“The devil pales beside a man who owns a truth, *his* truth.”  
*E.M. Cioran*

<b>I. Toward an Interdisciplinary Methodology .....</b>	<b>1</b>
A. Concerning the Current Paradigm—In Search of Bohemians.....	1
B. Methodological and Empirical Issues of Interdisciplinary Epidemic Research.....	8
a. Quis Custodiet Ipsos Custodies? .....	10
b. Crossing Disciplinary Boundaries .....	13
c. Inter- and Intra- .....	14
d. The Interdisciplinarity Argument of SEP .....	15
e. Integrating Modes of Reasoning .....	16
f. The Role of Uncertainty .....	17
g. Epistemic Cognition .....	19
C. Conceptual Components of SEP .....	22
a. Theoretical Construct .....	22
b. Knowledge Bases: General and Specificatory .....	23
c. Knowledge Synthesis .....	25
D. Epidemic Causality as an Interdisciplinary Affair .....	26
a. The Chain Concept .....	26
b. Some Important Features .....	27
c. A Brief Categorization of Causality Approaches .....	31
Deductive-Nomological Approach .....	31
Inductive-Statistical Approach .....	31
Probabilistic Conditioning Approach .....	32
Integrative Prediction Approach .....	33
E. Focusing on Black Death .....	36
a. Lunch with Friends and Dinner with Ancestors .....	36
b. Limitations of Previous Studies and Advantages of SEP .....	39
<b>II. Stochastic Modelling .....</b>	<b>43</b>
A. Why Stochastics? .....	43
a. Thinking About Uncertainty—Public Health Reasoning Modes .....	44

---

On Valid Reasoning .....	46
The Role of Probability .....	51
On Sound Reasoning and Inference .....	53
b. Thinking About Uncertainty—Concepts, Beliefs, and Models .....	56
On Concepts .....	56
On Beliefs .....	57
On Models and Model Selection .....	58
c. Questions of Concepts and Questions of Facts .....	62
d. Epistemic and Ontologic Concepts .....	64
e. Conceptual Hierarchies .....	66
B. On Stochastic Modelling .....	68
a. Formal and Interpretive Components .....	68
b. An Outline .....	70
C. Theory of Spatiotemporal Random Fields (S/TRF) .....	72
a. Basic Notions .....	72
b. Expressing Black Death Uncertainty in Terms of S/TRF .....	74
D. Mathematical Formulation of the SEP Principles .....	79
a. The SEP Stages: Structural, Site-specific, and Integration .....	80
b. Teleologic Formulas: Maximum Expected Information Functions .....	81
c. Adaptation Formulas: Statistical Induction and Stochastic Deduction .....	84
d. An Integrated Human Exposure Framework .....	86
E. The Role of Temporal Geographical Information Systems (TGIS) .....	92
a. Epidemics and Human Geography .....	92
b. TGIS Technology and the BME Technique .....	94
c. Some Salient Differences Between BME and Classical Techniques .....	99
F. The Man and the Hammer .....	101
 <b>III. Black Death: The Background .....</b>	<b>103</b>
A. Introduction .....	103
B. The Controversy About the Epidemiologic Nature of Black Death .....	108
a. Symptoms .....	108
b. Contemporary Explanations .....	110
c. Modern Etiology .....	110
d. Discrepancies .....	111
C. Interdisciplinary Sources .....	114
a. Surviving Contemporary Evidence .....	117
b. Reliability of Contemporary Sources .....	123
c. Concerns About Time Accuracy .....	125
d. Notorious Inconsistencies in Outbreak Dating .....	128
e. Epidemic Modelling .....	131
D. Data Processing and Interpretation Issues .....	132
a. Medieval Data are Like Children .....	132
b. Time Series Deconvolution and Compensation Based on Ecclesiastical Appointments .....	133

c.	Parameter Tabulation .....	138
d.	Mortality in Germany .....	139
e.	Aggregation and Scale Effects .....	141
f.	Correlation Between City Size and Epidemic Duration .....	144
g.	Demographic Uncertainty .....	145
h.	Other Possible Correlations, Links, and Dependencies .....	148
E.	Si non è Vero, è Molto Ben Trovato .....	151

#### **IV. Mathematical Formulation of the Knowledge Bases ..... 153**

A.	Introduction .....	153
B.	Mathematical Formulation of the General Knowledge Base .....	155
a.	A General Scaling Law Between City Size and Epidemic Duration ...	155
b.	An Extended Reed-Frost Model for Increasing the Resolution of the Mortality Data .....	157
c.	Space-Time Correlations of Mortality Distributions .....	161
	Theoretical Models and Their Interpretation.....	162
	Continuously Distributed and Clustered Spatial Data Sets .....	168
	ERF-Based Models .....	168
	Other Classes of Space-Time Models .....	169
d.	Space-Time Mortality PDF With Reference to the $\mathcal{G}$ -KB .....	175
C.	Coding the Specificatory Knowledge Base .....	177
a.	Direct Techniques .....	179
b.	Indirect Techniques .....	182
	ERF-Based Techniques .....	182
	The Case of Ecclesiastical Records .....	187
	The Case of Land Desertion .....	188
D.	Some Thoughts on the SEP Integration of Black Death Concepts and Data .....	191

#### **V. Spatiotemporal Mapping of the Epidemic ..... 193**

A.	Maps of the Epidemic, Their Interpretation and Findings .....	193
a.	General Comments .....	193
b.	Mortality Maps .....	195
c.	Epidemic Elasticity Maps .....	199
d.	Maps of the Geographical Evolution of the Epidemic .....	203
e.	Infected Area and its Temporal Change .....	204
f.	Some Comparisons With Bubonic Plague .....	205
B.	Wave Propagation .....	208
a.	Evolution of the Epidemic Centroid .....	210
b.	Visualization in Terms of Mortality Distributions .....	210
C.	Space-Time Inference .....	213

## XII Contents

---

a. Epidemic Maps From a Historical Evidence Perspective .....	213
Italy .....	214
Croatia .....	216
France .....	217
Iberia Peninsula .....	218
Austria .....	219
Switzerland .....	219
United Kingdom .....	220
Republic of Ireland .....	221
Scandinavia .....	221
Germany .....	222
Low Countries .....	222
b. More Detective Work .....	223
c. Topography and Modelling Parameters .....	227
d. Fowl or Fish? .....	228
 <b>VI. Epea Pteroenta .....</b>	<b>233</b>
A. What to do With the Philistines? .....	233
B. The Oedipus State and Epidemic Warning Systems .....	237
C. There is no Rest for the Wicked .....	239
 <b>Appendices .....</b>	<b>241</b>
Appendix A. Annotated Black Death Data Summary .....	241
a. Austria.....	241
b. Belgium .....	242
c. Croatia .....	243
d. Czech Republic .....	243
e. Denmark .....	243
f. France .....	244
g. Germany .....	251
h. Gibraltar .....	254
i. Ireland .....	255
j. Italy .....	256
k. Norway .....	259
l. Poland .....	260
m. Portugal .....	261
n. Spain .....	262
o. Sweden .....	268
p. Switzerland .....	269
q. The Netherlands .....	270
r. United Kingdom .....	271

---

Appendix B. Parameters for the Non-linear Extended Reed and Frost (ERF) Model .....	283
a. Austria.....	283
b. Belgium .....	283
c. Croatia .....	283
d. Czech Republic .....	284
e. Denmark .....	284
f. France .....	284
g. Germany .....	286
h. Gibraltar .....	287
i. Ireland .....	287
j. Italy .....	288
k. Norway .....	289
l. Poland .....	289
m. Portugal .....	289
n. Spain .....	290
o. Sweden .....	291
p. Switzerland .....	291
q. The Netherlands .....	292
r. United Kingdom .....	292
 <b>References .....</b>	 <b>293</b>
a. Printed References.....	293
b. Internet References.....	310
 <b>Index .....</b>	 <b>312</b>

Interdisciplinary Public Health Reasoning and Epidemic  
Modelling: The Case of Black Death

Christakos, G.; Olea, R.A.; Serre, M.L.; Yu, H.-L.; Wang,  
L.-L.

2005, XVI, 320 p., Hardcover

ISBN: 978-3-540-25794-3
