## THEORETICAL APPROACHES

Conservation laws for three-phase partially-saturated granular media .....	3
<i>Borja, R.I.</i>	
Thermally-induced pore pressure generation in a nearly-saturated cementitious material .....	15
<i>Selvadurai, A.P.S.</i>	
Strain localisation simulation in non-isothermal multiphase geomaterials .....	29
<i>Sanavia, L., Pesavento, F., and Schrefler, B.A.</i>	
Non-linear behaviour in the deformation and localization analysis of unsaturated soil .....	41
<i>Ehlers, W., Graf, T, and Ammann, M.</i>	
A process-oriented approach to compute THM problems in porous media Part 1: Theoretical and informatics background.....	53
<i>Kolditz, O., Wang, W., de Jonge, J., Xie, M., and Bauer, S.</i>	
The influence of hydraulic hysteresis on unsaturated soils FE analyses.....	67
<i>Tamagnini, R.</i>	
Effects of intergranular adhesive force on failure criterion of granular materials.....	81
<i>Kato, S., Yoshimori, Y., and Sakakibara, T.</i>	
A bounding surface plasticity model for sands in an unsaturated state.....	99
<i>Russell, AR., and Khalili, N.</i>	
A unified framework for elastoplasticity of unsaturated soils: From capillary hysteresis to soil skeletal deformations .....	111
<i>Muraleetharan, K.K. and Wei, C.</i>	
State parameters for unsaturated soils, basic empirical concepts .....	125
<i>Engel, J., Schanz, T., and Lauer, C.</i>	
Investigations regarding soils below phreatic surface as unsaturated porous media.....	139
<i>Köhler, H.-J. and Montenegro, H.</i>	

Inspection of excess pressure propagation in the zone of gas entrapment below the capillary fringe.....	159
<i>Montenegro, H., Köhler, H.-J., and Holfelder, T.</i>	

A new concept for the numerical simulation and parameter identification of multiphase flow and transport processes in cohesive soils.....	173
<i>Hölzemann, S., Class, H., and Helmig, R.</i>	

Statistical approach in soil-water characteristic curve modelling.....	189
<i>Stoimenova, E., Datcheva, M., and Schanz, T.</i>	

Generalized effective stress in unsaturated granulate by DEM analysis.....	201
<i>Jiang, M. and Harris, D.</i>	

Grading entropy variation due to soil crushing .....	215
<i>Lőrincz, J., Gálos, M., and Rajkai, K.</i>	

## **NUMERICAL MODELLING**

A process-oriented approach to compute THM problems in porous media Part 2: Numerical applications .....	231
<i>Kolditz, O., Wang, W., de Jonge, J., Xie, M., and Bauer, S.</i>	

Numerical study to the desiccation cracks formation in mineral liners for landfills.....	251
<i>Wendling, S. and Meißner, H.</i>	

Modelling the behaviour of an earth and rockfill dam during construction and impoundment.....	269
<i>Alonso, E.E., Olivella, S., and Hugas, J.</i>	

Numerical simulation of air loss during tunnel advance in compressed air tunnelling.....	289
<i>Scheid, Y., Semprich, S., and Chinkulkijniwat, A.</i>	

Centrifuge and numerical modeling of contaminant transport through the unsaturated silty soil.....	305
<i>Sreedeeep, S., Berton, C., Moronnoz, T., and Singh, D. G.</i>	

Modeling of seepage flow through layered soils .....	313
<i>Soraganvi, Veena S., Mohan Kumar, M. S., and Muthineni, S.</i>	

Hydro-mechanical behaviour of unsaturated buffer .....	237
<i>Thomas, H.R., Cleall, P.J., Chandler, N., Dixon, D., and Mitchell, H.P.</i>	

Applications of CODE-BRIGHT to thermal-hydro-mechanical experiments on clays.....	341
<i>Zhang, C.-L., Kröhn, K.-P., and Rothfuchs, T.</i>	
An unsaturated soil seepage analysis for design of a soil cover system to reduce oxidation of a mine tailings deposit.....	359
<i>Wang, B. and Murray, L.</i>	

Unsaturated Soils: Numerical and Theoretical  
Approaches

Proceedings of the International Conference "From  
Experimental Evidence towards Numerical Modeling of  
Unsaturated Soils", Weimar, Germany, September  
18-19, 2003

Schanz, T. (Ed.)

2005, IX, 369 p., Hardcover

ISBN: 978-3-540-21122-8
