

# Table of Contents

|   |     |
|---|-----|
| CERES in Many-Valued Logics<br><i>Matthias Baaz and Alexander Leitsch</i> .....   | 1   |
| A Decomposition Rule for Decision Procedures by Resolution-Based<br>Calculi<br><i>Ullrich Hustadt, Boris Motik, and Ulrike Sattler</i> .....                    | 21  |
| Abstract DPLL and Abstract DPLL Modulo Theories<br><i>Robert Nieuwenhuis, Albert Oliveras, and Cesare Tinelli</i> .....   | 36  |
| Combining Lists with Non-stably Infinite Theories<br><i>Pascal Fontaine, Silvio Ranise, and Calogero G. Zarba</i> .....   | 51  |
| Abstract Model Generation for Preprocessing Clause Sets<br><i>Miyuki Koshimura, Mayumi Umeda, and Ryuzo Hasegawa</i> .....                                      | 67  |
| Flat and One-Variable Clauses: Complexity of Verifying<br>Cryptographic Protocols with Single Blind Copying<br><i>Helmut Seidl and Kumar Neeraj Verma</i> ..... | 79  |
| Applications of General Exact Satisfiability in Propositional Logic<br>Modelling<br><i>Vilhelm Dahllöf</i> .....  | 95  |
| BCiC: A System for Code Authentication and Verification<br><i>Nathan Whitehead and Martín Abadi</i> .....   | 110 |
| Ordered Resolution with Selection for $\mathcal{H}(@)$<br><i>Carlos Areces and Daniel Gorín</i> .....   | 125 |
| On a Semantic Subsumption Test<br><i>Jerzy Marcinkowski, Jan Otop, and Grzegorz Stelmaszek</i> .....  | 142 |
| Suitable Graphs for Answer Set Programming<br><i>Thomas Linke and Vladimir Sarsakov</i> .....   | 154 |
| Weighted Answer Sets and Applications in Intelligence Analysis<br><i>Davy Van Nieuwenborgh, Stijn Heymans, and Dirk Vermeir</i> .....                           | 169 |
| How to Fix It: Using Fixpoints in Different Contexts<br><i>Igor Walukiewicz</i> .....   | 184 |
| Reasoning About Systems with Transition Fairness<br><i>Benjamin Aminof, Thomas Ball, and Orna Kupferman</i> .....   | 194 |

|   |     |
|---|-----|
| Entanglement – A Measure for the Complexity of Directed Graphs<br>with Applications to Logic and Games<br><i>Dietmar Berwanger and Erich Grädel</i> .....                           | 209 |
| How the Location of $*$ Influences Complexity in Kleene Algebra<br>with Tests<br><i>Chris Hardin</i> .....  | 224 |
| The Equational Theory of $\langle \mathbb{N}, 0, 1, +, \times, \uparrow \rangle$ Is Decidable, but Not<br>Finitely Axiomatisable<br><i>Roberto Di Cosmo and Thomas Dufour</i> ..... | 240 |
| A Trichotomy in the Complexity of Propositional Circumscription<br><i>Gustav Nordh</i> .....  | 257 |
| Exploiting Fixable, Removable, and Implied Values in Constraint<br>Satisfaction Problems<br><i>Lucas Bordeaux, Marco Cadoli, and Toni Mancini</i> .....                             | 270 |
| Evaluating QBFs via Symbolic Skolemization<br><i>Marco Benedetti</i> .....  | 285 |
| The Dependency Pair Framework: Combining Techniques for<br>Automated Termination Proofs<br><i>Jürgen Giesl, René Thiemann, and Peter Schneider-Kamp</i> .....                       | 301 |
| Automated Termination Analysis for Incompletely Defined Programs<br><i>Christoph Walther and Stephan Schweitzer</i> .....   | 332 |
| Automatic Certification of Heap Consumption<br><i>Lennart Beringer, Martin Hofmann, Alberto Momigliano, and<br/>Olha Shkaravska</i> .....   | 347 |
| A Formalization of Off-Line Guessing for Security Protocol Analysis<br><i>Paul Hankes Drielsma, Sebastian Mödersheim, and Luca Viganò</i> ....                                      | 363 |
| Abstraction-Carrying Code<br><i>Elvira Albert, Germán Puebla, and Manuel Hermenegildo</i> .....   | 380 |
| A Verification Environment for Sequential Imperative Programs in<br>Isabelle/HOL<br><i>Norbert Schirmer</i> .....   | 398 |
| Can a Higher-Order and a First-Order Theorem Prover Cooperate?<br><i>Christoph Benz Müller, Volker Sorge, Mateja Jamnik, and<br/>Manfred Kerber</i> .....                           | 415 |
| A Generic Framework for Interprocedural Analyses of Numerical<br>Properties<br><i>Markus Müller-Olm and Helmut Seidl</i> .....  | 432 |

|  |     |
|--|-----|
| Second-Order Matching via Explicit Substitutions<br><i>Flávio L.C. de Moura, Fairouz Kamareddine, and<br/>Mauricio Ayala-Rincón</i> .....                                | 433 |
| Knowledge-Based Synthesis of Distributed Systems Using Event<br>Structures<br><i>Mark Bickford, Robert C. Constable, Joseph Y. Halpern, and<br/>Sabina Petride</i> ..... | 449 |
| The Inverse Method for the Logic of Bunched Implications<br><i>Kevin Donnelly, Tyler Gibson, Neel Krishnaswami, Stephen Magill,<br/>and Sungwoo Park</i> .....           | 466 |
| Cut-Elimination: Experiments with CERES<br><i>Matthias Baaz, Stefan Hetzl, Alexander Leitsch, Clemens Richter,<br/>and Hendrik Spohr</i> .....                           | 481 |
| Uniform Rules and Dialogue Games for Fuzzy Logics<br><i>Agata Ciabattoni, Christian G. Fermüller, and George Metcalfe</i> .....  | 496 |
| Nonmonotonic Description Logic Programs: Implementation and<br>Experiments<br><i>Thomas Eiter, Giovambattista Ianni, Roman Schindlauer, and<br/>Hans Tompits</i> .....   | 511 |
| Implementing Efficient Resource Management for Linear Logic<br>Programming<br><i>Pablo López and Jeff Polakow</i> .....  | 528 |
| Layered Clausal Resolution in the Multi-modal Logic of Beliefs and<br>Goals<br><i>Jamshid Bagherzadeh and S. Arun-Kumar</i> .....  | 544 |
| <b>Author Index</b> .....  | 561 |

Logic for Programming, Artificial Intelligence, and  
Reasoning

11th International Workshop, LPAR 2004, Montevideo,  
Uruguay, March 14-18, 2005, Proceedings

Baader, F.; Voronkov, A. (Eds.)

2005, XII, 560 p., Softcover

ISBN: 978-3-540-25236-8
