# Contents

|  |     |
|--|-----|
| <b>Prelude</b> .....   | V   |
| <b>1 Origins and Education</b> .....   | 1   |
| 1.1 Franconian Beginnings .....  | 1   |
| 1.2 The New World .....  | 5   |
| 1.3 Higher Education and War .....   | 11  |
| 1.4 Graduate School and Fermi .....  | 15  |
| <b>2 Institute for Advanced Study, 1948–1949, Theory</b> .....                         | 25  |
| <b>3 Berkeley, 1949–1950, Accelerators</b> .....                                       | 31  |
| <b>4 Properties of Pi Mesons</b> .....   | 41  |
| <b>5 Strange Particles and Bubble Chambers</b> .....                                   | 59  |
| <b>6 Neutrinos I</b> .....   | 83  |
| <b>7 CP Violation</b> .....  | 95  |
| <b>8 Neutrinos, II</b> .....   | 121 |
| 8.1 Quarks and Gluons .....  | 121 |
| 8.2 CDHS .....   | 123 |
| 8.3 Nucleon Structure .....  | 126 |
| 8.4 Quantitative Confirmation of “Scaling Violations” Predicted<br>by QCD Theory ..... | 129 |
| 8.5 Beam Dump and Tau Neutrino .....   | 131 |
| 8.6 Neutrino Masses, Neutrino Mixing,<br>Neutrino Oscillations .....                   | 132 |
| <b>9 Experiments with the LEP <math>e^+e^-</math> Collider</b> .....                   | 143 |

|                  |     |
|------------------|-----|
| A Postlude ..... | 163 |
| References ..... | 177 |
