrheology Methods	2
1.2.1 Magnetic Manipulation Techniques	3
1.2.2 Optical Tweezers Measurements	8
1.2.3 Atomic Force Microscopy Techniques	14
1.3 Passive Microrheology Methods	18
1.4 Practical Applications of One-Particle Microrheology	28
1.5 Two-Particle Microrheology	30
1.6 Summary	33
Appendix: Descriptions of Experimental Apparati	34
A.1 Dynamic Light Scattering	35
A.2 Diffusing Wave Spectroscopy	38
A.3 Video Microscopy	39
A.4 Obtaining $\mathbf{G}^*(\omega)$ from $\langle \Delta \vec{r}^2(t) \rangle$	42
References.....	44
 2. Micron-Resolution Particle Image Velocimetry	 51
<i>S.T. Wereley and C.D. Meinhart</i>	
2.1 Introduction.....	51
2.2 Theory of μ PIV	53
2.2.1 In-Plane Spatial Resolution Limits	53
2.2.2 Out-of-Plane Spatial Resolution	55
2.2.3 Particle Visibility	57
2.3 Particle/Fluid Dynamics.....	60
2.3.1 Brownian Motion.....	62
2.3.2 Saffman Effect.....	65
2.4 Typical Micro-PIV Hardware Implementation	66
2.5 Algorithms and Processing for μ PIV	67
2.5.1 Processing Methods Most Suitable for μ PIV	68
2.5.2 Overlapping of LID-PIV Recordings	68
2.5.3 Correlation Averaging Method	70
2.5.4 Processing Methods Suitable for Both Micro/Macro PIV	73
2.5.5 Central Difference Interrogation.....	74
2.5.6 Image Correction Technique	75
2.6 Application Examples of μ PIV	76
2.6.1 Flow in a Microchannel.....	76
2.6.2 Flow in a Micronozzle	82
2.6.3 Flow Around Blood Cell	85

2.6.4 Flow in Microfluidic Biochip	87
2.7 Extensions of the μ PIV Technique	89
2.7.1 Microfluidic Nanoscope	90
2.7.2 Micro-Particle Image Thermometry	96
2.7.3 Infrared μ PIV	107
2.8 Conclusions	109
References	110
3. Electrokinetic Flow Diagnostics	113
<i>S. Devasenathipathy and J.G. Santiago</i>	
3.1 Theory	114
3.1.1 Electroosmosis	115
3.1.2 Electrophoresis	119
3.1.3 Similarity Between Electric Field and Velocity Field for Fluid	120
3.2 Diagnostics	121
3.2.1 Capillary Electrophoresis: Electrokinetic System Background	121
3.2.2 Simple Dye Visualization	130
3.2.3 Photobleached Fluorescence Visualization	133
3.3 Caged-Fluorescence Visualization	137
3.4 Particle Imaging Techniques	141
3.5 Concluding Remarks	149
References	150
4. Micro- and Nano-Scale Diagnostic Techniques for Thermometry and Thermal Imaging of Microelectronic and Data Storage Devices	155
<i>M. Asheghi and Y. Yang</i>	
4.1 Introduction	155
4.2 State-Of-Art Technologies and Relevant Thermal Phenomenon in Semiconductor Devices	157
4.3 State-Of-Art Technologies and Relevant Thermal Phenomena in Data Storage Technologies	160
4.4 Thermometry	162
4.4.1 Electrical Thermometry	162
4.4.2 Far-Field Optical Thermometry	166
4.4.3 Near-Field Thermometry Techniques	175
4.4.4 Summary and Recommendations	188
References	189
5. Nanoscale Mechanical Characterization of Carbon Nanotubes	197
<i>R.S. Ruoff and M.-F. Yu</i>	
5.1 Introduction	197
5.2 Instruments for Nanoscale Characterization	198
5.2.1 Atomic Force Microscope (AFM)	198
5.2.2 Scanning Tunneling Microscope (STM)	199
5.2.3 Transmission Electron Microscope (TEM)	200
5.2.4 Scanning Electron Microscope (SEM)	200
5.2.5 New Tools for SEM	201

5.2.6 New Tools for TEM	206
5.2.7 New Tools for AFM	209
5.3 Techniques for Nanoscale Mechanical Characterization of CNT.....	211
5.3.1 Tensile Testing Method.....	211
5.3.2 AFM Lateral Deflection and Indentation Method	213
5.3.3 Mechanical Resonance Method.....	217
5.3.4 Other Methods	219
5.4 Mechanical Engineering Applications of Individual CNTs for Actuation and Electromechanics	221
5.5 Conclusion and Future Directions.....	222
References.....	223

6. Applications of the Piezoelectric Quartz Crystal Microbalance for Microdevice Development 227

J. W. Bender and J. Krim

6.1 Introduction.....	227
6.2 Properties of Piezoelectric Quartz.....	228
6.3 Theoretical Models.....	229
6.3.1 Theory for Thin Films and Purely Elastic Media	230
6.3.2 Example Calculation: Quartz Crystal Preparation.....	231
6.3.3 Transmission-Line Model.....	232
6.3.4 Theory for Purely Viscous Media.....	233
6.3.5 Theory for Viscoelastic Media	234
6.3.6 Theory Including Gases at Low Pressures.....	235
6.3.7 Theory Combining Mass (Thin Film) and Semi-continuous Fluid Loading.....	236
6.3.8 Theory Incorporating Slip at the Interface.....	236
6.3.9 Theory for Combined Viscous Film, Slip, and Semicontinuous Vapor.....	237
6.4 Equipment and Experimental Methods	238
6.4.1 Equipment.....	238
6.4.2 Experimental Considerations	238
6.5 Experimental Observations of Slip at Interfaces.....	240
6.5.1 Slip of Adsorbed Monolayers of Gases	241
6.5.2 Liquid Phase Slip.....	242
6.6 Measurement of Viscoelastic Properties of Films.....	244
6.6.1 Moduli Measurements	244
6.6.2 Solvent Dynamics.....	244
6.7 Tribology and Tribochemistry of Surfaces	245
6.7.1 Friction and Wear in MEMS	245
6.7.2 Combined QCM/Surface Probe Instruments	246
6.8 QCM Uses in Physiological Processes.....	250
6.8.1 Detection and Characterization of Cell Adhesion.....	250
6.8.2 Protein and Lipid Adsorption	251
References.....	254

Microscale Diagnostic Techniques

Breuer, K. (Ed.)

2005, XII, 259 p., Hardcover

ISBN: 978-3-540-23099-1
