
List of Contents

The Secretory Capacity of a Cell Depends on the Efficiency of Endoplasmic Reticulum-Associated Degradation	1
<i>M. Molinari and R. Sitia</i>	
Recognition and Delivery of ERAD Substrates to the Proteasome and Alternative Paths for Cell Survival	17
<i>A. A. McCracken and J. L. Brodsky</i>	
CPY* and the Power of Yeast Genetics in the Elucidation of Quality Control and Associated Protein Degradation of the Endoplasmic Reticulum	41
<i>D. H. Wolf and A. Schäfer</i>	
The Role of the Ubiquitination Machinery in Dislocation and Degradation of Endoplasmic Reticulum Proteins	57
<i>M. Kikkert, G. Hassink, and E. Wiertz</i>	
The Role of p97/Cdc48p in Endoplasmic Reticulum-Associated Degradation: From the Immune System to Yeast	95
<i>S. Bar-Nun</i>	
The Ins and Outs of Intracellular Peptides and Antigen Presentation by MHC Class I Molecules	127
<i>T. Groothuis and J. Neeffes</i>	
Entry of Protein Toxins into Mammalian Cells by Crossing the Endoplasmic Reticulum Membrane: Co-opting Basic Mechanisms of Endoplasmic Reticulum-Associated Degradation	149
<i>J. M. Lord, L. M. Roberts, and W. I. Lencer</i>	
Subject Index	169

Dislocation and Degradation of Proteins from the
Endoplasmic Reticulum

Wiertz, E.; Kikkert, M. (Eds.)

2005, XI, 174 p., Hardcover

ISBN: 978-3-540-28006-4
