

Contents

1	Connexin and Pannexin Genes in the Mouse and Human Genome	1
	<i>Klaus Willecke, Jürgen Eiberger, Julia von Maltzahn</i>	
1.1	Introduction	1
1.2	Connexin Genes	5
1.3	Pannexin genes	9
1.4	Outlook.....	10
	References	11
2	Essential Role of Gap Junctions During Development and Regeneration of Skeletal Muscle	13
	<i>Julia von Maltzahn, Klaus Willecke</i>	
2.1	Introduction	13
2.2	Development of Skeletal Muscles.....	13
2.2.1	Embryonic Origin of Myoblasts	13
2.2.2	Myotube Formation by Myoblast Fusion	15
2.2.3	Characteristics of Primary and Secondary Myotubes ..	16
2.2.4	Gap Junctional Intercellular Coupling During Myogenesis	16
2.2.5	Connexin Expression During Fusion of Myoblasts	17
2.2.6	Connexin Expression in Myotubes	19
2.3	Regeneration of Adult Skeletal Muscles	21
2.3.1	Satellite Cells	22
2.3.2	Connexin Expression During Muscle Regeneration	24
	References	25
3	Connexins in Cardiac Development: Expression, Role, and Transcriptional Control	29
	<i>Daniel B. Gros, Sébastien Alcoléa, Laurent Dupays, Sonia Meysen, Magali Théveniau-Ruissy, Birgit E.J. Teunissen, Marti F.A. Bierhuizen</i>	
3.1	Introduction	29
3.2	Multiple Connexin Genes Are Expressed in the Heart.....	30
3.2.1	The Cardiac Connexins	30

3.2.2	Expression Patterns of Cardiomyocyte-Related Cx43, -40 and -45 in the Adult Mouse Heart	32
3.2.3	Spatiotemporal Expression Patterns of Cardiomyocyte-Related Cx43, -40 and -45 in the Developing Mouse Heart.....	34
3.3	Role of Cxs in Heart Development	38
3.3.1	No Intrinsic Cardiomyocyte-Autonomous Requirement for Cx43 During Heart Development	38
3.3.2	Cx40 is Involved in the Septation Process	39
3.3.3	Cx45 is Required for the Normal Progress of Cardiogenesis.....	40
3.4	Transcriptional Control of Cardiomyocyte-Related Cxs	41
3.4.1	Structure and Regulation of the Cx43 Gene	42
3.4.2	Structure and Regulation of the Cx40 Gene	45
3.4.3	Structure of the Cx45 Gene	49
3.5	Conclusions	50
	References	50
4	Gap Junction and Connexin Remodeling in Human Heart Disease	57
	<i>Nicholas J. Severs, Emmanuel Dupont, Riyaz Kaba, Neil Thomas</i>	
4.1	Introduction	57
4.2	Gap Junctions and Connexins in Cardiomyocytes of the Normal Heart	58
4.3	Alterations in Gap Junctions and Connexin Expression in Heart Disease	61
4.4	Ventricular Myocardium in Disease	62
4.4.1	Structural Remodeling	62
4.4.2	Remodeling of Connexin43 Expression.....	64
4.4.3	Remodeling of Expression of Connexin45 and Connexin40	68
4.5	Short-Term Effects of Ischemia	69
4.6	Remodeling of Gap Junctions and Connexin Expression in Diseased Atrial Myocardium.....	70
4.7	Significance of Connexin Co-Expression: New Tools	72
4.8	Concluding Comment	76
	References	76
5	Gap Junction Expression in Brain Tissues with Focus on Development	83
	<i>Rolf Dermietzel, Carola Meier</i>	
5.1	Gap Junctions and Neurogenesis: Some Basic Aspects	83

5.2	Segregation of Connexin Expression During Brain Development	88
5.2.1	Prenatal Expression	88
5.2.2	Postnatal Expression	90
5.3	Drawing a General Scheme of Gap Junction Function in the Developing Brain	92
5.4	Pitfalls in Defining Cell-Specific Expression of Connexins in Brain Tissues	94
5.5	Segregation of Connexins During Glial Lineaging	95
5.5.1	The Oligodendrocytic Lineage	95
5.5.2	The Astrocytic Lineage	98
5.6	Upstream Events Regulating Connexin Expression	100
	References	102
6	Connexins Responsible for Hereditary Deafness – The Tale Unfolds	111
	<i>Martine Cohen-Salmon, Francisco J. del Castillo, Christine Petit</i>	
6.1	Introduction	111
6.2	Connexin Genes and Hearing Impairment	112
6.2.1	CX26 (GJB2) and Autosomal Recessive Deafness DFNB1	112
6.2.2	CX26 (GJB2) and Autosomal Dominant Deafness DFNA3	118
6.2.3	CX30 (GJB6) and Autosomal Dominant Deafness DFNA3'	119
6.2.4	Other Connexin Genes and Deafness	120
6.3	Inner Ear and Gap Junctions	122
6.3.1	Inner Ear Architecture	122
6.3.2	Connexin Expression in the Cochlea	124
6.3.3	Gap Junctions and Inner Ear Homeostasis	125
6.4	Future Prospects	128
	References	128
7	Human Connexins in Skin Development and Skin Disorders	135
	<i>Gabriele Richard</i>	
7.1	Introduction	135
7.2	The Gap Junction System of Human Skin	136
7.2.1	Changing Patterns of Connexin Expression During Human Skin Development	136
7.2.2	Connexin Expression in the Mature Human Epidermis	139

7.2.3	Changes in Connexin Expression During Epidermal Differentiation	140
7.3	Connexin Disorders of the Skin	142
7.3.1	Erythrokeratoderma Variabilis	146
7.3.2	Palmoplantar Keratodermas.....	151
7.3.3	Ectodermal Dysplasias	156
7.4	Summary.....	163
	References	164
8	Intercellular Communication in Lens Development and Disease	173
	<i>Adam M. DeRosa, Francisco J. Martinez-Wittinghan, Richard T. Mathias, Thomas W. White</i>	
8.1	Introduction	173
8.2	Connexin Specialization in the Lens	175
8.3	Genetic Manipulation of Lens Connexins	177
8.3.1	Knockout of Cx43	177
8.3.2	Knockout of Cx46	179
8.3.3	Knockout of Cx50	180
8.3.4	Knockin of Cx46 into the Cx50 Gene	181
8.4	How Does Cx46 Prevent Cataract?	185
8.5	How Does Cx50 Influence Lens Growth?	188
8.6	Human Connexin Mutations Cause Cataract.....	190
	References	191
9	Connexin Modulators of Endocrine Function	197
	<i>Philippe Klee, Nathalie Boucard, Dorothée Caille, José Cancela, Anne Charollais, Eric Charpantier, Laetitia Michon, Céline Populaire, Manon Peyrou, Rachel Nlend Nlend, Laurence Zulianello, Jacques-Antoine Haefliger, Paolo Meda</i>	
9.1	Introduction	197
9.2	Endocrine Cells Are Connected by Selected Connexins	199
9.3	Different Endocrine Cells Express Different Connexin Patterns	201
9.3.1	Cells Producing Peptide Hormones	201
9.3.2	Cells Producing Glycoprotein Hormones.....	207
9.3.3	Cells Producing Steroid Hormones.....	207
9.3.4	Cells Producing Catecholamines	208
9.3.5	Cells Producing Pheromones.....	209
9.4	Some Endocrine Cells Share Connexins with Their Targets ...	209
9.5	Nonsecretory Functions of Connexins in Endocrine Glands ..	210
9.6	Hormones and Connexins.....	212

10 Roles of Gap Junctions in Ovarian Folliculogenesis: Implications for Female Infertility	223
<i>Gerald M. Kidder</i>	
10.1 Introduction	223
10.2 Ovarian Follicle Development	224
10.3 Connexins in Developing Follicles	225
10.4 Roles of Individual Connexins in Folliculogenesis.....	228
10.5 Connexin Redundancy in Ovarian Follicles	232
10.6 Implications for Understanding Human Female Infertility....	233
10.7 Conclusions	234
References	235
 11 Placental Connexins of Mice and Men	 239
<i>Caroline Dunk, Mark Kibschull, Alexandra Gellhaus, Elke Winterhager, Stephen Lye</i>	
11.1 Introduction	239
11.1.1 Temporal and Spatial Pattern of Connexins in Placentae of Mice and Men	241
11.2 The Role of Gap Junction Connexins in the Murine Placenta .	241
11.2.1 Connexin 26 Facilitates Transport Across the Placental Barrier	242
11.2.2 Connexin 31 Regulates Murine Trophoblast Cell Lineage Development.....	243
11.2.3 TS Cells as a Model to Investigate the Role of Connexins in Placental Development	244
11.3 The Role of Gap Junction Connexins in the Human Placenta .	246
11.3.1 Cx43 Supports Villous Cytotrophoblast Fusion to Form Syncytium	246
11.3.2 A Novel Role for Cx43 in Intracellular Signaling	247
11.3.3 Connexin 40 Regulates Human Trophoblast Extravillous Cell Lineage Development	248
11.4 Analogous Functions of Murine and Human Connexins in Placental Development.....	250
References	251
 12 Connexins in Growth Control and Cancer	 253
<i>Christian C. Naus, Gary S. Goldberg, Wun Chey Sin</i>	
12.1 Introduction	253
12.2 Connexins and Gap Junctions	255
12.3 Gap Junctions and Tumor Suppression.....	255
12.3.1 Endogenous Expression of Connexins in Tumors	255
12.3.2 Regulation of Endogenous Connexin Expression.....	256

12.3.3	Gap Junctions and Oncogenic Transformation	257
12.3.4	Direct Effects of Altering Connexin Gene Expression ..	259
12.4	Mechanisms of Connexin-Mediated Growth Suppression.....	259
12.4.1	Junction-Mediated Growth Suppression.....	260
12.4.2	Nonjunctional Functions	261
12.4.3	Connexin-Interacting Proteins	262
12.4.4	Direct Interaction of Cx43 with CCN3, a Growth Suppressor	264
12.5	Conclusions	265
	References	266
	Subject Index	275

Gap Junctions in Development and Disease

Winterhager, E. (Ed.)

2005, XVII, 279 p. 47 illus., 10 illus. in color., Hardcover

ISBN: 978-3-540-26156-8
