<b>Introduction</b>	1
<b>1 Four Hamiltonian Systems</b>	9
1.1 Small Vibrations of Tetrahedral Molecules	9
1.1.1 Description	9
1.1.2 The 2-Mode	11
1.1.3 The 3-Mode	16
1.2 The Hydrogen Atom in Crossed Fields	17
1.2.1 Perturbed Kepler Systems	17
1.2.2 Description	18
1.2.3 Normalization and Reduction	19
1.2.4 Energy Momentum Map	20
1.3 Quadratic Spherical Pendula	22
1.3.1 A Spherical Pendulum Model for Floppy Triatomic Molecules	22
1.3.2 The Family of Quadratic Spherical Pendula	23
1.4 The 1: – 2 Resonance System	26
1.4.1 Reduction	27
1.4.2 The 1: – 1 Resonance System	30
1.4.3 Fractional Monodromy in the 1: – 2 Resonance System	30
<b>2 Small Vibrations of Tetrahedral Molecules</b>	35
2.1 Discrete and Continuous Symmetry	35
2.1.1 The Hamiltonian Family	35
2.1.2 Dynamical Symmetry. Relative Equilibria	37
2.1.3 Symmetry and Topology	40
2.2 One-Parameter Classification	43
2.3 Normalization and Reduction	46
2.4 Relative Equilibria Corresponding to Critical Points	47
2.5 Relative Equilibria Corresponding to Non-critical Points	51

2.5.1	Existence and Stability of the $\mathcal{C}_s \wedge \mathcal{T}_2$ Relative Equilibria .....	51
2.5.2	Configuration Space Image of the $\mathcal{C}_s \wedge \mathcal{T}_2$ Relative Equilibria.....	54
2.6	Bifurcations .....	56
2.7	The 3-Mode as a 3-DOF Analogue of the Hénon-Heiles Hamiltonian .....	57
<b>3</b>	<b>The Hydrogen Atom in Crossed Fields .....</b>	<b>59</b>
3.1	Review of the Keplerian Normalization .....	59
3.1.1	Kustaanheimo-Stiefel Regularization .....	59
3.1.2	First Normalization.....	60
3.1.3	First Reduction .....	61
3.2	Second Normalization and Reduction .....	63
3.2.1	Second Normalization .....	63
3.2.2	Second Reduction .....	64
3.2.3	Fixed Points .....	66
3.3	Discrete Symmetries and Reconstruction .....	66
3.4	The Hamiltonian Hopf Bifurcations .....	68
3.4.1	Local Chart .....	69
3.4.2	Flattening of the Symplectic Form .....	70
3.4.3	$\mathbf{S}^1$ Symmetry .....	71
3.4.4	Linear Hamiltonian Hopf Bifurcation .....	72
3.4.5	Nonlinear Hamiltonian Hopf Bifurcation.....	75
3.5	Hamiltonian Hopf Bifurcation and Monodromy.....	77
3.6	Description of the Hamiltonian Hopf Bifurcation on the Fully Reduced Space.....	81
3.6.1	The Standard Situation .....	81
3.6.2	The Hydrogen Atom in Crossed Fields .....	82
3.6.3	Degeneracy .....	85
<b>4</b>	<b>Quadratic Spherical Pendula.....</b>	<b>87</b>
4.1	Generalities .....	87
4.1.1	Constrained Equations of Motion.....	87
4.1.2	Reduction of the Axial Symmetry .....	90
4.2	Classification of Quadratic Spherical Pendula .....	91
4.2.1	Critical Values of the Energy-Momentum Map .....	91
4.2.2	Reconstruction .....	94
4.3	Classical and Quantum Monodromy .....	98
4.3.1	Classical Monodromy .....	98
4.3.2	Quantum Monodromy .....	100
4.4	Monodromy in the Family of Quadratic Spherical Pendula ....	101
4.4.1	Monodromy in Type O and Type II Systems.....	102
4.4.2	Non-local Monodromy .....	103
4.5	Quantum Monodromy in the Quadratic Spherical Pendula ....	104

4.6	Geometric Hamiltonian Hopf Bifurcations .....	106
4.7	The LiCN Molecule .....	110
<b>5</b>	<b>Fractional Monodromy in the 1: – 2 Resonance System</b> ....	<b>113</b>
5.1	The Energy-Momentum Map .....	113
5.1.1	Reduction .....	114
5.1.2	The Discriminant Locus .....	114
5.1.3	Reconstruction .....	117
5.2	The Period Lattice Description of Fractional Monodromy ....	119
5.2.1	Rotation Angle and First Return Time .....	121
5.2.2	The Modified Period Lattice .....	122
5.3	Sketch of the Proof of Fractional Monodromy in [43] .....	124
5.4	Relation to the 1: – 2 Resonance System of [99] .....	125
5.5	Quantum Fractional Monodromy .....	126
5.6	Fractional Monodromy in Other Resonances .....	127
 <b>Appendix</b>		
<b>A</b>	<b>The Tetrahedral Group</b> .....	<b>129</b>
A.1	Action of the Group $T_d \times \mathcal{T}$ on the Spaces $\mathbf{R}^3$ and $T^*\mathbf{R}^3$ ....	129
A.2	Fixed Points of the Action of $T_d \times \mathcal{T}$ on $\mathbf{CP}^2$ .....	130
A.3	Subspaces of $\mathbf{CP}^2$ Invariant Under the Action of $T_d \times \mathcal{T}$ ....	131
A.4	Action of $T_d \times \mathcal{T}$ on the Projections of Nonlinear Normal Modes in the Configuration Space $\mathbf{R}^3$ .....	133
<b>B</b>	<b>Local Properties of Equilibria</b> .....	<b>135</b>
B.1	Stability of Equilibria .....	135
B.2	Morse Inequalities and the Euler Characteristic .....	136
B.3	Linearization Near Equilibria on $\mathbf{CP}^2$ .....	137
 <b>References</b> .....		<b>139</b>
 <b>Index</b> .....		<b>147</b>

Metamorphoses of Hamiltonian Systems with  
Symmetries

Efstathiou, K.

2005, IX, 149 p., Softcover

ISBN: 978-3-540-24316-8
