Part I Introduction to Fuzzy Arithmetic

1	The Theory of Fuzzy Sets	3
1.1	Classical Sets	3
1.1.1	Terminology and Notation	3
1.1.2	Basic Definitions	4
1.1.3	Operations for Domain-Compatible Classical Sets and Relations	9
1.1.4	Further Operations for Classical Relations	12
1.2	Fuzzy Sets	14
1.2.1	Terminology and Notation	14
1.2.2	Basic Definitions	16
1.2.3	Operations for Domain-Compatible Fuzzy Sets and Relations	25
1.2.4	Further Operations for Fuzzy Relations	37
1.3	The Extension Principle	41
2	Elementary Fuzzy Arithmetic	45
2.1	Fuzzy Numbers and Fuzzy Vectors	45
2.1.1	Fuzzy Numbers	45
2.1.2	Fuzzy Vectors	51
2.2	Elementary Fuzzy Arithmetical Operations	51
2.2.1	Elementary Operations on L-R Fuzzy Numbers	53
2.2.2	Elementary Operations on Discretized Fuzzy Numbers	62
2.2.3	Elementary Operations on Decomposed Fuzzy Numbers	73
3	Standard Fuzzy Arithmetic	79
3.1	Definition of Standard Fuzzy Arithmetic	79
3.2	Application of Standard Fuzzy Arithmetic	81
3.3	Drawbacks and Limitations of Standard Fuzzy Arithmetic	87

4	Advanced Fuzzy Arithmetic – The Transformation Method	99
4.1	Fuzzy-Parameterized Models	99
4.2	General and Reduced Transformation Method	100
4.2.1	Simulation of Fuzzy-Parameterized Systems	100
4.2.2	Analysis of Fuzzy-Parameterized Systems	108
4.3	Extended Transformation Method	116
4.3.1	Simulation of Fuzzy-Parameterized Systems	116
4.3.2	Analysis of Fuzzy-Parameterized Systems	117
4.3.3	Classification Criterion	118
4.4	Efficient Implementation of the Transformation Method	122
4.4.1	Multi-Dimensional Array Structure	122
4.4.2	Thinning of the Decomposition Pattern	124
4.4.3	Piecewise Multilinear Sparse-Grid Interpolation	125
5	Additions to Fuzzy Arithmetic	127
5.1	Uncertainty Processing with Fuzzy Arithmetic	127
5.2	Inverse Fuzzy Arithmetic	132
5.3	Defuzzification of Fuzzy Numbers	139
5.4	Measures for Fuzzy Numbers	141
5.4.1	Imprecision of Fuzzy Numbers	141
5.4.2	Eccentricity of Fuzzy Numbers	142

Part II Applications in the Engineering Sciences

6	Mechanical Engineering	147
6.1	Simulation, Analysis, and Identification of Structural Joint Connections	147
6.1.1	Simulation and Analysis of a Bolted Lap Joint under Tangential Friction Load	147
6.1.2	Simulation and Analysis of a Bolted Joint Connection under Axial Load	154
6.1.3	Identification of the Uncertain Model Parameters of a Bolted Joint	159
6.2	Fuzzy Sensitivity Analysis of an Orthotropic Plate	168
6.3	Frequency Response Function of a Clamped Plate	180
6.4	Simulation and Analysis of the Vibrations of an Engine Hood	186
7	Geotechnical Engineering	193
7.1	Contaminant Flow in Thin Layers	193
7.2	Identification of the Uncertain Hydraulic Conductivities in Transversely Isotropic Porous Media	208

8	Biomedical Engineering	217
8.1	Simulation and Analysis of the Human Glucose Metabolism ...	217
8.2	Enhanced Parameter Identification for the Model of the Human Glucose Metabolism	224
9	Control Engineering	231
	References	245
	Index	253
