Part I Introduction to Option Pricing

1	Asset Pricing Basics	3
1.1	Fundamental Concepts	3
1.2	State Prices in a One-Period Binomial Model	11
1.3	Probabilities and Numeraires	14
1.4	Asset Pricing with a Continuum of States	17
1.5	Introduction to Option Pricing	21
1.6	An Incomplete Markets Example	24
	Problems	25
2	Continuous-Time Models	27
2.1	Simulating a Brownian Motion	28
2.2	Quadratic Variation	29
2.3	Itô Processes	31
2.4	Itô's Formula	33
2.5	Multiple Itô Processes	35
2.6	Examples of Itô's Formula	37
2.7	Reinvesting Dividends	38
2.8	Geometric Brownian Motion	39
2.9	Numeraires and Probabilities	41
2.10	Tail Probabilities of Geometric Brownian Motions	44
2.11	Volatilities	46
	Problems	48
3	Black-Scholes	49
3.1	Digital Options	49
3.2	Share Digitals	51
3.3	Puts and Calls	52
3.4	Greeks	53
3.5	Delta Hedging	55

XII Contents

3.6	Gamma Hedging	57
3.7	Implied Volatilities	58
3.8	Term Structure of Volatility	58
3.9	Smiles and Smirks	60
3.10	Calculations in VBA	60
	Problems	67
4	Estimating and Modelling Volatility	71
4.1	Statistics Review	71
4.2	Estimating a Constant Volatility and Mean	73
4.3	Estimating a Changing Volatility	75
4.4	GARCH Models	77
4.5	Stochastic Volatility Models	79
4.6	Smiles and Smirks Again	82
4.7	Hedging and Market Completeness	83
	Problems	84
5	Introduction to Monte Carlo and Binomial Models	87
5.1	Introduction to Monte Carlo	87
5.2	Introduction to Binomial Models	89
5.3	Binomial Models for American Options	91
5.4	Binomial Parameters	92
5.5	Binomial Greeks	94
5.6	Monte Carlo Greeks I: Difference Ratios	96
5.7	Monte Carlo Greeks II: Pathwise Estimates	98
5.8	Calculations in VBA	101
	Problems	107

Part II Advanced Option Pricing

6	Foreign Exchange	111
6.1	Currency Options	112
6.2	Options on Foreign Assets Struck in Foreign Currency	112
6.3	Options on Foreign Assets Struck in Domestic Currency	112
6.4	Currency Forwards and Futures	113
6.5	Quantos	116
6.6	Replicating Quantos	118
6.7	Quanto Forwards	121
6.8	Quanto Options	121
6.9	Return Swaps	123
6.10	Uncovered Interest Parity	125
	Problems	125

7	Forward, Futures, and Exchange Options	129
7.1	Margrabe's Formula	130
7.2	Black's Formula	132
7.3	Merton's Formula	136
7.4	Deferred Exchange Options	139
7.5	Calculations in VBA	140
7.6	Greeks and Hedging	142
7.7	The Relation of Futures Prices to Forward Prices	144
7.8	Futures Options	145
7.9	Time-Varying Volatility	147
7.10	Hedging with Forwards and Futures	147
7.11	Market Completeness	150
	Problems	152
8	Exotic Options	155
8.1	Forward-Start Options	155
8.2	Compound Options	158
8.3	American Calls with Discrete Dividends	162
8.4	Choosers	166
8.5	Options on the Max or Min	168
8.6	Barrier Options	171
8.7	Lookbacks	175
8.8	Basket and Spread Options	176
8.9	Asian Options	178
8.10	Calculations in VBA	183
	Problems	193
9	More on Monte Carlo and Binomial Valuation	197
9.1	Monte Carlo Models for Path-Dependent Options	197
9.2	Binomial Valuation of Basket and Spread Options	198
9.3	Monte Carlo Valuation of Basket and Spread Options	200
9.4	Antithetic Variates in Monte Carlo	202
9.5	Control Variates in Monte Carlo	203
9.6	Accelerating Binomial Convergence	205
9.7	Calculations in VBA	207
	Problems	216
10	Finite Difference Methods	219
10.1	Fundamental PDE	219
10.2	Discretizing the PDE	221
10.3	Explicit and Implicit Methods	222
10.4	Crank-Nicolson	225
10.5	European Options	226
10.6	American Options	227
10.7	Barrier Options	227

10.8	Calculations in VBA	227
	Problems	233

Part III Fixed Income

11	Fixed Income Concepts	237
11.1	The Yield Curve	237
11.2	LIBOR	239
11.3	Swaps	240
11.4	Yield to Maturity, Duration, and Convexity	242
11.5	Principal Components	245
11.6	Hedging Principal Components	248
	Problems	249
12	Introduction to Fixed Income Derivatives	253
12.1	Caps and Floors	253
12.2	Forward Rates	254
12.3	Portfolios that Pay Spot Rates	254
12.4	The Market Model for Caps and Floors	255
12.5	The Market Model for European Swaptions	257
12.6	A Comment on Consistency	259
12.7	Caplets as Puts on Discount Bonds	260
12.8	Swaptions as Options on Coupon Bonds	260
12.9	Calculations in VBA	261
	Problems	262
13	Valuing Derivatives in the Extended Vasicek Model	265
13.1	The Short Rate and Discount Bond Prices	265
13.2	The Vasicek Model	266
13.3	Estimating the Vasicek Model	269
13.4	Hedging in the Vasicek Model	271
13.5	Extensions of the Vasicek Model	273
13.6	Fitting Discount Bond Prices and Forward Rates	275
13.7	Discount Bond Options, Caps and Floors	277
13.8	Coupon Bond Options and Swaptions	280
13.9	Captions and Floortions	283
13.10	Yields and Yield Volatilities	284
13.11	The General Hull-White Model	285
13.12	Calculations in VBA	289
	Problems	293

14 A Brief Survey of Term Structure Models	295
14.1 Ho-Lee	295
14.2 Black-Derman-Toy	300
14.3 Black-Karasinski	302
14.4 Cox-Ingersoll-Ross	302
14.5 Longstaff-Schwartz	307
14.6 Heath-Jarrow-Morton	310
14.7 Market Models Again	312
Problems	316

Appendices

A Programming in VBA	319
A.1 VBA Editor and Modules	319
A.2 Subroutines and Functions	320
A.3 Message Box and Input Box	321
A.4 Writing to and Reading from Cells	322
A.5 Variables and Assignments	323
A.6 Mathematical Operations	324
A.7 Random Numbers	324
A.8 For Loops	325
A.9 While Loops and Logical Expressions	326
A.10 If, Else, and ElseIf Statements	326
A.11 Variable Declarations	327
A.12 Variable Passing	328
A.13 Arrays	329
A.14 Debugging	331
B Miscellaneous Facts about Continuous-Time Models	333
B.1 Girsanov's Theorem	333
B.2 The Minimum of a Geometric Brownian Motion	336
B.3 Bessel Squared Processes and the CIR Model	340
List of Programs	346
List of Symbols	347
References	349
Index	353
