

Table of Contents

A Multidomain Spectral Collocation Method for Computational Electromagnetics with Application to Optical Waveguides	1
<i>C.C. Huang and J.Y. Yang</i>	
1 Introduction	1
2 Formulations of Wave Equations	2
3 Numerical Techniques	3
3.1 Multidomain Spectral Collocation Method	3
3.2 Interfacial Boundary Conditions	4
3.3 Cardinal Basis Functions	4
4 Determination of Scaling Factor	5
5 Numerical Results and Discussion	5
5.1 Fundamental Mode of Symmetric Three-Layer Step-Index Waveguides	5
5.2 Asymmetric Planar Waveguide with Exponential RIP	6
5.3 Semiconductor Rib Waveguide	7
6 Conclusion	9
Thermonuclear Supernovae: Combining Astrophysical and Terrestrial Combustion	11
<i>E. S. Oran</i>	
1 Introduction	11
2 Thermonuclear Supernovae	12
3 Transition from a Deflagration to a Detonation	15
4 Conclusions to Date	19
Hypersonic Magneto-Aerodynamic Interaction	23
<i>J. S. Shang</i>	
1 Introduction	23
2 Experimental Facility	24
3 Numerical Simulations	24
4 Non-Equilibrium Phenomenon	27
5 Electromagnetic Effects	31
6 Conclusions	31
Some Remarks on the CFD Research for Space Transportation System Development	34
<i>K. Fujii</i>	
1 Introduction	34
1.1 RLV Aerodynamics – CFD Capability for the Estimation of RLV Aerodynamics-	36

XII Table of Contents

1.2	Supersonic Base Flows -Finding a New Efficient Tools-	40
2	Conclusions	44
	Development of Implicit Large Eddy Simulation	47
	<i>K. Kuwahara, S. Komurasaki, J. Ooida, A. Betancourt</i>	
1	Introduction	47
2	Computational Method	48
3	Computational Results	52
3.1	Rearrangement of Karman Vortex Street	52
3.2	Transition to Turbulence	53
3.3	Turbulence Generated by a Lattice	54
3.4	Circular Cylinder	55
3.5	Subsonic Flow Around an Airfoil	55
3.6	Simulation with Using a Body-Fitted Grid	57
	DNA Computing Based on Actual Biological Sequences and Accurate Reaction Control	60
	<i>K. Naitoh</i>	
1	Introduction	60
2	DNA Computing as Nano-Computing	61
3	DNA Computing Using Actual Living Organisms	61
3.1	Problem Solved in this Session	61
3.2	Encoding Based on the Segments of Biological DNA Cut by Restriction Enzymes	61
3.3	Library of the Candidates Obtained with Ligation Reactions and Analysis of the Electrophoresis Photographs . .	62
4	Strategy for Controlling Polymerase Chain Reaction (PCR)	64
4.1	PCR	64
4.2	Control of PCR for DNA Computing	64
5	Conclusion	66
	From One-Month CFD to One-Day CFD – Efforts for Reducing Time and Cost of CFD –	68
	<i>K. Nakahashi, T. Fujita and Y. Ito</i>	
1	Introduction	68
2	Mesh Generation	69
2.1	Mesh Generation Procedure	69
2.2	Surface Mesh Generation	69
3	Parallel Flow Solver	72
3.1	Basic Flow Solver	72
3.2	Parallel Flow Solver	73
4	Numerical Examples	74
4.1	JAXA Supersonic Airplane in Ascending Flight	74
4.2	Flow around a Hornet	77

5	Summary	79
	Numerical Attempts of Capturing Contact Surface	81
	<i>K. Sawada, N. Ohnishi</i>	
1	Introduction.....	81
2	Numerical Methods	82
2.1	Scheme-A (Lagrangian Based Approach)	82
2.2	Scheme-B (Eulerian Based Approach)	83
3	Results and Discussions.....	86
4	Conclusions	89
	Parallel Visualization Systems	91
	<i>H. Miyachi, S. Hayashi, Y. Nakai, Y. Itoh, M. Shirazaki</i> <i>and R. Himeno</i>	
1	Introduction.....	91
2	Visualization Procedure.....	92
3	Various Parallel Visualization Systems	92
3.1	Parallel Volume Rendering System	92
3.2	On-Demand Parallel Rendering System ^[1]	93
3.3	Parallel Visualization System for Cluster Machine	95
4	Performance of the Parallel Visualization Systems.....	96
4.1	Performance of On-Demand Rendering System	96
4.2	Performance of Parallel Visualization System for Cluster Machine	97
5	Conclusion	101
	Numerical Simulation of Time-Dependent Buoyancy-Driven Convection in an Enclosure.....	102
	<i>H.S. Kwak and J.M. Hyun</i>	
1	Introduction.....	102
2	Advances in Numerical Studies	103
3	Resonant Convection Responding to Periodic Excitations	106
4	Concluding Remarks	109
	Automatic Topology Generation	112
	<i>P.R. Eiseman and K. Rajagopalan</i>	
1	Introduction.....	112
2	GridPro's Topological Paradigm	113
3	Cartesian Approach to Automatic Topology Generation.....	114
3.1	Cartesian Topology Generation in Three Dimensions.....	116
3.2	Improvements to the Cartesian Topology Generation Technique in 3D.....	119
4	Automatic Nested Refinement	119
5	Application of Nest to a Thin Curved Wavy Tube in a Box	122

XIV Table of Contents

Computational Study of Influences of a Seam Line of a Baseball on Flows	125
<i>R. Himeno</i>	
1 Introduction	125
2 Computation Method	126
2.1 Basic Equations	126
2.2 MAC Based Scheme	126
2.3 Third-Order Upwind-Difference Scheme	127
3 Grid System	127
4 Shape of the Seam on the Ball	128
5 Computed Results	130
5.1 Four-Seam Case	130
5.2 Two-Seam Case	135
6 Conclusions	136
Vortex Breakdown Flows in Cylindrical Geometry	141
<i>R. Iwatsu</i>	
1 Introduction	141
2 Numerical Model	143
3 Results	144
3.1 Top Rigid-Cover (Case A)	144
3.2 Top Free-Slip-Condition (Case B)	147
Aerodynamic and Structural Analyses of Joined Wings of Hale Aircraft	152
<i>R. Sivaji, S. Marisarla, V. Narayanan, V. Kaloyanova, U. Ghia and K. N. Ghia</i>	
1 Introduction	152
2 Aerodynamic Analysis	153
3 Structural Analysis	154
3.1 1-D Approximation of 3-D Joined-Wing Structure: Aerodynamics-Structure Coupling.	154
3.2 Box-Wing Model	155
3.3 Reinforced Shell Model	155
4 Results and Discussion	156
4.1 Aerodynamic Analysis	156
4.2 Structural Analysis	158
5 Conclusion	162
Numerical Simulation of Formation and Movement of Various Sand Dunes	165
<i>R. Zhang, T. Kawamura and M. Kan</i>	
1 Introduction	165
2 Numerical Methods	166
2.1 Calculation of the Air Flow	167

2.2	Estimation of Sand Transfer	167
2.3	Determination of the Shape of the Sand Dunes	167
3	Results and Discussion	168
3.1	Barchan Dunes	168
3.2	Transverse Dunes	169
3.3	Linear Dunes	169
3.4	Chinese Wall	172
4	Concluding Remarks	173
	Evolutionary Multi-Objective Optimization and Visualization	175
	<i>S. Obayashi</i>	
1	Introduction	175
2	Evolutionary Multiobjective Optimization	177
2.1	MOGAs	177
2.2	CFD Evaluation	177
2.3	Neural Network and SOM	177
2.4	Cluster Analysis	178
3	Four-Objective Optimization for Supersonic Wing Design	179
3.1	Formulation of Optimization	179
3.2	Visualization of Design Tradeoffs: SOM of Tradeoffs	180
3.3	Data Mining of Design Space: SOM of Design Variables	181
4	Concluding Remarks	183
	The Framework of a System for Recommending Computational Parameter Choices	186
	<i>S. Shirayama</i>	
1	Introduction	186
2	Parameter Recommendation System	187
2.1	Parameter Study	187
2.2	Parameter Mining	188
2.3	Framework of the Recommendation System	189
3	Components of the Parameter Recommendation System	189
3.1	Parameter Space	190
3.2	Search Procedure	190
3.3	Optimization by GA and Rule Extraction by Schema Analysis	191
4	System Implementation	192
5	Framework Verification by Numerical Experiments	192
5.1	Experimental System 1	193
5.2	Numerical Experiments Using System 1 and Discussion	194
5.3	Experimental System 2	195
6	Conclusion	196

XVI Table of Contents

Gas flow in Close Binary Star Systems	198
<i>T. Matsuda, K. Oka, I. Hachisu, H.M.J. Boffin</i>	
1 Accretion Discs	198
1.1 Numerical Simulations of Gas Flow in a Close Binary System	198
1.2 Modern Calculation of Accretion Flow	200
1.3 Discovery of Spiral Shocks by Observation	202
2 Flow on a Companion Surface	202
2.1 Flow Pattern	202
2.2 Doppler Map	203
Flow Simulation using Combined Compact Difference Scheme with Spectral-like Resolution	206
<i>Tomonori Nihei (CSE, Nagoya University), Katsuya Ishii (ITC, Nagoya University)</i>	
1 Introduction	206
2 Combined Compact Difference Scheme	207
3 Simulation of Incompressible Flows	209
3.1 The Poisson Equation Solver for Two-Dimensional Problems	209
3.2 The Poisson Equation Solver for Three-Dimensional Problems	211
3.3 Three-dimensional incompressible lid-driven cavity flow	212
4 Conclusions	213
A New High Order Finite Volume Method for the Euler Equations on Unstructured Grids	215
<i>Z.J. Wang</i>	
1 Introduction	215
2 Basic Idea of the Spectral Volume Method	216
3 Numerical Results	217
3.1 Accuracy Study with Vortex Evolution Problem	217
3.2 Scattering Of Periodic Acoustic Source from Two Cylinders	220
4 Conclusions	222
Participants Photograph	226
Participants List	227
The Sixth International Nobeyama Workshop on the New Century of Computational Fluid Dynamics	229

New Developments in Computational Fluid Dynamics
Proceedings of the Sixth International Nobeyama
Workshop on the New Century of Computational Fluid
Dynamics, Nobeyama, Japan, April 21 to 24, 2003
Fujii, K.; Nakahashi, K.; Obayashi, S.; Komurasaki, S.
(Eds.)

2005, XVI, 232 p. 169 illus., 51 illus. in color., Hardcover
