

Table of Contents

Adaptation, Power Consumption and Scheduling

Energy Management for Embedded Multithreaded Processors with Integrated EDF Scheduling	1
<i>Sascha Uhrig and Theo Ungerer</i>	
Reducing System Level Power Consumption for Mobile and Embedded Platforms	18
<i>Ripal Nathuji and Karsten Schwan</i>	
Implementing Control Algorithms Within a Multithreaded Java Microcontroller	33
<i>Uwe Brinkschulte and Mathias Pacher</i>	
Adaptivity for Quality and Timeliness Flexible Real-Time Systems	50
<i>Thomas Schwarzfischer</i>	

Adaptation and Agents

Apricot Agent Platform for User-Friendly Mobile Service Development....	65
<i>Petteri Alahuhta, Henri Löthman, Heli Helaakoski, Arto Koskela, and Juha Röning</i>	
Support of Reflective Mobile Agents in a Smart Office Environment	79
<i>Faruk Bagci, Holger Schick, Jan Petzold, Wolfgang Trumler, and Theo Ungerer</i>	
Learning Action Sequences Through Imitation in Behavior Based Architectures	93
<i>Willi Richert, Bernd Kleinjohann, and Lisa Kleinjohann</i>	

Adaptation and Services

Self-healing Execution of Business Processes Based on a Peer-to-Peer Service Architecture	108
<i>Thomas Friese, Jörg P. Müller, and Bernd Freisleben</i>	
Runtime Adaptation of Applications Through Dynamic Recomposition of Components	124
<i>Arun Mukhija and Martin Glinz</i>	
An Observer/Controller Architecture for Adaptive Reconfigurable Stacks..	139
<i>Thorsten Schöler and Christian Müller-Schloer</i>	

Application Adaptable Systems

The Organic Features of the AMIDAR Class of Processors 154
Stephan Gatzka and Christian Hochberger

Reusable Design of Inter-chip Communication Interfaces
for Next Generation of Adaptive Computing Systems 167
Vincent Kotzsch, Jörg Schneider, and Günther Döring

DESCOMP: A New Design Space Exploration Approach 178
Mario Schölzel and Peter Bachmann

Design Space Navigation for Neighboring Power-Performance Efficient
Microprocessor Configurations 193
Pedro Trancoso

An Efficient Frequency Scaling Approach
for Energy-Aware Embedded Real-Time Systems 207
*Christian Poellabauer, Tao Zhang, Santosh Pande,
and Karsten Schwan*

Pervasive Computing and Communication

Towards Autonomic Networking Using Overlay Routing Techniques 222
Kendy Kutzner, Kurt Cramer, and Thomas Fuhrmann

Context-Based Storage Management for Wearable and Portable Devices .. 236
Alexandros Karypidis and Spyros Lalis

A File System for System Programming in Ubiquitous Computing 249
Christian Decker, Michael Beigl, and Albert Krohn

Author Index 265

Systems Aspects in Organic and Pervasive Computing -
ARCS 2005

18th International Conference on Architecture of
Computing Systems, Innsbruck, Austria, March 14-17,
2005, Proceedings

Beigl, M.; Lukowicz, P. (Eds.)

2005, X, 268 p., Softcover

ISBN: 978-3-540-25273-3
