## Contents

<b>1</b>	<b><math>\mathrm{GL}_n(\mathbf{R})</math> Action on <math>\mathrm{Pos}_n(\mathbf{R})</math></b>	<b>1</b>
1	Iwasawa-Jacobi Decomposition	2
2	Inductive Construction of the Grenier Fundamental Domain	6
3	The Inductive Coordinates on $\mathrm{SPos}_n$	14
4	The Grenier Fundamental Domain and the Minimal Compactification of $\Gamma_n \backslash \mathrm{SPos}_n$	17
5	Siegel Sets	20
<b>2</b>	<b>Measures, Integration and Quadratic Model</b>	<b>23</b>
1	Siegel Sets and Finiteness of Measure Mod $\mathrm{SL}_n(\mathbf{Z})$	24
2	Decompositions of Haar Measure on $\mathrm{Pos}_n(\mathbf{R})$	25
3	Decompositions of Haar Measure on $\mathrm{SPos}_n$	36
4	Siegel's Formula	39
<b>3</b>	<b>Special Functions on <math>\mathrm{Pos}_n</math></b>	<b>49</b>
1	Characters of $\mathrm{Pos}_n$	50
2	The Gamma Function	55
3	The Bengtson Bessel Function	58
4	Mellin and Fourier Transforms	69
<b>4</b>	<b>Invariant Differential Operators on <math>\mathrm{Pos}_n(\mathbf{R})</math></b>	<b>75</b>
1	Invariant Polynomials	75
2	Invariant Differential Operators on $\mathrm{Pos}_n$ the Maass-Selberg Generators	78
3	The Lie Algebra Generators	84
4	The Transpose of an Invariant Differential Operator	87
5	Invariant Differential Operators on $A$ and the Normal Projection	90

# VIII Contents

<b>5</b>	<b>Poisson Duality and Zeta Functions</b> .....	95
1	Poisson Duality .....	95
2	The Matrix Scalar Product .....	97
3	The Epstein Zeta Function: Riemann's Expression .....	99
4	Epstein Zeta Function: A Change of Variables .....	104
5	Epstein Zeta Function: Bessel-Fourier Series .....	105
<b>6</b>	<b>Eisenstein Series First Part</b> .....	107
1	Adjointness Relations .....	107
2	Fourier Expansion Determined by Partial Iwasawa Coordinates .....	110
3	Fourier Coefficients from Partial Iwasawa Coordinates .....	114
4	A Fourier Expansion on $S\text{Pos}_n(\mathbf{R})$ .....	116
5	The Regularizing Operator $Q_Y =  Y   \frac{\partial}{\partial Y} $ .....	118
<b>7</b>	<b>Geometric and Analytic Estimates</b> .....	121
1	The Metric and Iwasawa Coordinates .....	121
2	Convergence Estimates for Eisenstein Series .....	125
3	A Variation and Extension .....	130
<b>8</b>	<b>Eisenstein Series Second Part</b> .....	133
1	Integral Matrices and Their Chains .....	134
2	The $\zeta_{\mathbf{Q}}$ Fudge Factor .....	140
3	Eisenstein Series .....	143
4	Adjointness and the $\Gamma_U \backslash \Gamma$ -trace .....	148
5	Changing to the $(s_1, \dots, s_n)$ -variables .....	152
6	Functional Equation: Invariance under Cyclic Permutations .....	157
7	Invariance under All Permutations .....	159
	<b>Bibliography</b> .....	163
	<b>Index</b> .....	167

Posn(R) and Eisenstein Series

Jorgenson, J.; Lang, S.

2005, VIII, 174 p., Softcover

ISBN: 978-3-540-25787-5
